The book draws on innovative research and industry practice to explain methods for the modeling of all of these processes, helping readers apply computational power to more areas of textile engineering. Provides new approaches and techniques to simulate a wide range of textile processes from geometry to manufacturing Includes coverage of detailed mathematical methods for textiles, including neural networks, genetic algorithms, and the finite element method Addresses modeling techniques for many different phenomena, including heat transfer, fluid dynamics and multi-phase flow

As by Fire Jonathan D. Jansen, 2017 What are the real roots of the student protests of 2015 and 2016? Is it actually about fees? Why did so many protests turn violent? Where is the government while the buildings burn, and do the students know how to end the protests? Former Free State University Vice-Chancellor Jonathan Jansen delves into the unprecedented disruption of universities that caught South Africa by surprise. In frank interviews with eleven of the VCs most affected, he examines the forces at work, why the protests escalate into chaos, and what is driving - and exasperating - our youth. This urgent and necessary book gives us an insider view of the crisis, tells us why the conflict will not go away and what it means for the future of our universities.--Back cover.

Rethinking the "L" Word in Higher Education: The Revolution of Research on Leadership Adrianna Kezar, Rozana Carducci, Melissa Contreras-McGavin, 2011-10-19 In these times of change and challenge in higher education, pleas for leadership have become frequent. However, the type of leadership required within this new context (of globalization, demographic changes, technological advancement, and questioning of social authority) may call for different skills, requiring a re-education among campus stakeholders if they want to be successful leaders. In the past twenty years, there has been a revolution in the way that leadership is conceptualized across most fields and disciplines. Leadership has moved away from being leader-centered, individualistic, hierarchical, focused on universal characteristics, and emphasizing power over followers. Instead, a new vision has emerged: leadership that is process-centered, collective, context-bound, non-hierarchical, and focused on mutual power and influence processes. This volume summarizes research and literature about new conceptualizations of leadership to inform practice. This is volume 31, number 6, of the ASHE Higher Education Report, a bi-monthly journal published by Jossey-Bass. See our entire list of ASHE Higher Education Report titles for a wide variety of critical issues facing Higher Education today.

The Triumph of Emptiness Mats Alvesson, 2013-05-30 The book views the contemporary economy as an economy of persuasion, where firms and institutions assign resources to rhetoric, image, and reputation rather than production of goods and services. It examines critically phenomena such as the knowledge society, consumption, higher education, organizational change, professionalization, and leadership.

Mastering Elliott Wave Principle Constance Brown, 2012-05-01 An innovative approach to applying Elliott Wave Principle By convention, most Elliott Wave Principle (EWP) practitioners focus on individual market price movement. Connie Brown has a global reputation of developing analysis that focuses on the integration of global markets. In a two book series you will be taken through the steps to master the global cash flows of today's financial markets. The approach found in this first book differs from the traditional view of EWP because it shows you how geometry and the use of simple boxes drawn within a trend will guide you away from the common complaint of subjectivity, thereby making smarter trades of higher probability. While EWP can be a challenging topic, the structure of this book eases you into the analysis principles. With Mastering Elliott Wave Principle

you are guided step-by-step through the learning phases of Elliott Wave analysis and then your understanding is further challenged through self-examination. The preliminary coaching unravels common misunderstandings that sabotage the beginner. You will discover how price swings and waves are not the same. Elements of balance and proportion are mathematical concepts taught through geometry and not subjective. These basic skills establish a foundation that allow beginners to understand what to expect from their level of skill. There are three distinct levels of skill that all masters of the EWP have learned. Now there is a series to guide your understanding at each skill level so you can develop a working knowledge of how to define market positions around the world in short or long term time horizons. Bring your biases, bring your past concerns and discover how this breakthrough and original approach to teaching the Wave Principle can help you. Traders, from beginners to advanced, can use this book to become proficient in the Elliott Wave Principle. Contains practice charts to compare your understanding and skill level with follow-up discussions of how you may have differed based on the results from twenty years of coaching

Rule Based Investing Chiente Hsu, 2014 Use rule-based investment strategies to maintain trading and investment discipline, and protect yourself from fear, greed, pride, and other costly emotions! Since the mid-1990s, assets under management in rule-based or non-discretionary hedge funds have outgrown those in discretionary or qualitative funds. Recent research shows that rule-based funds have outperformed discretionary funds on a risk-adjusted basis over the past 30 years, and have especially outperformed during recent financial crises. This is the first comprehensive guide to designing and applying these sophisticated strategies. Combining academic rigor and practical applications, it explains what rule-based investment strategies are, how to construct them, and how to distinguish bad ones from good ones. Unlike any other guide, it systematically covers every facet of the topic, including Forex, rates, emerging markets, equity, volatility, and other key topics. Credit Suisse head of global strategy and modeling, Chiente Hsu, covers carry, momentum, seasonality, and value-based strategies; as well as the construction of portfolios of rule-based strategies that support diversification. Replete with realistic examples, this book will be a valuable resource for everyone concerned with effective investing, from traders to specialists in applied corporate finance.

Pyrapoint Don E. Hall, 2000-01-01 I SUBMIT TO YOU THAT THE PYRAPOINT SYSTEM IS THE PRINCIPLE WHICH W.D. GANN USED. We can prove it, I feel. But if you will accept our point, we intend to spend our time with "hands-on" proof so that WE CAN LEARN THE TRUE AND FULL POTENTIAL OF THE SYSTEM. THIS IS WHY WE GO TO A SEMINAR AND WHY WE STUDY THIS MANUAL. Incidentally, we should have no copyright infringements because, to our knowledge and research, Mr. Gann never taught this in any of his seminars. I had the privilege to personally know, for some seven years, Gann's assistant, Mr. Renato Alghini. "Reno" was with Gann for six years, actually sharing close trading desks. Reno confirmed the extremely private personality of his friend, shown in most of Gann's writings and seminars. Reno passed away a few years ago. However, during the author's years of acquaintance with him, he shared a few facts that made the direction of our efforts truly appear validated. One of the confirmation factors seemed especially worthwhile in the revelation that Gann carried a small paper in hand when in the "pit" for his most successfully recorded trades. This paper, Reno related, was a miniature Pythagorean Cube. One more reason to believe that we had to unravel this mystic marvel -- and that we were on the right track for trading understanding. Mr. Gann died in 1956. It is significant to note that a favorite statement of Gann serves us well when we state that we believe that EVERY TOP AND EVERY BOTTOM in the markets have CALCULABLE counterpart -- a formula for projections and targets for both PRICE and for TIME. His quotes included that of the noted mathematician Faraday. Mr. Gann said, "If we wish to avert failure in speculation, we must deal with causes. Everything in existence is based on exact proportion and perfect relationship. There is no chance in nature, because mathematical principles of the highest order lie at the foundation of all things. Faraday said. There is nothing in the Universe but mathematical points of force.
