Ron Dakron's novel Newt delves into incest, racism, ecstatic art and the true evil of the color aqua. Using techniques of cubism and parallel time, Newt evokes doomed love through a terse, poetic prose.

Newts and Salamanders of Europe Richard A. Griffiths,1996 Nearly thirty years after the publication of the last detailed book on the newts and salamanders of Europe, this book at last provides a much needed, modern coverage of the ecology, behavior, evolution, and conservation of these fascinating amphibians. The author abandons the popular conception of amphibians as a primitive group poorly adapted to life on land. Indeed, he shows how the diversity of newt and salamanders life-styles underlines how this relatively small group of animals have survived in such diverse habitats as underground caves, mountain tops, tropical forests, and the Siberian tundra. Delightfully illustrated and fully referenced throughout, the book synthesizes much recent research into a lively and readable format that will be of interest to both experienced and inexperienced herpetologists and natural historians. Given recent concern over global amphibian declines, newts and salamanders have been the focus of considerable media attention and scientific work in recent years. This book describes how an understanding of the ecology and habitat requirements of these animals can lead to more effective conservation measures. Key Features: * Presents the first synthesis of research for nearly 30 years * Reviews current conservation issues * Provides up-to-date species accounts and color photos * Includes a user-friendly guide to the relationships between different species and subspecies
