   Media, Politics and the Network Society Robert
Hassan,2004-03-16 What is the network society?
What effects does it have upon media, culture and
politics? What are the competing forces in the
network society, and how are they reshaping the
world? The rise of the network society – the
suffusion of much of the economy, culture and
society with digital interconnectivity – is a
development of immense significance. In this
innovative book, Robert Hassan unpacks the
dynamics of this new information order and shows
how they have affected both the way media and
politics are 'played', and how these are set to
reshape and reorder our world. Using many of the
current ideas in media theory, cultural studies
and the politics of the newly evolving 'networked
civil society', Hassan argues that the network
society is steeped with contradictions and in a
state of deep flux. This is a key text for
undergraduate students in media studies, politics,
cultural studies and sociology, and will be of
interest to anyone who wishes to understand the
network society and play a part in shaping it.
