Transdisciplinary Lifecycle Analysis of Systems R. Curran, N. Wognum, M. Borsato, 2015-07-15 Concurrent Engineering (CE) is based on the premise that different phases of a product's lifecycle should be conducted concurrently and initiated as early as possible within the Product Creation Process (PCP). It has become the substantive basic methodology in many industries, including automotive, aerospace, machinery, shipbuilding, consumer goods, process industry and environmental engineering. CE aims to increase the efficiency of the PCP and reduce errors in later phases while incorporating considerations for full lifecycle and through-life operations. This book presents the proceedings of the 22nd ISPE Inc. (International Society for Productivity Enhancement) International Conference on Concurrent Engineering (CE2015) entitled 'Transdisciplinary Lifecycle Analysis of Systems', and held in Delft, the Netherlands, in July 2015. It is the second in the series 'Advances in Transdisciplinary Engineering'. The book includes 63 peer reviewed papers and 2 keynote speeches arranged in 10 sections: keynote speeches; systems engineering; customization and variability management; production oriented design, maintenance and repair; design methods and knowledge-based engineering; multidisciplinary product management; sustainable product development; service oriented design; product lifecycle management; and trends in CE. Containing papers ranging from the theoretical and conceptual to the highly pragmatic, this book will be of interest to all engineering professionals and practitioners; researchers, designers and educators.

Passive Macromodeling Stefano Grivet-Talocia, Bjorn Gustavsen, 2015-12-07 Offers an overview of state of the art passive macromodeling techniques with an emphasis on black-box approaches This book offers coverage of developments in linear macromodeling, with a focus on effective, proven methods. After starting with a definition of the fundamental properties that must characterize models of physical systems, the authors discuss several prominent passive macromodeling algorithms for lumped and distributed systems and compare them under accuracy, efficiency, and robustness standpoints. The book includes chapters with standard background material (such as linear time-invariant circuits and systems, basic discretization of field equations, state-space systems), as well as appendices collecting basic facts from linear algebra, optimization templates, and signals and transforms. The text also covers more technical and advanced topics, intended for the specialist, which may be skipped at first reading. Provides coverage of black-box passive macromodeling, an approach developed by the authors Elaborates on main concepts and results in a mathematically precise way using easy-to-understand language Illustrates macromodeling concepts through dedicated examples Includes a comprehensive set of end-of-chapter problems and exercises Passive Macromodeling: Theory and Applications serves as a reference for senior or graduate level courses in electrical engineering programs, and to engineers in the fields of numerical modeling, simulation, design, and optimization of electrical/electronic systems. Stefano Grivet-Talocia, PhD, is an Associate Professor of Circuit Theory at the Politecnico di Torino in Turin, Italy, and President of IdemWorks. Dr. Grivet-Talocia is author of over 150 technical papers published in international journals and conference proceedings. He invented several algorithms in the area of passive macromodeling, making them available through IdemWorks. Bjørn Gustavsen, PhD, is a Chief Research Scientist in Energy Systems at SINTEF Energy Research in Trondheim, Norway. More than ten years ago, Dr. Gustavsen developed the original version of the vector fitting method with Prof. Semlyen at the University of Toronto. The vector fitting method is one of the most widespread approaches for model extraction.

Dr. Gustavsen is also an IEEE fellow.

Hellenomania Katherine Harloe, Nicoletta Momigliano, Alexandre Farnoux, 2018-01-29 *Hellenomania*, the second volume in the MANIA series, presents a wide-ranging, multi-disciplinary exploration of the modern reception of ancient Greek material culture in cultural practices ranging from literature to architecture, stage and costume design, painting, sculpture, cinema, and the performing arts. It examines both canonical and less familiar responses to both real and imagined Greek antiquities from the seventeenth century to the present, across various national contexts. Encompassing examples from Inigo Jones to the contemporary art exhibition *documenta 14*, and from Thessaloniki and Delphi to Nashville, the contributions examine attempted reconstructions of an 'authentic' ancient Greece alongside imaginative and utopian efforts to revive the Greek spirit using modern technologies, new media, and experimental practices of the body. Also explored are the political resonances of Hellenomaniac fascinations, and tensions within them between the ideal and the real, the past, present, and future. Part I examines the sources and derivations of Hellenomania from the Baroque and pre-Romantic periods to the early twentieth century. While covering more canonical material than the following sections, it also casts spotlights on less familiar figures and sets the scene for the illustrations of successive waves of Hellenomania explored in subsequent chapters. Part II focuses on responses, uses, and appropriations of ancient Greek material culture in the built environment—mostly architecture—but also extends to painting and even gymnastics; it examines in particular how a certain idealisation of ancient Greek architecture affected its modern applications. Part III explores challenges to the idealisation of ancient Greece, through the transformative power of colour, movement, and of reliving the past in the present human body, especially female. Part IV looks at how the fascination with the material culture of ancient Greece can move beyond the obsession with Greece and Greekness.

Archaeological Ethnographies Yannis Hamilakis, Aris Anagnostopoulos, 2009 This volume charts archaeological ethnography as a new territory of engagement and research. Archaeological Ethnography is defined here as a trans-disciplinary and trans-cultural space, a meeting ground for diverse publics and researchers, in archaeology, social anthropology, and potentially other disciplines practices and traditions. It is a space that encourages and fosters dialogue, collaboration and critique on materiality and temporality, on archaeology as a social practice in the present, on the links, interactions and associations amongst things and people, on local and trans-local valorisations of past material remains. Bringing together the most notable practitioners of this new area from archaeology and social anthropology, and building on a wide range of case studies from England, Greece, Italy, Kyrgyzstan, Mexico, Thailand, and the United States, the volume explores issues of definition and ontology, epistemology and method, but also ethics and politics. This dialogic book will inspire readers to shape their own view and position on this emerging field, and experiment with their own archaeological ethnographies.

Cretomania Alexandre Farnoux, 2017-07-05 Since its rediscovery in the early 20th century, through spectacular finds such as those by Sir Arthur Evans at Knossos, Minoan Crete has captured the imagination not only of archaeologists but also of a wider public. This is shown, among other things, by its appearance and uses in a variety of modern cultural practices: from the innovative dances of Sergei Diaghilev and Ted Shawn, to public and vernacular architecture, psychoanalysis, literature, sculpture, fashion designs, and even neo-pagan movements, to mention a few examples. *Cretomania* is the first volume entirely devoted to such modern responses to (and uses of) the Minoan past. Although not an exhaustive and systematic study of the reception of Minoan Crete, it offers a wide range of intriguing examples and represents an original contribution to a thus far underexplored aspect of Minoan studies: the remarkable effects of Minoan Crete beyond the narrow boundaries of recondite archaeological

research. The volume is organised in three main sections: the first deals with the conscious, unconscious, and coincidental allusions to Minoan Crete in modern architecture, and also discusses archaeological reconstructions; the second presents examples from the visual and performing arts (as well as other cultural practices) illustrating how Minoan Crete has been enlisted to explore and challenge questions of Orientalism, religion, sexuality, and gender relations; the third focuses on literature, and shows how the distant Minoan past has been used to interrogate critically more recent Greek history.

The Antiquities of Athens James Stuart, Nicholas Revett,

A Passionate Apprentice Virginia Woolf, 2018-07-19 A Passionate Apprentice comprises the first years of Virginia Woolf's Journal - from 1879 to 1909. Beginning in early January, when Woolf was almost fifteen, the pages open at a time when she was slowly recovering from a period of madness following her mother's death in May 1895. Between this January and the autumn of 1904, Woolf would suffer the deaths of her half-sister and of her father, and survive a summer of madness and suicidal depression. Behind the loss and confusion, however, and always near the surface of her writing is a constructive force at work - a powerful impulse towards health. It was an urge, through writing, to bring order and continuity out of chaos. Putting things into words and giving them deliberate expression had the effect of restoring reality to much that might otherwise have remained insubstantial. This early chronicle represents the beginning of the future Virginia Woolf's apprenticeship as a novelist. These pages show that rare instance when a writer of great importance leaves behind not only the actual documents of an apprenticeship, but also a biographical record of that momentous period as well. In Woolf's words, 'Here is a volume of fairly acute life (the first really lived year of my life).'

Moving Integrated Product Development to Service Clouds in the Global Economy IOS Press, 2014-09-23 The theory of concurrent engineering is based on the concept that the different phases of a product lifecycle should be conducted concurrently and initiated as early as possible within the product creation process. Concurrent engineering is important in many industries, including automotive, aerospace, shipbuilding, consumer goods and environmental engineering, as well as in the development of new services and service support. This book presents the proceedings of the 21st ISPE Inc. International Conference on Concurrent Engineering, held at Beijing Jiaotong University, China, in September 2014. It is the first volume of a new book series: 'Advances in Transdisciplinary Engineering'. The title of the CE2014 conference is: 'Moving Integrated Product Development to Service Clouds in the Global Economy', which reflects the variety of processes and methods which influence modern product creation. After an initial first section presenting the keynote papers, the remainder of the book is divided into 11 further sections with peer-reviewed papers: product lifecycle management (PLM); knowledge-based engineering (KBE); cloud approaches; 3-D printing applications; design methods; educational methods and achievements; simulation of complex systems; systems engineering; services as innovation and science; sustainability; and recent research on open innovation in concurrent engineering. The book will be of interest to CE researchers, practitioners from industry and public bodies, and educators alike.

Concurrent Engineering in the 21st Century Josip Stjepandić, Nel Wognum, Wim J.C. Verhagen, 2015-01-30 Presenting the gradual evolution of the concept of Concurrent Engineering (CE), and the technical, social methods and tools that have been developed, including the many theoretical and practical challenges that still exist, this book

serves to summarize the achievements and current challenges of CE and will give readers a comprehensive picture of CE as researched and practiced in different regions of the world. Featuring in-depth analysis of complex real-life applications and experiences, this book demonstrates that Concurrent Engineering is used widely in many industries and that the same basic engineering principles can also be applied to new, emerging fields like sustainable mobility. Designed to serve as a valuable reference to industry experts, managers, students, researchers, and software developers, this book is intended to serve as both an introduction to development and as an analysis of the novel approaches and techniques of CE, as well as being a compact reference for more experienced readers.

Product Lifecycle Management (Volume 1) John Stark, 2015-04-10 This third edition updates and adds to the successful second edition and gives the reader a thorough description of PLM, providing them with a full understanding of the theory and the practical skills to implement PLM within their own business environment. This new and expanded edition is fully updated to reflect the many technological and management advances made in PLM since the release of the second edition. Describing the environment in which products are developed, manufactured and supported, before addressing the Five Pillars of PLM: business processes, product data, PLM applications, Organisational Change Management (OCM) and Project Management, this book explains what Product Lifecycle Management is, and why it's needed. The final part of the book addresses the PLM timeline, showing the typical steps and activities of a PLM project or initiative. "Product Lifecycle Management" will broaden the reader's understanding of PLM, nurturing the skills needed to implement PLM successfully and to achieve world-class product performance across the lifecycle.

Guide to Application Whitelisting National Institute of Standards and Technology, 2015-10-30 NIST SP 800-167 An application whitelist is a list of applications and application components that are authorized for use in an organization. Application whitelisting technologies use whitelists to control which applications are permitted to execute on a host. This helps to stop the execution of malware, unlicensed software, and other unauthorized software. This publication is intended to assist organizations in understanding the basics of application whitelisting. It also explains planning and implementation for whitelisting technologies throughout the security deployment lifecycle. Why buy a book you can download for free? Parallel Algorithms and Architectures Andreas Albrecht, Hermann Jung, Kurt Mehlhorn, 1987

The Archaeology of Politics Andrew M. Bauer, Peter G. Johanson, 2011-05-25 The Archaeology of Politics is a

collection of essays that examines political action and practice in the past through studies and analyses of material culture from the perspective of anthropological archaeology. Contributors to this volume explore a variety of multi-scalar relationships between past peoples, places, objects and environments. At stake in this volume is what it is that constitutes politics, its social and cultural location, fields of analysis, its materiality and sociology and especially its position and possibilities as a conceptual and analytical category in archaeological investigations of past socio-cultural worlds. Our primary goals are twofold: the problematization and re-conceptualization of politics from its understanding as a reified essence or structure of political forms (e.g., a State) to a fluid, dynamic and culturally inflected set of practices; and, second, to consider politics' entanglement with the materiality of socio-cultural worlds at multiple-scales through the demonstration of innovative analytical approaches to the material record. The volume is a tightly integrated group of essays exploring an assortment of case studies that offer new theoretical insight to archaeological and historical analyses of politics.

The Impact of the United Nations Human Rights Treaties on the Domestic Level Christof Heyns, Frans Viljoen, 2021-08-04 The six main United Nations human rights treaties enjoy almost universal ratification today. Almost 80 per cent of the possible ratifications have been made, and every Member State of the UN has ratified at least one of these treaties. The nearly universal acceptance of the treaties on the formal level, however, does not automatically translate into the norms contained in these documents being made a reality in the lives of the billions of people living in these countries. The treaty system is notoriously weak in terms of international enforcement, and there is a general suspicion that it has had little impact at the domestic level. Mechanisms to improve the international enforcement mechanisms of the six main treaties have been a topic of discussion and research for many years, but the domestic impact of the treaties has never been investigated in a systematic and comprehensive manner. This book constitutes the most ambitious attempt so far to establish the impact of the treaties at the domestic level. The following treaties in 20 United Nations Member States are investigated: the Convention on the Elimination of All Forms of Racial Discrimination, the Covenant on Economic, Social, and Cultural Rights, the Covenant on Civil and Political Rights, the Convention on the Elimination of All Forms of Discrimination Against Women, the Convention Against Torture, and the Convention on the Rights of the Child. This book reflects the findings of 20 researchers, based in the countries investigated, under the leadership of Professors Christof Heyns and Frans Viljoen of the Centre for Human Rights, University of Pretoria, in a study done in co-operation with the United Nations High Commissioner for Human Rights. The influence of the treaties in each of the 20 countries is investigated in respect of its influence on the continuation, legislation, court cases, policies and practices, and the impact of the treaty system in civil society. In an overview chapter by the study leaders based on a comparison of the available data, common trends and patterns are identified, and recommendations about reforms on the national and international level are made. This is a book that should be read by all those interested in the development of the international human rights system.

Memory, Narrative and Forgiveness Pumla Gobodo-Madikizela, Chris N van der Merwe, 2009-03-26 The United Nations' declaration of 2009 as the International Year of Reconciliation is testimony to the growing use of historical commissions as instruments of reconciliation in post-conflict societies. Since the South African Truth and Reconciliation Commission (TRC) has had a profound impact on international efforts to deal with the aftermath of mass violence and societal conflict, this is an appropriate time for scholars to debate and reflect on the work of the TRC and the wide-ranging scholarship it has inspired across disciplines. With a foreword by Harvard Law

Professor Martha Minow, *Memory, Narrative, and Forgiveness: Perspectives on the Unfinished Journeys of the Past* offers readers a front-row seat where a team of scholars draw on both theoretical analysis and case studies from around the world to explore the themes of memory, narrative, forgiveness and apology, and how these themes often interact in either mutually supportive or unsettling ways. The book is a vibrant discussion by scholars in philosophy, psychology, psychoanalytic theory, history, literary theory, and Holocaust studies. The authors explore the complex, interconnected issues of trauma and narrative (testimonial and literary narrative and theatre as narrative), mourning and the potential of forgiveness to heal the enduring effects of mass trauma, and transgenerational trauma-memory as a basis for dialogue and reconciliation in divided societies. The authors go well beyond the South African TRC and address a wide range of historical events to explore the possibilities and the challenges that lie on the path of reconciliation and forgiveness between victims, perpetrators, and bystanders in societies with a history of violent conflict and unspeakable injustice. The book provides readers with a cohesive, theoretically well-grounded analysis of the impact of traumatic memories in the personal and communal lives of survivors of trauma. It explores how narrative may be creatively applied in processes of healing trauma, and how public testimony can often restore the moral balance of societies ravaged by trauma. The book deepens understanding of the ways in which lessons from the TRC might be developed and both usefully and cautiously applied in other post-conflict situations.
