Corporate Financial Reporting Analysis combines comprehensive coverage and a rigorous approach to modern financial reporting with a readable and accessible style. Merging traditional principles of corporate finance and accepted reporting practices with current models enable the reader to develop essential interpretation and analysis skills, while the emphasis on real-world practicality and methodology provides seamless coverage of both GAAP and IFRS requirements for enhanced global relevance. Two decades of classroom testing among INSEAD MBA students has honed this text to provide the clearest, most comprehensive model for financial statement interpretation and analysis; a concise, logically organized pedagogical framework includes problems, discussion questions, and real-world case studies that illustrate applications and

current practices, and in-depth examination of key topics clarifies complex concepts and builds professional intuition. With insightful coverage of revenue recognition, inventory accounting, receivables, long-term assets, M&A, income taxes, and other principle topics, this book provides both education and ongoing reference for MBA students.

It brings together contributions by leading academics and practitioners engaging with topical issues as well as questions of fundamental importance in succession law and estate planning. Radical Research John Schostak,Jill

Schostak,2007-09-05 Radical Research explores the view that research is not a neutral tool to be employed without bias in the search for truth. Rather the radical roots of research are to be seen in the focus on freedom and emancipation from blind allegiance to tradition, 'common sense', religion, or powerful individuals and organisations. Radical Research introduces and draws upon leading contemporary debates and data gathered from a diversity of funded projects in; health, education, police training, youth and community, schools, business, and the use of information technology. This book presents a radical view of research in a way that enables both beginner and the experienced professional researcher to explore its approaches in the formation of their own views and practices. It progressively leads the reader from discussions of case studies to critical explorations of the philosophical and methodological concepts, theories and arguments that are central to contemporary debates. In essence, this book shows how to design, develop and write radical research under conditions where 'normal' research rules apply and it offers a ground-breaking and proven alternative to traditional research techniques.
