Hearing and Writing Music Ron Gorow, 2011-03-15 A self-training manual as well as a classroom text, this book is a complete step-by-step course to develop the musician's ability to hear and notate any style of music. Personal training, theory and exercises produce techniques which are combined in an integrated craft which may be applied to composition, orchestration, arranging, improvisation and performance. A kind of finishing school for those who wish to pursue a career in composing, orchestrating, arranging or performing. -- The Score, Society of Composers and Lyricists A myriad of practical information. Comprehensive ear training, important because aural skills are among the most overlooked in music education. -- Survey of New Teaching Materials, Jazz Educators journal A synthesis of the author's vast knowledge and his quest to define the question, How do we hear? -- ITG Journal A wonderfully systematic approach to ear training . . . neatly designed and structured, it just flows. Direct and easily understood. -- New books, Jazz Educators Journal Bernard Brandt says: Hearing and Writing Music, by Ron Gorow, is a superb book. It makes a simple and elegant presentation of the internal process by which we hear sounds and music, how we recognize intervals, chords, melody, harmony, counterpoint, and the timbre of instrumentation/ orchestration, how we can develop the skills of listening, auditory memory and imagination, and how to use these skills to hear and to write down music of any sort. The hallmark of an expert is the ability to explain the basics of his field as simply as possible. By that standard, Mr. Gorow has proven his expertise in this book. I note that the other reviews, both for Amazon and in musical journals, tend to limit the importance of Hearing and Writing Music to ear training. I believe that Mr. Gorow's book is valuable for much more than ear training. I have studied it, and as a result of that study, I believe that my auditory memory and imagination and my abilities in score reading have improved enormously. Further, I have been able to use the skills in this book to transcribe melodies, harmonies and counterpoint almost effortlessly, both those that I have heard, and

those which existed only in my imagination. This book has opened many doors for me. I believe that it can do so for many others.

Ear Training One Note Complete Bruce E. Arnold,2006-12 This edition comes with no CDs. You must purchase either the 3 associated CDs separately or digitally download the CDs from an on-line vendor. Otherwise this book is exactly the same as the book/CD edition. Just as an artist must know every color in order to create a beautiful painting, a musician must know and hear all the notes of the musical palette in order to create good music. This Ear Training method has been developed to teach the student how to hear the way musical sounds are organized within a key. With proper application, the student will be able to instantly recognize: . Which notes other musicians are playing. . What key a chord progression is in. . What the notes in a given melody are. These are all invaluable tools for both playing and composing music. This Complete Method is recommended for students who have little or no music training or an advanced musician that needs to develop their aural recognition skills. This book contains all the information needed to work with the Beginning, Intermediate and Advanced CDs which as mentioned are available separately. These CDs are entitled: Ear Training One Note Beginning Ear Training One Note Intermediate Ear Training One Note Advanced These 3 CDs are also available in MP3 format. Both formats can be purchased from various on-line vendors. A list of recommended vendors can be found on the muse-eeek.com website. By studying the method presented within this book and speeding up your recognition skills by listening to the 3 CDs a student will find that their whole preception of hearing music will change. This book is a required text at New York University and Princeton University, and is recommended for beginning music students ages 13 and up.
