**News Discourse and Digital Currents** Antonio Fruttaldo, 2017-05-11 In recent years, journalistic practices have undergone a radical change due to the increasing pressure of new digital media on the professional practice. The ever-growing development of new technologies and the ceaseless fluctuation of social practices have challenged some of the traditional genres found in these professional contexts. On the basis of these premises, this book investigates a particular genre found in the context of TV newscasts. The genre under investigation is that of news tickers (or crawlers), that is, the graphic elements that scroll at the bottom of the screen during newscasts. The book introduces readers to this under-researched genre through a year-long collection of the news tickers displayed on BBC World News. Thanks to a corpus-based genre analysis, the generic status of news tickers is better defined by highlighting the presence of given strategies of marketization. Additionally, this volume investigates if news tickers can be seen as a mixed (sub-)genre that interdiscursively combines traditional linguistic elements of headlines and lead paragraphs to achieve, from a (Critical) Genre Analysis point of view, a specific private intention in the context of the BBC.

*Relevance and Text-on-Screen in Audiovisual Translation* Ryoko Sasamoto, 2024-05-29 This book examines audiovisual translation (AVT) practices that fall outside conventional AVT norms, drawing on work from

relevance theory to highlight alternative perspectives and make the case for a multidisciplinary approach to AVT. The volume focuses on creative subtitling – otherwise known as 'text-on-screen' – through the lens of relevance theory, a cognitively grounded theory of communication. Sasamoto explores the ways in which a relevance theoretic approach can provide an analytical framework for a better understanding of the interaction between 'text-on-screen' and viewers' interpretation processes and, in turn, how media producers, professional or otherwise, use 'text-on-screen' to engage viewers in innovative ways. The volume looks at such forms as telop, creative text use on screen, and forms of user-generated text-on-screen. The book introduces a new dimension to work on cognitive pragmatics and the wider applications of relevance theory in multimodal communication and AVT, making it of interest to scholars in these disciplines.

Handbook of Asian Finance David LEE Kuo Chuen, Greg N. Gregoriou, 2014-05-12  
Asia's miraculous recovery from the 1997 crisis ushered in unexpected transformations to its economies and financial sectors. The Handbook of Asian Finance covers the most interesting issues raised by these growth rates. From real estate prices and the effects of trading technologies for practitioners to tax evasion, market manipulation, and corporate governance issues, expert scholars analyze the ways that the region is

performing. Offering broader and deeper coverage than other handbooks, the Handbook of Asian Finance explains what is going on in Asia today. Devotes significant attention to the systematic risk created by banks' exposure to links between real estate and other sectors Explores the implications implicit in the expansion of sovereign funds and the growth of the hedge fund and real estate fund management industries Investigates the innovations in technology that have ushered in faster capital flow and larger trading volumes

*Multiliteracies* Eugene F. Provenzo, Amanda Goodwin, Miriam Lipsky, Sheree Sharpe, 2011-11-01 *Multiliteracies: Beyond Text and the Written Word* emphasizes literacies which are, or have been, common in American culture, but which tend to be ignored in more traditional discussions of literacy—specifically textual literacy. By describing multiliteracies or alternative literacies, and how they function, we have tried to develop a broader understanding of what it means to be literate in American culture. The 39 topical essays/chapters included in this work represent a sampler of both old and new literacies that are clearly at work in American culture, and which go beyond more traditional textual forms and models. *Multiliteracies: Beyond Text and the Written Word* asks: How is the experience of students changing outside of traditional schools, and how do these changes potentially shape the work they do, how they learn, and the lives they lead in schools and less formal settings? This work assumes that our increasing diversity in

a postmodern and increasingly global society brings with it demands for a broader understanding of what it means to be literate. Multiliteracy “literally” becomes a necessity. This work is a guidebook to the new reality, which is increasingly so important to schools and the more general culture.

**Cultures of Expertise in Global Currency Markets** Leon Wansleben, 2013-07-18

Notwithstanding financial crises, global foreign exchange markets have undergone a tremendous growth during the last two decades. Foreign exchange (FX) is often thought of as a site where economic actors exchange currencies for buying foreign goods or selling goods in foreign countries, but the FX markets are better understood as financial spheres, dominated by speculative actors. A key question is how this huge global speculative sphere has developed, and what maintains it. Thus far, global currency markets have been largely neglected by the new approaches to finance, and until now no study has existed to chart the interplay of their structural evolution and their shape as knowledge spheres. This new book offers a systematic study of FX markets from a knowledge sociological perspective, empirically focussing on analysts within these markets. It makes the argument that market structures are reflected in, and become stabilised by, distinct cultures of financial expertise. These cultures connect the actions and perceptions of loosely coupled, globally distributed market players, and establish shared sets of strategies of how to observe, value and invest. This highly original book will be of interest to scholars of economics, sociology and political science, and in particular to all those with an interest in the sociology of finance and the role of finance in the contemporary world.

**Old Europe, New Europe and the US** Blagovest Tashev,Professor Tom

Lansford,2013-02-28 Iraq can be considered the 'perfect storm' which brought out the stark differences between the US and Europe. The disagreement over the role of the United Nations continues and the bitterness in the United States against its betrayal by allies like France is not diminishing. Meanwhile, the standing of the United States among the European public has plummeted. Within Europe, political tensions between what US Secretary of Defense Donald Rumsfeld euphemistically called the 'Old' Europe and the 'New' Europe continue to divide. To fully comprehend these rifts, this volume takes a specific look at the core security priorities of each European state and whether these interests are best served through closer security collaboration with the US or with emerging European structures such as the European Rapid Reaction Force. It analyzes the contribution each state would make to transatlantic security, the role they envisage for existing security structures such as NATO, and the role the US would play in transatlantic security.

*Professional Ajax* Nicholas C. Zakas,Jeremy McPeak,Joe Fawcett,2011-08-15

Professional Ajax 2nd Edition provides a developer-level tutorial of Ajax

techniques, patterns, and use cases. The book begins by exploring the roots of Ajax, covering how the evolution of the web and new technologies directly led to the development of Ajax techniques. A detailed discussion of how frames, JavaScript, cookies, XML, and XMLHttpRequests (XHR) related to Ajax is included. After this introduction, the book moves on to cover the implementation of specific Ajax techniques. Request brokers such as hidden frames, dynamic iframes, and XHR are compared and contrasted, explaining when one method should be used over another. To make this discussion clearer, a brief overview of HTTP requests and responses is included. Once a basic understanding of the various request types is discussed, the book moves on to provide in-depth examples of how and when to use Ajax in a web site or web application. Different data transmission formats, including plain text, HTML, XML, and JSON are discussed for their advantages and disadvantages. Also included is a discussion on web services and how they may be used to perform Ajax techniques. Next, more complex topics are covered. A chapter introducing a request management framework explores how to manage all of the requests inside of an Ajax application. Ajax debugging techniques are also discussed. Professional Ajax 2nd edition is written for Web application developers looking to enhance the usability of their web sites and web applications and intermediate JavaScript developers looking to further understand the language. Readers should have familiarity with XML, XSLT, Web Services, PHP or C#, HTML, CSS. Professional Ajax 2nd edition adds nearly 200 pages of new

and expanded coverage compared to the first edition.

**Spectacular Speculation** Urs Stäheli,2013-02-20 Spectacular Speculation is a history and sociological analysis of the semantics of speculation from 1870 to 1930, when speculation began to assume enormous importance in popular culture. Informed by the work of Luhmann, Foucault, Simmel and Deleuze, it looks at how speculation was translated into popular knowledge and charts the discursive struggles of making speculation a legitimate economic practice. Noting that the vocabulary available to discuss the concept was not properly economic, the book reveals the underside of putting it into words. Speculation's success depended upon non-economic language and morally questionable thrills: a proximity to the wasteful practice of gambling or other degenerate behaviors, the experience of financial markets as seductive, or out of control. American discourses of speculation take center stage, and the book covers an unusual range of material, including stock exchange guidebooks, ticker tape, moral treatises, plays, advertisements, and newspapers.
