From Notation to Music Ralph J. Blauvelt,2007 FROM NOTATION TO MUSIC tells the story of one composer's search for meaning in the musical notations of the late 20th Century. Radical departures from the traditional composer-performer relationship contributed to a re-evaluation of traditional notation. Ralph Blauvelt recounts his confrontation with these issues and the development of his own philosophy in the music he composed between 1964 and 1981. He traces the evolution of his ideas through more than eighty compositions. After working to master the notation of traditional music and the highly determinate notations of serial music, he describes the influence of Karlheinz Stockhausen on his first compositions with indeterminate notations. Studies with Lejaren Hiller and experiments with computer and electronic music inspired new compositions. With over 190 photographs and illustrations Ralph Blauvelt describes his journey and the ideas that led to his text pieces and graphic 'visual' scores.

Double Lives: Film Composers in the Concert Hall James Wierzbicki,2019-02-21 Double Lives: Film Composers in the Concert Hall is a collection of fifteen essays dealing with ‘iconic’ film composers who, perhaps to the surprise of many fans of film music, nevertheless maintained lifelong careers as composers for the concert hall. Featured composers include Erich Wolfgang Korngold, Franz Waxman, Miklós Rózsa, Bernard Herrmann, Nino Rota, Leonard Rosenman, and Ennio Morricone. Progressing in chronological order, the chapters offer accounts of the various composers’ concert-hall careers and descriptions of their concert-hall styles. Each chapter compares the composer’s music for films with his or her music for the concert hall, and speculates as to how music in one arena might have affected music in the other. For each composer discussed in the book, complete filmographies and complete works lists are included as appendices. Double Lives: Film Composers in the Concert Hall is accessible for scholars, researchers, and general readers with an interest in film music and concert music.

Section II provides forms, documents and examples for the management, production, recording and delivery of music for projects. Section III features frequently used sample contracts and agreements, and Section IV lists other composer resources, such as a glossary of terms and abbreviations, info on performing rights organizations, attorneys and agents, listings of different markets to tap, internet resources, and much more. Essential for any musician interested in a career in film and television music.

Readers' Guide to Periodical Literature ,1922

Quarter Notes and Bank Notes F. M. Scherer,2018-06-05 In 1700, most composers were employees of noble courts or the church. But by the nineteenth century, Chopin, Schumann, Brahms, Verdi, and many others functioned as freelance artists teaching, performing, and selling their compositions in the private marketplace. While some believe that Mozart's career marks a clean break between these two periods, this book tells the story of a more complex and interesting transition. F. M. Scherer first examines the political, intellectual, and economic roots of the shift from patronage to a freelance market. He describes the eighteenth-century cultural arms race among noble courts, the spread of private concert halls and opera houses, the increasing attendance of middle-class music lovers, and the founding of conservatories. He analyzes changing trends in how composers acquired their skills and earned their living, examining such impacts as demographic developments and new modes of transportation. The book offers insight into the diversity of composers' economic aspirations, the strategies through which they pursued success, the burgeoning music publishing industry, and the emergence of copyright protection. Scherer concludes by drawing some parallels to the economic state of music composition in our own times. Written by a leading economist with an unusually broad knowledge of music, this fascinating account is directed toward individuals intrigued by the world of classical composers as well as those interested in economic history or the role of money in art.

The Oxford Handbook of Music and Medievalism Stephen C. Meyer,Kirsten Yri,2020-03-13 The Oxford Handbook of Music and Medievalism provides a snapshot of the diverse ways in which medievalism--the retrospective immersion in the images, sounds, narratives, and ideologies of the European Middle Ages--powerfully transforms many of the varied musical traditions of the last two centuries. Thirty-three chapters from an international group of scholars explore topics ranging from the representation of the Middle Ages in nineteenth-century opera to medievalism in contemporary video game music, thereby connecting disparate musical forms across typical musicological boundaries of chronology and geography. While some chapters focus on key medievalist works such as Orff's Carmina Burana or Peter Jackson's Lord of the Rings films, others explore medievalism in the oeuvre of a single composer (e.g. Richard Wagner or Arvo P rt) or musical group (e.g. Led Zeppelin). The topics of the individual chapters include both well-known works such as John Boorman's film Excalibur and also less familiar examples such as Eduard Lalo's Le Roi d'Ys. The authors of the chapters approach their material from a wide array of disciplinary perspectives, including historical musicology, popular music studies, music theory, and film studies, examining the intersections of medievalism with nationalism, romanticism, ideology, nature, feminism, or spiritualism. Taken together, the contents of the Handbook develop new critical insights that venture outside traditional methodological constraints and provide a capstone and point of departure for future scholarship on music and medievalism.

Hwang Byungki: Traditional Music and the Contemporary Composer in the Republic of Korea Andrew Killick,2016-12-05 Anyone who knows anything of Korean music probably knows something of Hwang Byungki. As a composer, performer, scholar, and administrator, Hwang has had an exceptional influence on the world of Korean traditional music for over half a century. During that time, Western-style music (both classical and popular) has become the main form of musical expression for most Koreans, while traditional music has taken on a special role as a powerful emblem of national identity. Through analysis of Hwang's life and works, this book addresses the broader question of traditional music's place in a rapidly modernizing yet intensely nationalistic society, as well as the issues faced by a composer working in an idiom in which the very concept of the individual composer was not traditionally recognized. It explores how new music for traditional instruments can provide a means of negotiating between a local identity and the modern world order. This is the first book in English about an Asian composer who writes primarily for traditional instruments. Following a thematic rather than a rigidly chronological approach, each chapter focuses on a particular area of interest or activity-such as Hwang's unique position in the traditional genre kayagum sanjo, his enduring interest in Buddhist culture and a meditative aesthetic, and his adoption of extended techniques and approaches from Western avant-garde music-and includes in-depth analysis of selected works, excerpts from which are provided on downloadable resources. The book draws on 25 years of personal acquaintance and study with Hwang Byungki as well as experience in playing his music.

Source Book of Proposed Music Notation Reforms Gardner Read,1987-04-03 This is the first book to examine comprehensively the major systems of musical notation proposed during the past three centuries. Illustrating the many attempts to improve upon or replace the traditional system, this important work chronologically lists, describes, and critically analyzes the majority of the proposed reforms that have appeared over the years. No other book now available covers the subject in such depth or detail. It is not only a repository of suggested improvements in notation, but also a historical survey of the efforts made to simplify the standard practices.
