Internet Marketing for Information Technology Companies Barry Silverstein,2001 While information technology (IT) companies have a special affinity for the Internet, they are not necessarily using Internet marketing to its fullest potential. Addressing the specific Internet marketing needs of IT companies and written for IT marketing pros, this how-to guide shows how to make the best of a Web site, get the most out of online advertising and e-mail marketing, build a Web community, and participate in affiliate marketing programs. Numerous case studies from IT companies are used to illustrate the concepts.

Will Ad Blocking Break the Internet? Ben Shiller,Joel Waldfogel,Johnny Ryan,2017 Ad blockers allow Internet users to obtain information without generating ad revenue for site owners; and by 2016 they were used by roughly a quarter of site visitors. Given the ad-supported nature of much of the web, ad blocking poses a threat to site revenue and, if revenue losses undermine investment, a possible threat to consumers' access to appealing content. Using unique, proprietary, and site-specific data on the share of site visitors using ad blockers at a few thousand sites, along with Alexa traffic data, we explore the impact of ad blocker usage on site quality, as inferred from traffic ranks, 2013-2016. We find that each additional percentage point of site visitors using ad blockers raises (worsens) its traffic rank by about 0.6 percent over a 35 month period, with stronger effects at initially worse-ranked sites. We provide additional evidence of causality by showing that the relationship between traffic trends and eventual ad blocking does not predate ad blocking. Plausible instruments for ad blocking also deliver consistent results. Effects of ad blocking on revenue are compounded by the fact that ad blocking reduces visits, while also generating less revenue from remaining visitors employing ad blockers. We conclude that ad blocking poses a substantial threat to the ad-supported web.

Link-Layer Cooperative Communication in Vehicular Networks Sailesh Bharati,Weihua Zhuang,2017-07-25 This book presents link-layer cooperative frameworks to improve transmission reliability and network throughput of distributed TDMA MAC protocols in vehicular ad hoc networks (VANETs). The main objective of this book is to present link-layer node cooperation schemes to enhance the link-layer performance of vehicular networks, in terms of reliability and system throughput. The authors present approaches proposed for the medium access control (MAC) and node cooperation in VANETs. The authors also cover cooperative ADHOC MAC for point-to-point communication between a pair of source and destination nodes, and cooperative relay broadcasting for broadcast services in this book. The performance of node cooperation frameworks is evaluated via mathematical analysis and computer simulations, in comparison with distributed TDMA MAC protocols without cooperation. The proposed node cooperation frameworks enhance the performance of distributed TDMA MAC and make it more robust to tackle the dynamic networking conditions in VANETs. Furthermore, with cooperation enabled transmission, the performance of distributed TMDA MAC is more suitable to support the wide range of mobile applications and their strict service requirements which is discussed in this book. The proposed node cooperation schemes and distributed cooperation decisions can be extended to wireless systems other than distributed TDMA MAC, such as cellular communication, for vehicular communications introduced in this book. This book is useful for researchers from academia and industry, as well as advanced level students interested in vehicular communication networks. It is also useful for professionals and engineers developing applications that use cooperative wireless communication systems.

Ad Blocking Survival Guide Neil Smyth,2016-04-04 Over 200 million people now use an ad blocker when browsing the internet, a 41% increase over the preceding 12 month period. This widespread use of ad blocking technology is expected to result in over \$20 billion in lost advertising revenue this year alone. Despite the magnitude of these numbers, the threat of ad blocking is largely an invisible threat to the average web publisher. Unless steps are taken to assess the impact of ad blocking on an individual website, the only sign that ad blocking is an issue is likely to be a decline in advertising revenue. Ad blocking is certainly far from the only challenge faced by web publishers today. The good news, however, is that ad blocking is one of the few areas where web publishers have some control over how to respond to the issue. We can't cure ad blindness, stop ad budgets migrating to Facebook, and whatever is causing revenues from Google AdSense advertising to decline is far beyond our control. What we do control is our own websites and, by extension, how we react to, communicate with and respond to visitors using ad blocking is entirely up to us. While there is no one size fits all solution, the goal of this book is to outline a range of proven strategies designed to not only detect, quantify and mitigate the threat of ad blocking, but also move beyond advertising as a sole source of revenue. The chapters in this book cover a variety of options, including code examples, ranging from passive measuring of ad blocking behavior to the more aggressive step of denying access to visitors using an ad blocker. Topics covered in this book include: Learn how ad blocking works Detect when visitors are blocking ads Assess ad blocking impact on your site Use ad reinsertion to fill blocked ads Generate revenue beyond advertising

Persuade visitors to whitelist your website Learn how to deny site access to ad blockers Track visitor whitelist compliance rates Generate revenue with native advertising Learn about the Acceptable Ads Initiative Explore 3rd party solutions

Wireless Networks: Multiuser Detection in Cross-Layer Design Christina Comaniciu,Narayan B. Mandayam,H. Vincent Poor,2006-06-14 Cross-layer design seeks to enhance the capacity of wireless networks significantly through the joint optimization of multiple layers in the network, primarily the physical (PHY) and medium access control (MAC) layers. Although there are advantages of such design in wireline networks as well, this approach is particularly advantageous for wireless networks due to the properties (such as mobility and interference) that strongly affect performance and design of higher layer protocols. This unique monograph is concerned with the issue of cross-layer design in wireless networks, and more particularly with the impact of node-level multiuser detection on such design. It provides an introduction to this vibrant and active research area insufficiently covered in existing literature, presenting some of the principal methods developed and results obtained to date. Accompanied by numerous illustrations, the text is an excellent reference for engineers, researchers and students working in communication networks.

Making It Personal Tanya Kant,2020 The encounter of personalized experiences-targeted advertisements, tailored information feeds and recommended content among other things-is now a common and somewhat inescapable component of digital life. More often than not however, you the user are not primarily responsible for personalizing your web engagements: instead, with the help of your search, browsing, and purchase histories, your likes, your click-throughs, and a multitude of other data you produce as you go about your day, your experience can conveniently-and computationally-be personalized on your behalf. This book explores a host of new questions that emerge from web users' encounters with these forms of algorithmic personalization. What do users know about the algorithms that apparently know them? If personalization practices seek to act on the user's behalf (for instance by deciding what is content is personally relevant), then how do users retain or relinquish their autonomy? Indeed, what kinds of selfhoods are made possible when personalization algorithms intervene in identity construction? Making it Personal is the first full-length monograph to critically analyze the socio-cultural implications of algorithmic personalization through the accounts and testimonies of web users themselves. At the heart of the book are interviews and focus groups with web users who-through a myriad of resistant, tactical, resigned or trusting engagements-encounter algorithmic personalization as part of their lived experience on the web. The book proposes that for those who encounter it, algorithmic personalization creates new implications for knowledge production, autonomy, cultural capital, and formations of self.--
