Save This Land Nachiketa Das,2021-04-17 Save This Land

discusses some topical issues of the environment. In each of the six chapters, a topic is chosen, the problem is analysed, the dangers are described and the solutions are presented with an appeal to all for proaction to save this land. The imminent desertification caused by deforestation of land, amply served by the monsoon, must be averted by the construction of hundreds of thousands of micro-dams. The threat of sea level rise needs to be combated by undertaking a massive project of Coastal Works. The Ganga could remain perennial only with significant reforestation and strengthening of lateral and terminal moraines in the Himalaya. “When rivers die, civilisations die,” and this land faces an existential crisis because of the rivers choked to death by a vast deposition of sediments that need to be excavated for their revival. The Hirakud Dam on the Mahanadi must be revived too. Bodies of good clean drinking water are the heritage of humanity and they are getting polluted. The water quality is paramount and must be maintained.

Democratizing Innovation Eric Von Hippel,2006-02-17 The

process of user-centered innovation: how it can benefit both users and manufacturers and how its emergence will bring changes in business models and in public policy. Innovation is rapidly becoming democratized. Users, aided by improvements in computer and communications technology, increasingly can develop their own new products and services. These innovating users—both individuals and firms—often freely share their innovations with others, creating user-

innovation communities and a rich intellectual commons. In *Democratizing Innovation*, Eric von Hippel looks closely at this emerging system of user-centered innovation. He explains why and when users find it profitable to develop new products and services for themselves, and why it often pays users to reveal their innovations freely for the use of all. The trend toward democratized innovation can be seen in software and information products—most notably in the free and open-source software movement—but also in physical products. Von Hippel's many examples of user innovation in action range from surgical equipment to surfboards to software security features. He shows that product and service development is concentrated among lead users, who are ahead on marketplace trends and whose innovations are often commercially attractive. Von Hippel argues that manufacturers should redesign their innovation processes and that they should systematically seek out innovations developed by users. He points to businesses—the custom semiconductor industry is one example—that have learned to assist user-innovators by providing them with toolkits for developing new products. User innovation has a positive impact on social welfare, and von Hippel proposes that government policies, including R&D subsidies and tax credits, should be realigned to eliminate biases against it. The goal of a democratized user-centered innovation system, says von Hippel, is well worth striving for. An electronic version of this book is available under a Creative Commons license.

Wilderness Ethics: Preserving the Spirit of Wildness Guy

Waterman, Laura Waterman, 2014-09-15 The classic environmental call to action 2014 marks the 50th anniversary of the passing of the Wilderness Act—the landmark piece of legislation to set aside and protect pristine parts of the American landscape. This anniversary

edition of Wilderness Ethics should help put the many issues surrounding wilderness in focus.

Converging Technologies for Improving Human Performance

Mihail C. Roco, William Sims Bainbridge, 2013-04-17 M. C. Roco and W.S. Bainbridge In the early decades of the 21st century, concentrated efforts can unify science based on the unity of nature, thereby advancing the combination of nanotechnology, biotechnology, information technology, and new technologies based in cognitive science. With proper attention to ethical issues and societal needs, converging in human abilities, societal technologies could achieve a tremendous improvement outcomes, the nation's productivity, and the quality of life. This is a broad, cross cutting, emerging and timely opportunity of interest to individuals, society and humanity in the long term. The phrase convergent technologies refers to the synergistic combination of four major NBIC (nano-bio-info-cogno) provinces of science and technology, each of which is currently progressing at a rapid rate: (a) nanoscience and nanotechnology; (b) biotechnology and biomedicine, including genetic engineering; (c) information technology, including advanced computing and communications; (d) cognitive science, including cognitive neuroscience. Timely and Broad Opportunity. Convergence of diverse technologies is based on material unity at the nanoscale and on technology integration from that scale.

Good Economics for Hard Times Abhijit V. Banerjee, Esther

Duflo,2019-11-12 The winners of the Nobel Prize show how economics, when done right, can help us solve the thorniest social and political problems of our day. Figuring out how to deal with today's critical economic problems is perhaps the great challenge of our time. Much greater than space travel or perhaps even the next revolutionary medical breakthrough, what is at stake is the whole idea of the good life as we have known it. Immigration and inequality, globalization and technological disruption, slowing growth and accelerating climate change--these are sources of great anxiety across the world, from New Delhi and Dakar to Paris and Washington, DC. The resources to address these challenges are there--what we lack are ideas that will help us jump the wall of disagreement and distrust that divides us. If we succeed, history will remember our era with gratitude; if we fail, the potential losses are incalculable. In this revolutionary book, renowned MIT economists Abhijit V. Banerjee and Esther Duflo take on this challenge, building on cutting-edge research in economics explained with lucidity and grace. Original, provocative, and urgent, *Good Economics for Hard Times* makes a persuasive case for an intelligent interventionism and a society built on compassion and respect. It is an extraordinary achievement, one that shines a light to help us appreciate and understand our precariously balanced world.

The Sticking Point Solution Jay Abraham,2010-06 Businesses can plateau, stall, OR stagnate without the owners or key executives even realizing it. A business might be achieving incremental year-on-year growth and yet still be in a situation of stagnation or stall. Why?

China's Influence and American Interests Larry Diamond, Orville Schell, 2019-08-01 While Americans are generally aware of China's ambitions as a global economic and military superpower, few understand just how deeply and assertively that country has already sought to influence American society. As the authors of this volume write, it is time for a wake-up call. In documenting the extent of Beijing's expanding influence operations inside the United States, they aim to raise awareness of China's efforts to penetrate and sway a range of American institutions: state and local governments, academic institutions, think tanks, media, and businesses. And they highlight other aspects of the propagandistic "discourse war" waged by the Chinese government and Communist Party leaders that are less expected and more alarming, such as their view of Chinese Americans as members of a worldwide Chinese diaspora that owes undefined allegiance to the so-called Motherland. Featuring ideas and policy proposals from leading China specialists, *China's Influence and American Interests* argues that a successful future relationship requires a rebalancing toward greater transparency, reciprocity, and fairness. Throughout, the authors also strongly state the importance of avoiding casting aspersions on Chinese and on Chinese Americans, who constitute a vital portion of American society. But if the United States is to fare well in this increasingly adversarial relationship with China, Americans must have a far better sense of that country's ambitions and methods than they do now.

The Ethics Challenge in Public Service Carol W. Lewis, Stuart C. Gilman, 2005-03-11 Since it was first published in 1991, *The Ethics Challenge in Public Service* has become a classic text used by public managers and in public management programs across the country. This second edition is filled with practical tools and techniques for making ethical choices in the ambiguous, pressured world of public service. It explores the day-to-day ethical dilemmas managers face in their work, including what to do when rules recommend one action and compassion another, and whether it is ethical to dissent from agency policy. This essential text explores managers' accountability to different stakeholders and how to balance the often competing responsibilities.

Reality In Advertising Rosser Reeves, 2017-06-09 Rarely has a book about advertising created such a commotion as this brilliant account of the principles of successful advertising. Published in 1961, *Reality in Advertising* was listed for weeks on the general best-seller

lists, and is today acknowledged to be advertising's greatest classic. It has been translated into twelve languages and has been published in twenty-one separate editions in fifteen countries. Leading business executives, and the advertising cognoscenti, hail it as the best book for professionals that has ever come out of Madison Avenue. Rosser Reeves says: The book attempts to formulate certain theories of advertising, many quite new, and all based on 30 years of intensive research. These theories, whose value has been proved in the marketplace, all revolve around the central concept that success in selling a product is the key criterion of advertising. Get Your Copy Now

Blackshirts and Reds Michael Parenti, 2020-09-09 A bold and entertaining exploration of the epic struggles of yesterday and today. *Blackshirts & Reds* explores some of the big issues of our time: fascism, capitalism, communism, revolution, democracy, and ecology. These terms are often bandied about, but seldom explored in the original and exciting way that has become Michael Parenti's trademark. Parenti shows how rational fascism renders service to capitalism, how corporate power undermines democracy, and how revolutions are a mass empowerment against the forces of exploitative privilege. He also maps out the external and internal forces that destroyed communism, and the disastrous impact of the free-market victory on eastern Europe and the former Soviet Union. He affirms the relevance of taboo ideologies like Marxism, demonstrating the importance of class analysis in understanding political realities and dealing with the ongoing collision between ecology and global corporatism. Written with lucid and compelling style, this book goes beyond truncated modes of thought, inviting us to entertain iconoclastic views, and to ask why things are as they are. A penetrating and persuasive writer

with an astonishing array of documentation to implement his attacks. —The Catholic Journalist By portraying the struggle between fascism and Communism in this century as a single conflict, and not a series of discrete encounters, between the insatiable need for new capital on the one hand and the survival of a system under siege on the other, Parenti defines fascism as the weapon of capitalism, not simply an extreme form of it. Fascism is not an aberration, he points out, but a 'rational' and integral component of the system.—Stan Goff, author of Full Spectrum Disorder: The Military in the New American Century Michael Parenti, PhD Yale, is an internationally known author and lecturer. He is one of the nation's leading progressive political analysts. Author of over 275 published articles and twenty books, his writings are published in popular periodicals, scholarly journals, and his op-ed pieces have been in leading newspapers such as The New York Times and The Los Angeles Times. His informative and entertaining books and talks have reached a wide range of audiences in North America and abroad.
