*Remote Access Networks and Services* Oliver C. Ibe, 1999-04-19 Expert Oliver C. Ibe provides you with the technical background you need to confidently select and implement the best remote access technologies for your company's network. He fills you in on everything you should know about how remote traffic is processed from source to network, and the technologies, services, and protocols it is likely

to encounter along the way. He also acquaints you with all the remote access devices currently on the market, and describes, in detail, how each will perform with legacy networking services and technologies. With the help of numerous illustrations and time flow diagrams, and a complete glossary of technical terms, he provides clear, detailed coverage of: \* xDSL, HFC, FTTC, FTTH, and other broadband access technologies. \* Remote access performance with legacy and emerging technologies and services. \* Remote access network security including basic security services, cryptographic systems, IP security protocols, and Web security. \* Firewalls and firewall architectures. \* Virtual Private Network (VPN) architectures and implementations. \* VPN applications including intranets, extranets, and voice over IP. \* Wireless remote access services. \* Mobile data networking including CDPD, mobile IP, and short message services.

Network Evolution and Applications Vikas Kumar Jha, Bishwajeet Kumar Pandey, Ciro Rodriguez, 2022-11-14 Network Evolution and Applications provides a comprehensive, integrative, and

easy approach to understanding the technologies, concepts, and milestones in the history of networking. It provides an overview of different aspects involved in the networking arena that includes the core technologies that are essential for communication and important in our day-to-day life. It throws some light on certain past networking concepts and technologies that have been revolutionary in the history of science and technology and have been highly impactful. It expands on various concepts like Artificial Intelligence, Software Defined Networking, Cloud Computing, and Internet of Things, which are very popular at present. This book focuses on the evolutions made in the world of networking. One can't imagine the world without the Internet today; with the Internet and the present-day networking, distance doesn't matter at all. The COVID-19 pandemic has resulted in a tough time worldwide, with global lockdown, locked homes, empty streets, stores without consumers, and offices with no or fewer staff. Thanks to the modern digital networks, the culture of work from home (WFH) or working remotely with the network/Internet connection has come to the fore, with even school and university classes going online. Although WFH is not new, the COVID-19 pandemic has given it a new look, and industries are now willfully exploring WFH to extend it in the future. The aim of this book is to present the timeline of networking to show the developments made and the milestones that were achieved due to these developments.

James Stroman, 2008-04-04 Between coordinating meetings, making travel arrangements, and running the phone lines, being a professional administrative assistant requires an astonishing and varied range of skills involving interpersonal communication, written presentations, and organizational ability.
