Social Life Of The Chinese Justus Doolittle, 2018-10-24 First Published in 2005. This is the most complete and detailed account of the traditional domestic and daily life of the Chinese in the mid-nineteenth century. Writing in the 1860's, Doolittle concentrates on social and religious customs, revealing the people through their practices and material culture which he observed for over fourteen years. Colourful, exotic and compelling, this is a more telling portrait than any history or encyclopedia, an innovative tour de force of popular culture, and a classic ahead of its time. Doolittle lived midway between

Shanghai and Canton, the origin of the overseas Chinese diaspora. The world he describes here may have vanished in mainland China, but endures in Chinatowns and Chinese homes around the world.

An English and Cantonese Pocket-dictionary John Chalmers, 1862

Chinese and Indo-European Roots and Analogues Pliny Earle Chase, 2020-11-11

The Evolution of the Chinese Language Joseph Edkins, 2015-06-30 Excerpt from *The Evolution of the Chinese Language: As Exemplifying the Origin and Growth of Human Speech* China is separated by the ocean, by deserts, and by mountain chains from all nations possessed of original literatures, and her language is more isolated than any other form of human speech studied by philologists. While Chinese has been brought to a high degree of excellence by a people devoted to literary pursuits, it remains possessed of a primitive order of words, and a monosyllabic structure. These peculiarities give it a claim to be a direct descendant of the mother tongue of humanity, but it is not itself that mother tongue. Nor, so far as can be seen, is any other language having a wide area, whether near or far away, a descendant of the Chinese. Further, it may be said that there is no other language, or family of language, which can be more reasonably assumed to be the speech first used in the world's grey morning than can the Chinese. None has proceeded on its course more naturally and gradually, or suffered less by violent inversions in the arrangement of roots. Hence, Chinese is regarded in this essay as the equivalent of the primeval language, and is treated as forming with that language, as seen through a long perspective, a consolidated unity.
