The Best Interests of the Child in Healthcare Sarah Elliston, 2007-11-06 Topical and compelling, this volume provides an excellent re-evaluation of the 'best interests' test in the healthcare arena; the ways in which it has developed, the inherent difficulties in its use and its interpretation in legal cases concerning the medical care of children. Comprehensively covering both the English and Scottish position within the context of the European Convention of human Rights and the UN Convention on the Rights of the Child, the author examines a wide range of healthcare situations, from the commonly occurring to the unusual, offering a detailed analysis of legislation, case law, cases and their implications. It includes discussions on: the extent to which a child's body can be examined, operated on and affected by medicines, devices or procedures intended to bring about medical change the appropriate scope of parental choice and authority and at what stage of their development children should be allowed to make their own decisions the response to situations where the interests of children may be in conflict - the cases of conjoined twins or the donation of organs to siblings. This work is a key resource for postgraduates and researchers working and studying in the fields of law, healthcare and medicine.

**China Networks** Jens Damm, Mechthild Leutner, 2009 Networks ranging from village level to transnational level have always played a crucial role in Chinese society. The contributors to this volume aim to trace the interaction between various networks which have existed from the 19th century to the present day. The articles deal with theoretical concepts, historical examples, such as non-state responses to the North China Famine (1876 - 1879), the role of missionaries in the modernization of China and disaster management, including recent inter-ethnic business competition in Hong Kong, Han settlers in Xinjiang, temple festivals in Macau and urban migrants' social networks in today's China. By drawing on new material and theoretical frameworks, these studies shed fresh light on the ways in which various forms of networks have shaped Chinese society, while at the same time questioning traditional and rigid perspectives of Chinese society based solely on networks and guanxi.

Philosophical Medical Ethics Raanan Gillon, 1986 Philosophical medical ethics forms the basis of the codes of conduct and legal constraints involved in doctors' professional lives. This series of articles presents a British approach to the concepts, assumptions, beliefs, attitudes, and arguments underlying medico-moral decision-making in the context of medical practice. The book serves as an introduction whose aim is to encourage more rigorous analysis of the moral dilemmas confronting all physicians and to contribute to a comprehensive and coherent moral theory for medical practice.

Parental Responsibility, Young Children and Healthcare Law Jo Bridgeman, 2007-04-19 This book provides a comprehensive examination of the legal regulation of the provision of healthcare to young children in England and Wales. A critical analysis is given on the law governing the provision of healthcare to young and dependent children identifying an understanding of the child as vulnerable and in need of protection, including from his or her own parents. The argument is made for a conceptual framework of relational responsibilities which would ensure that consideration is given to the needs of the child as an individual, to the experiences of parents gained as they care for their child and that the wider context, such as attitudes towards disability, public health issues or the support and resources available, is examined. This book makes an important contribution to understanding the law regulating the provision of healthcare to young and dependent children and to the development of a discourse of responsibility.

Care in Everyday Life Marian Barnes, 2012 Care has been struggled for, resisted and celebrated. The failure to care in 'care

services' has been seen as a human rights problem and evidence of malaise in contemporary society. But care has also been implicated in the oppression of disabled people and demoted in favour of choice in health and social care services. In this bold wide ranging book Marian Barnes argues for care as an essential value in private lives and public policies. She considers the importance of care to well-being and social justice and applies insights from feminist care ethics to care work, and care within personal relationships. She also looks at 'stranger relationships', how we relate to the places in which we live, and the way in which public deliberation about social policy takes place. This book will be vital reading for all those wanting to apply relational understandings of humanity to social policy and practice.

*Health Care Law* Jonathan Montgomery, 1997 The third edition of this well established textbook provides a readable, comprehensive and accessible account of the law governing health care in England and Wales. The narrative is clear and succinct with full references to legal sources to meet the needs of law students and practitioners. The text sets out the law on public health, the NHS, the health professionals, clinical negligence litigation, patients' rights, and research and health care ethics.

*Caring and the Law* Jonathan Herring, 2014-07-18 'Caring and the Law' considers the law's response to caring. It explores how care is valued and recognised, how it is regulated and restricted and how the values of caring are reflected in the law. It does this by examining the law's interaction with caring in a wide range of fields including family, medical, welfare, criminal and tort law. At the heart of the book is the claim that the law has failed to recognise the importance of caring in many areas and in doing so has led to the costs and burdens of care falling on those who provide it, primarily women. It has also meant that the law has failed to protect those who receive care from the abuse that can take place in a caring context. The book promotes an ethic of care as providing an ethical and conceptual framework for the law to respond to caring relationships.

*Ethical Judgments* Stephen W. Smith, John Coggon, Clark Hobson, Richard Huxtable, Sheelagh McGuinness, José Miola, Mary Neal, 2017-01-12 This edited collection is designed to explore the ethical nature of judicial decision-making, particularly relating to cases in the health/medical sphere, where judges are often called upon to issue rulings on questions containing an explicit ethical component. However, judges do not receive any specific training in ethical decision-making, and often disown any place for ethics in their decision-making. Consequently, decisions made by judges do not present consistent or robust ethical theory, even when cases appear to rely on moral claims. The project explores this dichotomy by imagining a world in which decisions by judges have to be ethically as well as legally valid. Nine specific cases are reinterpreted in light of that requirement by leading academics in the fields of medical law and bioethics. Two judgments are written in each case, allowing for different views to be presented. Two commentaries - one ethical and one legal - then explore the ramifications of the ethical judgments and provide an opportunity to explore the two judgments from additional ethical and legal perspectives. These four different approaches to each judgment allow for a rich and varied critique of the decisions and ethical theories and issues at play in each case.

**First Do No Harm** Professor Sheila A M McLean, 2013-02-28 This collection brings together essays from leading figures in the field of medical law and ethics which address the key issues currently challenging scholars in the field. It has also been compiled as a lasting testimony to the work of one of the most eminent scholars in the area, Professor Ken Mason. The collection marks the academic crowning of a career which has laid one of the foundation stones of an entire discipline. The wide-ranging contents and the standing of the contributors mean that the volume will be an invaluable resource for anyone studying or working in medical law or

medical ethics.

**Health Care Law** Jean Vanessa McHale, 2007 Reflecting recent legal, professional and technological developments, this book provides a collection of materials and accompanying linking commentary that reflects the complexity of health care issues. Topics covered include the changing structure of the NHS and the expanding role of nurses.
