Bombay Modern Anjali Nerlekar,2016-05-15 Anjali Nerlekar's Bombay Modern is a close reading of Arun Kolatkar's canonical poetic works that relocates the genre of poetry to the center of both Indian literary modernist studies and postcolonial Indian studies. Nerlekar shows how a bilingual, materialist reading of Kolatkar's texts uncovers a uniquely resistant sense of the local that defies the monolinguistic cultural pressures of the post-1960 years and straddles the boundaries of English and Marathi writing. Bombay Modern uncovers an alternative and provincial modernism through poetry, a genre that is marginal to postcolonial studies, and through bilingual scholarship across English and Marathi texts, a methodology that is currently peripheral at best to both modernist studies and postcolonial literary criticism in India. Eschewing any attempt to define an overarching or universal modernism, Bombay Modern delimits its sphere of study to Bombay and to the post-1960 (the sathottari period) in an attempt to examine at close range the specific way in which this poetry redeployed the regional, the national, and the international to create a very tangible yet transient local.

Reclaiming (the Urbanism Of) Mumbai Kelly Shannon,Janina Gosseye,2009 Mumbai is in the midst of dramatic transformations. The juxtaposition of the awe-inspiring and heartrending sensations and physical realities is incredibly powerful. The brutality of change in the city forces one to confront new modes of urbanism and urbanisation. The urbanists and planner has the job to re-think, re-visit and re-learn means for intervention. Social, economic and political forces are reflected in an evolving urban form and local architects and planners are struggling to qualitatively intervene. The first essays in this book are extremely pertinent in their questioning of the status quo and the current mode of city-building. The third part of the book is about hope: which is to be found in the margins. The impossibilities of Mumbai are obvious, the stimulating forms of urbanity are in the margins were they provide clues for possible future interventions.

Small Vessel Security Strategy U. S. Department U.S. Department of Homeland Security,2014-09-04 Since the terrorist attacks of September 11, 2001, maritime security efforts have focused primarily on large commercial vessels, cargoes, and crew. Efforts to address the small vessel environment have largely been limited to traditional safety and basic law enforcement concerns. Small vessels are, however, readily vulnerable to potential exploitation by terrorists, smugglers of weapons of mass destruction (WMDs), narcotics, aliens, and other contraband, and other criminals. Small vessels have also been successfully employed overseas by terrorists to deliver Waterborne Improvised Explosive Devices (WBIEDs). Law enforcement agencies face the challenge of distinguishing between the vast number of legitimate vessel operators and the relatively few individuals engaged in illicit activities. The challenge is immense, as it involves nearly 13 million registered U.S. recreational vessels, 82,000 fishing vessels, and 100,000 other commercial small vessels. On any given day, a considerable number of these boats share waterways with commercial and military traffic, operating at hundreds of U.S. ports and in the immediate vicinity of critical maritime infrastructure, including bridges and waterfront facilities such as petrochemical plants. More information concerning small vessels is needed to improve the proper assessment of the risk posed by these vessels. The challenge is to balance the collection of requisite information necessary for proper assessment of risk posed by these vessels, with the freedom of the seas expected by the small boating community.

Port and Maritime Security Jonathon P. Vesky,2008 The terrorist attacks of September 11, 2001 heightened awareness about the vulnerability to terrorist attack of all modes of transportation. Port security has emerged as a significant part of the overall debate on US homeland security. The

overarching issues for Congress are providing oversight on current port security programs and making or responding to proposals to improve port security. The US maritime system consists of more than 300 sea and river ports with more than 3,700 cargo and passenger terminals. However, a large fraction of maritime cargo is concentrated at a few major ports. Most ships calling at US ports are foreign owned with foreign crews. Container ships have been the focus of much of the attention on seaport security because they are seen as vulnerable to terrorist infiltration. More than 9 million marine containers enter US ports each year. While the Bureau of Customs and Border Protection (CBP) analyses cargo and other information to target specific shipments for closer inspection, it physically inspects only a small fraction of the containers. The Coast Guard and CBP are the federal agencies with the strongest presence in seaports. In response to September 11, 2001, the Coast Guard created the largest port-security operation since World War II. The Coast Guard has advanced its 24- hour Notice of Arrival (NOA) for ships to a 96-hour NOA. The NOA allows Coast Guard officials to select high risk ships for boarding upon their arrival at the entrance to a harbor. CBP has also advanced the timing of cargo information it receives from ocean carriers. Through the Container Security Initiative (CSI) program, CBP inspectors pre-screen U.S.-bound marine containers at foreign ports of loading. The Customs Trade Partnership Against Terrorism (C-TPAT) offers importers expedited processing of their cargo if they comply with CBP measures for securing their entire supply chain. To raise port security standards, Congress passed the Maritime Transportation Security Act of 2002 (P.L. 107-295) in November 2002. The focus of debate in Congress has been about whether current efforts to improve port security are adequate in addressing the threat. While many agree that Coast Guard and CBP programs to address the threat are sound, they contend that these programs represent only a framework for building a maritime security regime, and that significant gaps in security still remain.
