A Windows NTTM Guide to the Web Richard Raucci, 2011-06-27 NT as an Operating System Microsoft developed Windows NT as an alternative to Unix. The company sees it as a part of its overall Enterprise Computing plan. It scales up from basic 486 systems to high-end RISC systems from companies like Digital, NEC, and PC vendors offering PowerPC systems for NT. The basic operating system consists of a user interface shell (similar in appearance to Windows 3.1 for NT 3.1 to 3.5, and changing to look and feel more like Windows 95 for NT 4.0) designed to run 32-bit programs. This makes it ideal for the multi media nature of Web browsers, and for the heavy-duty requirements of a Web server. There are a number of elements in the OS that are special to NT. These include the control panels and administrative support tools relating to NT's services and support mechanisms. TCP/IP is included for Internet access through traditional networks. You can also connect from Windows NT Workstation via MS Remote Access to any Internet Access Providers supporting PPP. Basic requirements for Windows NT Workstation are a 486 system with at least 8 MB of RAM, although 16 MB is recommended. The client software needed to connect to a corporate server is included, as is the Remote Access software mentioned earlier. 1. Introduction FIGURE 1.1. NT4.0 operating system.

Media, Politics and the Network Society Robert Hassan, 2004-03-16 What is the network society? What effects does it have upon media, culture and politics? What are the competing forces in the network society, and how are they reshaping the world? The rise of the network society – the suffusion of much of the economy, culture and society with digital interconnectivity – is a development of immense significance. In this innovative book, Robert Hassan unpacks the dynamics of this new information order and shows how they have affected both the way media and politics are 'played', and how these are set to reshape and reorder our world. Using many of the current ideas in media theory, cultural studies and the politics of the newly evolving 'networked civil society', Hassan argues

that the network society is steeped with contradictions and in a state of deep flux. This is a key text for undergraduate students in media studies, politics, cultural studies and sociology, and will be of interest to anyone who wishes to understand the network society and play a part in shaping it.
