Cinema of Confinement Thomas J. Connelly,2019-02-15 In this book, Thomas J. Connelly draws on a number of key psychoanalytic concepts from the works of Jacques Lacan, Slavoj Žižek, Joan Copjec, Michel Chion, and Todd McGowan to identify and describe a genre of cinema characterized by spatial confinement. Examining classic films such as Alfred Hitchcock's *Rope* and Stanley Kubrick's *The Shining*, as well as current films such as *Room*, *Green Room*, and *10 Cloverfield Lane*, Connelly shows that the source of enjoyment of confined spaces lies in the viewer's relationship to excess. Cinema of Confinement offers rich insights into the appeal of constricted filmic spaces at a time when one can easily traverse spatial boundaries within the virtual reality of cyberspace.

Placing Empire Kate McDonald,2017-08-01 A free ebook version of this title is available through Luminos, University of California Press's Open Access publishing program. Visit www.luminosoa.org to learn more. *Placing Empire* examines the spatial politics of Japanese imperialism through a study of Japanese travel and tourism to Korea, Manchuria, and Taiwan between the late nineteenth century and the early 1950s. In a departure from standard histories of Japan, this book shows how debates over the role of colonized lands

reshaped the social and spatial imaginary of the modern Japanese nation and how, in turn, this sociospatial imaginary affected the ways in which colonial difference was conceptualized and enacted. The book thus illuminates how ideas of place became central to the production of new forms of colonial hierarchy as empires around the globe transitioned from an era of territorial acquisition to one of territorial maintenance.

Acute Ischemic Stroke R. Gilberto González, Joshua A. Hirsch, Michael H. Lev, Pamela W. Schaefer, Lee H. Schwamm, 2010-10-05 This updated second edition of *Acute Ischemic Stroke: Imaging and Intervention* provides a comprehensive account of the state of the art in the diagnosis and treatment of acute ischemic stroke. The basic format of the first edition has been retained, with sections on fundamentals such as pathophysiology and causes, imaging techniques and interventions. However, each chapter has been revised to reflect the important recent progress in advanced neuroimaging and the use of interventional tools. In addition, a new chapter is included on the classification instruments for ischemic stroke and their use in predicting outcomes and therapeutic triage. All of the authors are internationally recognized experts and members of the interdisciplinary stroke team at the Massachusetts General Hospital and Harvard Medical School. The text is supported by numerous informative illustrations, and ease of reference is ensured through the inclusion of suitable tables. This book will serve as a unique source of up-to-date information for neurologists, emergency physicians, radiologists and other health care providers who care for the patient with acute ischemic stroke.

Collective Action for Social Change A. Schutz, M. Sandy, 2011-04-11 Community organizers build solidarity

and collective power in fractured communities. They help ordinary people turn their private pain into public action, releasing hidden capacities for leadership and strategy. In *Collective Action for Social Change*, Aaron Schutz and Marie G. Sandy draw on their extensive experience participating in community organizing activities and teaching courses on the subject to empower novices to think like an organizers.

Twelve Years a Slave Solomon Northup, 2024-01-04
Filmatized in 2013 and the official recipient of three Oscars, Solomon Northup's powerful slave narrative 'Twelve Years a Slave' depicts Nortup's life as he is sold into slavery after having spent 32 years of his life living as a free man in New York. Working as a travelling musician, Northup goes to Washington D.C, where he is kidnapped, sent to New Orleans, and sold to a planter to suffer the relentless and brutal life of a slave. After a dozen years, Northup escapes to return to his family and pulls no punches, as he describes his fate and that of so many other black people at the time. It is a harrowing but vitally important book, even today. For further reading on this subject, try 'Uncle Tom's Cabin' by Harriet Beecher Stowe. Solomon Northup (c.1807-c.1875) was an American abolitionist and writer, best remembered for his powerful race memoir 'Twelve Years a Slave'. At the age of 32, when he was a married farmer, father-of-three, violinist and free-born man, he was kidnapped in Washington D.C and shipped to New Orleans, sold to a planter and enslaved for a dozen years. When he gained his freedom, he wrote his famous memoir and spent some years lecturing across the US, on behalf of the abolitionist movement. 'Twelve Years a Slave' was published a year after 'Uncle Tom's Cabin' by Harriet Beecher Stowe and built on the anti-slavery momentum it had developed. Northup's final years are something of a mystery, though it is thought that he struggled to cope with family life after

being freed.

An Evocative Autoethnography of Living Alongside Myalgic Encephalomyelitis (ME) Orlagh Farrell Delaney, 2021-07-30 This ground-breaking book explores and explains the day-to-day realities of living long-term with Myalgic Encephalomyelitis (ME). ME is an acquired complex disorder characterised by a variety of symptoms affecting multiple systems of the body. Marked fatigue and weakness, sickness, cognitive dysfunction and symptom flare-up can follow any physical or cognitive exertion. It is estimated that there are 17-24 million sufferers worldwide. The author has lived with moderately severe ME for the last 18 years. Utilising autoethnography as a methodology and drawing on multidisciplinary social science theory, the book tells the story of the author's own lived experiences of the illness, and how she sought to reimagine a 'self' or a life living alongside the illness, that could still be considered a 'good life'. This autoethnographic book is beautifully and evocatively written. It is a work of scholarship that will be highly accessible to academic and other readers. It is also a comprehensive introduction to autoethnography as a methodology, but it is much more. The images and poetry complement the narrative discussion, and are exemplary as part of an approach that integrates creative work with academic argument. It illuminates the struggles of living with ME and how there can be sanctuary.

Microbial Threats to Health Institute of Medicine, Board on Global Health, Committee on Emerging Microbial Threats to Health in the 21st Century, 2003-08-25 Infectious diseases are a global hazard that puts every nation and every person at risk. The recent SARS outbreak

is a prime example. Knowing neither geographic nor political borders, often arriving silently and lethally, microbial pathogens constitute a grave threat to the health of humans. Indeed, a majority of countries recently identified the spread of infectious disease as the greatest global problem they confront. Throughout history, humans have struggled to control both the causes and consequences of infectious diseases and we will continue to do so into the foreseeable future. Following up on a high-profile 1992 report from the Institute of Medicine, *Microbial Threats to Health* examines the current state of knowledge and policy pertaining to emerging and re-emerging infectious diseases from around the globe. It examines the spectrum of microbial threats, factors in disease emergence, and the ultimate capacity of the United States to meet the challenges posed by microbial threats to human health. From the impact of war or technology on disease emergence to the development of enhanced disease surveillance and vaccine strategies, *Microbial Threats to Health* contains valuable information for researchers, students, health care providers, policymakers, public health officials, and the interested public.

The Wrong House Steven Jacobs, 2007 Architecture plays an important role in the films of Alfred Hitchcock. Steven Jacobs devotes lengthy discussion to a series of domestic buildings with the help of a number of reconstructed floor plans made specially for this book.

Ecology Without Nature Timothy Morton, 2009-09-15 In *Ecology without Nature*, Timothy Morton argues that the chief stumbling block to environmental thinking is the image of nature itself. Ecological writers propose a new worldview, but their very zeal to preserve the natural world leads them away from the nature they revere. The problem is a symptom of the ecological catastrophe in which we are living. Morton sets out a seeming paradox: to have a properly ecological view, we must relinquish the idea of nature once and for all. *Ecology without Nature* investigates our ecological assumptions in a way that is provocative and deeply engaging. Ranging widely in eighteenth-century through contemporary philosophy, culture, and history, he explores the value of art in imagining environmental projects for the future. Morton develops a fresh vocabulary for reading environmentality in artistic form as well as content, and traces the contexts of ecological constructs through the history of capitalism. From John Clare to John Cage, from Kierkegaard to Kristeva, from The Lord of the

Rings to electronic life forms, Ecology without Nature widens our view of ecological criticism, and deepens our understanding of ecology itself. Instead of trying to use an idea of nature to heal what society has damaged, Morton sets out a radical new form of ecological criticism: dark ecology.

Contemporary Developments and Perspectives in International Health Security Stanislaw P. Stawicki, Michael S. Firstenberg, Sagar C. Galwankar, Ricardo Izurieta, Thomas Papadimos, 2021-01-07 International health security (IHS) is a broad and highly heterogeneous area. Within this general context, IHS encompasses subdomains that potentially influence (and more specifically endanger) the well-being and wellness of humans. The general umbrella of IHS includes, but is not limited to, natural disasters, emerging infectious diseases (EID) and pandemics, rapid urbanization, social determinants of health, population growth, systemic racism and discrimination, environmental matters, civilian violence and warfare, various forms of terrorism, misuse of antibiotics, and the misuse of social media. The need for this expanded definition of health security stems from the realization that topics such as EID; food, water, and pharmaceutical supply chain safety; medical and health information cybersecurity; and bioterrorism, although important within the overall realm of health security, are not only able to actively modulate the wellness and health of human populations, but also tend to do so in a synergistic fashion. This inaugural tome of a multi-volume collection, Contemporary Developments and Perspectives in International Health Security, introduces many of the topics directly relevant to modern IHS theory and practice. This first volume provides a solid foundation for future installments of this important and relevant book series.

Genre, Authorship and Contemporary Women

Filmmakers Katarzyna Paszkiewicz, 2018-06-06 Examining the significance of women's work in popular film genres, this text sheds light on women's contribution to genre cinema through an exploration of filmmakers like Kathryn Bigelow, Diablo Cody, Sofia Coppola, and Kelly Reichard.

Beyond Bollywood Jigna Desai, 2004-08-02 Beyond Bollywood is the first comprehensive look at the emergence, development, and significance of contemporary South Asian diasporic cinema. From a feminist and queer perspective, Jigna Desai explores the hybrid cinema of the Brown Atlantic through a close look at films in English from and about South Asian diasporas in the United States, Canada, and Britain, including such popular films as *My Beautiful Laundrette*, *Fire*, *Monsoon Wedding*, and *Bend it Like Beckham*.

Michlovitz's Modalities for Therapeutic Intervention
James W. Bellew, Thomas P. Nolan Jr., 2022-01-24 A volume in the Contemporary Perspectives in Rehabilitation Series, curated by Steven L. Wolf, PhD, PT, FAPTA Implement a current, evidence-based approach to the selection, application, and uses of therapeutic modalities as an essential tool for functionally based rehabilitation and as a complement to other types of interventions in a patient-centered model of care. The 7th Edition of this groundbreaking text fosters an in-depth understanding of the science behind each modality, its advantages and limitations, its appropriateness for specific conditions, and its implementation. A hands-on problem-solving approach promotes the development of essential clinical decision-making skills through a wealth of full-color photographs and illustrations, special features, and challenging cases studies. See what students and practitioners are saying about the previous edition... Recommend this book. "Great clinical reference for young therapists and seasoned

therapists alike. Great information in a nicely organized book.”—Jane D., Online Reviewer
Excellent book “Excellent content. Therapeutic modalities and many more... including spinal decompression devices.”—Online Reviewer
