Michel Ferrari, Andrew Charles, David Dodick, Fumihiko
Sakai, Joost Haan

Oxford Textbook of Headache Syndromes Michel Ferrari, Andrew Charles, David Dodick, Fumihiko Sakai, Joost Haan, 2020-04 Headache syndromes rank amongst the most common presenting symptoms in general practice and neurology, affecting up to 15% of the adult population. Part of the Oxford Textbooks in Clinical Neurology series, the Oxford Textbook of Headache Syndromes provides clinicians with a definitive resource for diagnosing and managing patients with primary and secondary forms of headaches, either as isolated complaints or as part of a more complex syndrome. Split into 7 key sections with 59 chapters, this comprehensive work discusses the scientific basis and practical management of headache syndromes in a logical format. Each chapter is written by international experts in neurology who share their research and extensive experience by providing a wealth of practical advice for use in clinical situations. In addition, all content is up-to-date and chapters incorporate discussions on the latest International Classification of Headache Disorders 3rd edition when relevant.

Glee and New Directions for Social Change Brian C. Johnson, Daniel K. Faill, 2015-02-27 In the fall of 2009, the Fox network took a bold step in their primetime television lineup. Borrowing from the success of reality music performance shows like its own American Idol, the network introduced us to the students at McKinley High School, a fictional high school in Lima, OH, and home to the glee club known as the New Directions. The group is made up of freaks and geeks who feel the wrath of being “different.” The cool kids are hell bent on making life difficult for the students in glee club. Yet, because of the determination of Mr. Will Schuester, the club’s advisor, along with a few great songs, Glee has brought a new tone of

inclusion to modern television and direct parallels can be seen between the experiences of the show choir members and what is happening in contemporary society. Glee has shown the importance of examining the intersections of pop culture and social issues; this text will encourage thinking on how effective the show has been beyond the screen. Essays provide critical analyses of the show, its characters, and its overall usefulness as a commentary on social issues. The show's content often deals with subject matter that would lend easily to critique around such social issues as sexuality, bullying, interpersonal communication, conflict resolution, and family relationships. This text invites readers to examine the intersections between media, society, and the individual.

The Mabinogi and Other Medieval Welsh Tales Patrick K.

Ford, 2019-09-24 The four stories that make up the Mabinogi, along with three additional tales from the same tradition, form this collection and compose the core of the ancient Welsh mythological cycle. Included are only those stories that have remained unadulterated by the influence of the French Arthurian romances, providing a rare, authentic selection of the finest works in medieval Celtic literature. This landmark edition translated by Patrick K. Ford is a literary achievement of the highest order.

Darwin-Inspired Learning Carolyn J. Boulter, Michael J.

Reiss, Dawn L. Sanders, 2015-01-19 Charles Darwin has been extensively analysed and written about as a scientist, Victorian, father and husband. However, this is the first book to present a carefully thought out pedagogical approach to learning that is centered on Darwin's life and scientific practice. The ways in which Darwin

developed his scientific ideas, and their far reaching effects, continue to challenge and provoke contemporary teachers and learners, inspiring them to consider both how scientists work and how individual humans 'read nature'. Darwin-inspired learning, as proposed in this international collection of essays, is an enquiry-based pedagogy, that takes the professional practice of Charles Darwin as its source. Without seeking to idealise the man, Darwin-inspired learning places importance on: • active learning • hands-on enquiry • critical thinking • creativity • argumentation • interdisciplinarity. In an increasingly urbanised world, first-hand observations of living plants and animals are becoming rarer. Indeed, some commentators suggest that such encounters are under threat and children are living in a time of 'nature-deficit'. Darwin-inspired learning, with its focus on close observation and hands-on enquiry, seeks to re-engage children and young people with the living world through critical and creative thinking modeled on Darwin's life and science.

John Catt's Which School? 2012 Tom Wheare, Wendy Bosberry-Scott, 2011-09 First published in 1924, 'Which School?' brings together in one volume a wide range of information and advice, updated annually, on independent education for children up to the age of 18 years.

Many Faces of Love Kaarina Määttä, Satu Uusiautti, 2013-04-19 What do we actually talk about when we talk about love? Research on love and emotions has been met with suspicion although people live in a network of relationships from birth to death, and the ability to build and maintain relationships is an important strength. This book provides a comprehensive research-based analysis of love in human life: romantic love and its ups and downs, and the fascination of love, the combination of work and family, the secrets of a long-lasting

marriage, senior love, and the throes and relief of a divorce. Love is also discussed in relation to other phenomena, such as friendship, play, and creativity. In addition, themes of parental love and pedagogical love, and the ability to love, as well as dark sides of love are introduced. Love is worth cherishing and practicing. Other people's experiences may be helpful, and information about the nature of love can relieve the pain. Thus, love, in its various forms, makes the best health insurance! This book is meant for everyone interested in love but also for professionals in various fields, such as psychologists, educators, and couple and family counselors. The book is based on authors Prof. Kaarina Määttä's and Dr. Satu Uusiantti's extensive research on love at the University of Lapland, Finland.

The Politics of Panem Sean P. Connors, 2014-09-24 The Hunger Games trilogy is a popular culture success. Embraced by adults as well as adolescents, Suzanne Collins's bestselling books have inspired an equally popular film franchise. But what, if anything, can reading the Hunger Games tell us about what it means to be human in the world today? What complex social and political issues does the trilogy invite readers to explore? Does it merely entertain, or does it also instruct? Bringing together scholars in literacy education and the humanities, *The Politics of Panem: Challenging Genres* examines how the Hunger Games books and films, when approached from the standpoint of theory, can challenge readers and viewers intellectually. At the same time, by subjecting Collins's trilogy to literary criticism, this collection of essays challenges its complexity as an example of dystopian literature for adolescents. How can applying philosophic frameworks such as those attributable to Socrates and Foucault to the Hunger Games trilogy deepen our appreciation for the issues it raises? What, if anything, can we learn from considering fan responses to the Hunger

Games? How might adapting the trilogy for film complicate its ability to engage in sharp-edged social criticism? By exploring these and other questions, *The Politics of Panem: Challenging Genres* invites teachers, students, and fans of the *Hunger Games* to consider how Collins's trilogy, as a representative of young adult dystopian fiction, functions as a complex narrative. In doing so, it highlights questions and issues that lend themselves to critical exploration in secondary and college classrooms.

The Nature of Technology Michael P. Clough, Joanne K. Olson, Dale S. Niederhauser, 2013-09-03 How does technology alter thinking and action without our awareness? How can instantaneous information access impede understanding and wisdom? How does technology alter conceptions of education, schooling, teaching and what learning entails? What are the implications of these and other technology issues for society? Meaningful technology education is far more than learning how to use technology. It entails an understanding of the nature of technology — what technology is, how and why technology is developed, how individuals and society direct, react to, and are sometimes unwittingly changed by technology. This book places these and other issues regarding the nature of technology in the context of learning, teaching and schooling. The nature of technology and its impact on education must become a significant object of inquiry among educators. Students must come to understand the nature of technology so that they can make informed decisions regarding how technology may influence thinking, values and action, and when and how technology should be used in their personal lives and in society. Prudent choices regarding technology cannot be made without understanding the issues that this book raises. This book is intended to raise such issues and stimulate thinking and action among teachers,

teacher educators, and education researchers. The contributions to this book raise historical and philosophical issues regarding the nature of technology and their implications for education; challenge teacher educators and teachers to promote understanding of the nature of technology; and provide practical considerations for teaching the nature of technology.

Gender & Pop Culture Adrienne Trier-Bieniek, 2014-04-03

Gender & Pop Culture provides a foundation for the study of gender, pop culture and media. This comprehensive, interdisciplinary text provides text-book style introductory and concluding chapters written by the editors, seven original contributor chapters on key topics and written in a variety of writing styles, discussion questions, additional resources and more. Coverage includes: - Foundations for studying gender & pop culture (history, theory, methods, key concepts) - Contributor chapters on media and children, advertising, music, television, film, sports, and technology - Ideas for activism and putting this book to use beyond the classroom - Pedagogical Features - Suggestions for further readings on topics covered and international studies of gender and pop culture Gender & Pop Culture was designed with students in mind, to promote reflection and lively discussion. With features found in both textbooks and anthologies, this sleek book can serve as primary or supplemental reading in undergraduate courses across the disciplines that deal with gender, pop culture or media studies. "An important addition to the fields of gender and media studies, this excellent compilation will be useful to students and teachers in a wide range of disciplines. The research is solid, the examples from popular culture are current and interesting, and the conclusions are original and illuminating. It is certain to stimulate self-reflection and lively discussion." Jean Kilbourne, Ed.D.,

author, feminist activist and creator of the Killing Us Softly: Advertising's Image of Women film series "An ideal teaching tool: the introduction is intellectually robust and orients the reader towards a productive engagement with the chapters; the contributions themselves are diverse and broad in terms of the subject matter covered; and the conclusion helps students take what they have learnt beyond the classroom. I can't wait to make use of it." Sut Jhally, Professor of Communication, University of Massachusetts at Amherst, Founder & Executive Director, Media Education Foundation

Adrienne Trier-Bieniek, Ph.D. is currently an assistant professor of sociology at Valencia College in Orlando, Florida. Her first book, *Sing Us a Song, Piano Woman: Female Fans and the Music of Tori Amos* (Scarecrow, 2013) addresses the ways women use music to heal after experiencing trauma. www.adriennetrier-bieniek.com

Patricia Leavy, Ph.D. is an internationally known scholar and best-selling author, formerly associate professor of sociology and the founding director of gender studies at Stonehill College. Groups that Work Paul H. Ephross, Thomas V. Vassil, 2005

Working groups play a major role in the development of health & human services. The authors discuss the skills needed for effective participation & leadership within these groups.

Psychology in Education Tim Corcoran, 2014 Psychology's contribution to education has produced a persuasive and burgeoning

literature willing to measure (e. g. intelligence quotients), categorise (e. g. learning and/or behavioural difficulties) and pathologise (e. g. psychiatric disorders) students across learning contexts. Practices like these pervade relationships existing between psychology and education because they share in common certain views of people and the worlds in which they learn. There is however increased acknowledgement that contemporary practice demands alternate ways of working. As learning communities and educators endeavour to make a difference in peoples' lives, they are critically questioning how their use of psychology in education constitutes future possibilities for personhood and psychosocial action. In this book, a group of respected international scholars examine controversies presently facing the enduring relationship between psychology and education. The book will appeal to readers who are interested in the innovative development and application of psychological theories and practices in/to education. The book will be of interest to transnational audiences and is accessible to scholars and students in disciplines including psychology, education, sociology, social work, youth studies, public and allied health. The volume includes contributions from: Tom Billington, Christopher Boyle, Lise Bird Claiborne, Tim Corcoran, Greg Goodman, Jack Martin, Athanasios Marvakis and Ioanna Petritsi, Jace Pillay, Isaac Prilleltensky, Anna Stetsenko, Jeff Sugarman and Stephen Vassallo with a Foreword by Ben Bradley.

Contemporary British Autoethnography Nigel P. Short, Lydia Turner, Alec Grant, 2013-11-19 This engaging, informative book makes an exciting contribution to current discussions about the challenges and uses of contemporary autoethnography. Authors from a range of disciplines 'show and tell' us how they have created autoethnographies, demonstrating a rich blend of theories, ethical

research practices, and performances of identities and voice, linking all of those with the socio-cultural forces that impact and shape the person. The book will be a useful resource for new and experienced researchers; academics who teach and supervise post-graduate students; and practitioners in social science who are seeking meaningful ways to conduct research. This should be required reading for all qualitative research training.

Random Graph Dynamics Rick Durrett, 2010-05-31 The theory of random graphs began in the late 1950s in several papers by Erdos and Renyi. In the late twentieth century, the notion of six degrees of separation, meaning that any two people on the planet can be connected by a short chain of people who know each other, inspired Strogatz and Watts to define the small world random graph in which each site is connected to k close neighbors, but also has long-range connections. At a similar time, it was observed in human social and sexual networks and on the Internet that the number of neighbors of an individual or computer has a power law distribution. This inspired Barabasi and Albert to define the preferential attachment model, which has these properties. These two papers have led to an explosion of research. The purpose of this book is to use a wide variety of mathematical argument to obtain insights into the properties of these graphs. A unique feature is the interest in the dynamics of process taking place on the graph in addition to their geometric properties, such as connectedness and diameter.

Virginia School Report Virginia. Department of Education, 1913
Churchill and the Dardanelles Christopher M. Bell, 2017 The failure of the Allied fleet to force a passage through the Straits of the

Dardanelles in 1915 drove Winston Churchill from office (First Lord of the Admiralty) in disgrace and nearly destroyed his political career. For over a century, Churchill has been both praised and condemned for his role in launching this highly controversial campaign. For some, the Dardanelles offensive was a brilliant concept that might have dramatically shortened the First World War. To many others, however, Churchill was a reckless amateur who drove his unwilling and misinformed colleagues into a venture that was doomed to fail. This book, based on exhaustive archival research, provides a detailed and authoritative account of the Gallipoli campaign's origins and execution, stripping away the layers of myth that have long surrounded these dramatic events, and showing that no simple verdict is either possible or fair. Naval historian Christopher M. Bell untangles Churchill's complicated relationship with the dynamic First Sea Lord, Admiral Jacky Fisher, and reveals for the first time the behind-the-scenes machinations that led to Churchill's removal from office, including Fisher's covert campaign to undermine support for the Dardanelles operation, and the leaks by figures in high places that fuelled a bitter press campaign to drive Churchill from power. Equal attention is also given to the perhaps even more important story of Churchill and the Dardanelles after 1915. As Bell shows, Churchill spent a good deal of time and effort in the following two decades trying to refute his critics and convince the wider public that the campaign had in fact nearly succeeded. These efforts were so successful that the legacy of the Dardanelles did not stand in the way of Churchill becoming Prime Minister in May 1940--Provided by publisher.
