A New Program for Graphic Design David Reinfurt,2019-09-17 A toolkit for visual literacy in the 21st century A New Program for Graphic Design is the first communication-design textbook expressly of and for the 21st century. Three courses--Typography, Gestalt and Interface--provide the foundation of this book. Through a series of in-depth historical case studies (from Benjamin Franklin to the Macintosh computer) and assignments that progressively build in complexity, A New Program for Graphic Design serves as a practical guide both for designers and for undergraduate students coming from a range of other disciplines. Synthesizing the pragmatic with the experimental, and drawing on the work of Max Bill, György Kepes, Bruno Munari and Stewart Brand (among many others), it builds upon mid- to late-20th-century pedagogical models to convey contemporary design principles in an understandable form for students of all levels--treating graphic design as a liberal art that informs the dissemination of knowledge across all disciplines. For those seeking to understand and shape our increasingly networked world of information, this guide to visual literacy is an indispensable tool. David Reinfurt (born 1971), a graphic designer, writer and educator, reestablished the Typography Studio at Princeton University and introduced the study of graphic design. Previously, he held positions at Columbia University Graduate School of Architecture, Planning and Preservation, Rhode Island School of Design and Yale University School of Art. As a cofounder of O-R-G inc. (2000), Dexter Sinister (2006) and the Serving Library (2012), Reinfurt has been involved in several studios that have reimagined graphic design, publishing and archiving in the 21st century. He was the lead designer for the New York City MTA Metrocard vending machine interface, still in use today. His work is included in the collections of the Walker Art Center, Whitney Museum of American Art, Cooper Hewitt National Design Museum and the Museum of Modern Art. He is the co-author of Muriel Cooper (MIT Press, 2017), a book about the pioneering designer.

Design Solutions for Adaptive Hypermedia Listening Software Turel, Vehbi,2021-06-18 Adaptive hypermedia listening software enables materials writers to combine and deliver a wide range of digital elements on the same digital computer platform more efficiently. Such a combination and delivery provides a multidimensional, multi-sensory digital environment in which rich, efficient, instant, comprehensible, optimum, and meaningful input and feedback can be presented effectively and efficiently. Moreover, language learners' attention can be drawn to forms and meanings in input. Such aspects correspond with different theories and hypotheses of language learning and teaching. This presents users/learners with an environment that is easy to use, tension-free, and optimal during self-study. However, to be able to design and develop cost effective and professional adaptive hypermedia listening software, there are certain scientific educational findings and implications that need to be implemented at every single stage. To have access to such vital findings is not so easy, and research must address this area. Design Solutions for Adaptive Hypermedia Listening Software explores how to design and create technically and pedagogically sound and efficient interactive adaptive hypermedia listening software for language learners in any language. The chapters will cover learner strategy tools, the effectiveness of this technology, best practices in adaptive hypermedia listening software, and the benefits and challenges of this technology for language learning. It is ideal for companies, institutions, teachers, policymakers, academicians, researchers, advanced-level students, technology developers, and decision-making pertinent government officials interested in designing and developing multimedia listening environments for language learners.

Active Learning in the Digital Age Classroom Ann Heide,Dale Henderson,2001 This exciting new book shows you how to harness the amazing power of technology to enable and enhance active learning. Whether you are a technophobe or experienced tech user, you'll discover firsthand how information and communication technology (ICT) can help you empower learners, improve learning, and prepare students for the future. Whenever we as teachers undertake change in curriculum delivery or teaching methods, it is not a decision we make lightly. Heide and Henderson ensure that your transition is as smooth as possible and that every student will benefit. Their book addresses the many practical issues that accompany the use of ICT and provides answers to the most frequently asked questions, including: How do I get started? What equipment do I need? How can I arrange my classroom to facilitate student use? How can ICT and educational technologies make my classroom more student centered? How do I set up and control workstations? How can I individualize my program? What about assessment and evaluation? What is my role in this environment? Because the authors believe that effective classroom practices derive from carefully researched theories, they provide practical strategies based on both research and experience. These suggestions are meant to be motivators and starting points that you can adapt to your specific needs.
