Repositioning Educational Leadership James H. Lytle, Susan L. Lytle, Michael C. Johaneck, Kathy J. Rho, 2018 This groundbreaking volume encourages today's educational leaders to reposition the way they think about leadership and its challenges. Experienced school and district leaders reveal how they conceptualize their roles, how they learn by posing and solving problems of practice, and how they cope with increasing expectations and complexity in their work. This compilation of compelling narratives demonstrates the power and efficacy of what can happen when school, district, and other educational leaders position themselves as inquirers, bringing forth broader social justice and equity implications. Readers see how leadership can illuminate and improve many aspects of

institutional life and create intellectually demanding and rich learning environments for both adults and children. At its heart, *Repositioning Educational Leadership* is an invitation to practitioners and scholars to make space for new critical questions and perspectives. This book nurtures an expanded discourse about leadership, generated by leaders themselves, and arising from some of the most vexing and often invisible aspects of their important work. “This book unpacks a smorgasbord of real-life work situations that will allow the reader to reflect on these experiences and extract the best practices of leadership.” —Daniel A. Domenech, executive director, AASA “Provides invaluable insights into what the complex work of leading from an inquiry stance looks like in different contexts.” —Irma Zardoya, NYC Leadership Academy “This book is a key contribution to the reinvention of the field of educational leadership, and it is crucial for preparing future leaders.” —Michael A. Copland, deputy superintendent, Bellingham (WA) Public Schools

Seven Events That Made America America Larry Schweikart, 2011-02-22 The bestselling coauthor of *A Patriot's History of the United States* examines some of the pivotal—yet mostly ignored—moments that shaped our history. Every schoolchild is taught the great turning points in American history, such as Gettysburg, Pearl Harbor, and 9/11. But other equally significant events have altered our destiny without being understood—or even widely noticed. Acclaimed conservative historian Larry Schweikart now takes an in-depth look at seven such episodes—from Martin Van Buren's creation of the first national political party to Dwight D. Eisenhower's heart attack—and reveals the profound ways they have shaped America. He also asks readers to consider what the Founding Fathers would have said about these events and reminds us how individual liberty, private enterprise, and small government have made our country great.

Invisible No More Andrea J. Ritchie, 2017-08-01 “A passionate, incisive critique of the

many ways in which women and girls of color are systematically erased or marginalized in discussions of police violence.” —Michelle Alexander, author of *The New Jim Crow*

Invisible No More is a timely examination of how Black women, Indigenous women, and women of color experience racial profiling, police brutality, and immigration enforcement. By placing the individual stories of Sandra Bland, Rekia Boyd, Dajerria Becton, Monica Jones, and Mya Hall in the broader context of the twin epidemics of police violence and mass incarceration, Andrea Ritchie documents the evolution of movements centered around women’s experiences of policing. Featuring a powerful forward by activist Angela Davis, *Invisible No More* is an essential exposé on police violence against WOC that demands a radical rethinking of our visions of safety—and the means we devote to achieving it.

A grammar of Yakkha Diana Schackow, 2015-10-12 This grammar provides the first comprehensive grammatical description of Yakkha, a Sino-Tibetan language of the Kiranti branch. Yakkha is spoken by about 14,000 speakers in eastern Nepal, in the Sankhuwa Sabha and Dhankuta districts. The grammar is based on original fieldwork in the Yakkha community. Its primary source of data is a corpus of 13,000 clauses from narratives and naturally-occurring social interaction which the author recorded and transcribed between 2009 and 2012. Corpus analyses were complemented by targeted elicitation. The grammar is written in a functional-typological framework. It focusses on morphosyntactic and semantic issues, as these present highly complex and comparatively under-researched fields in Kiranti languages. The sequence of the chapters follows the well-established order of phonological, morphological, syntactic and discourse-structural descriptions.

These are supplemented by a historical and sociolinguistic introduction as well as an analysis of the complex kinship terminology. Topics such as verbal person marking, argument structure, transitivity, complex predication, grammatical relations, clause linkage, nominalization, and the topography-based orientation system have received in-depth treatment. Wherever possible, the structures found were explained in a historical-comparative perspective in order to shed more light on how their particular properties have emerged.
