The Australia-European Union Free Trade Agreement Marc Bungenberg, Andrew Mitchell, 2022-02-26 This book gathers a selection of peer-reviewed chapters reflecting on the Australia-European Union Free Trade Agreement (AEUFTA). Since 18 June 2018, ten rounds of negotiations for a AEUFTA have been held in a constructive atmosphere, showing a shared commitment to move forward with this ambitious and comprehensive agreement. After a lengthy and arduous process interrupted by the United Kingdom's withdrawal from the European Union (EU), the United States' hesitations regarding the EU's global strategy and the outbreak of the COVID-19 pandemic, the negotiations between Australia and the European Union finally appear to be nearing completion. In challenging times, both parties share a commitment to a positive trade agenda, and to the idea that good trade agreements benefit both sides by boosting jobs, growth and investment. This book explores the challenges, achievements and missed opportunities in the AEUFTA negotiation process, and examines current legal and political relations between the EU, its Member States and Australia. Furthermore, it examines in detail a wide and diverse range of negotiated areas, including digital trade, services, intellectual property rules, trade remedies and investment screening, as well as dispute settlement mechanisms. Lastly, it sheds light on the likely nature of future commercial relations between Australia and the EU. Written by a team of respected authors from leading institutions in both Australia and Europe, the book provides a valuable, interdisciplinary analysis of the AEUFTA.

University of Chicago Law Review University of Chicago Law Review, 2013-04 A leading law review offers a quality eBook edition. Surroundings Etienne S. Benson, 2020-05-15 Given the ubiquity of environmental rhetoric in the modern world, it's easy to think that the meaning of the terms environment and environmentalism are and always have been self-evident. But in *Surroundings*, we learn that the environmental past is much more complex than it seems at first glance. In this wide-ranging history of the concept, Etienne S. Benson uncovers the diversity of forms that environmentalism has taken over the last two centuries and opens our eyes to the promising new varieties of environmentalism that are emerging today. Through a series of richly contextualized case studies, Benson shows us how and why particular groups of people—from naturalists in Napoleonic France in the 1790s to global climate change activists today—adopted the concept of environment and adapted it to their specific needs and challenges. Bold and deeply researched, *Surroundings* challenges much of what we think we know about what an environment is, why we should care about it, and how we can protect it.

Global Elites A. Kakabadse, 2011-12-12 Exploring the nature, configuration and influence of global elites, this book examines the impact of elites on transnational policy development and strategically on corporations as board members of PLCs and international joint ventures. Overall, the book provides a balanced view of how our present day elites operate.

Mobile Communication and the Family Sun Sun Lim, 2016-02-04 This volume captures the domestication of mobile communication technologies by families in Asia, and its implications for family interactions and relationships. It showcases research on families across a spectrum of socio-economic profiles, from both rural and urban areas, offering insights on children, adolescents, adults, and the elderly. While mobile communication diffuses through Asia at a blistering pace, families in the region are also experiencing significant changes in light of unprecedented economic growth, globalisation, urbanisation and demographic shifts. Asia is therefore at the crossroads of technological transformation and social change. This book analyses the interactions of these two contemporaneous trends from the perspective of the family, covering a range of family types including nuclear, multi-generational, transnational, and multi-local, spanning the continuum from the media-rich to the media have-less.

Handbook of the International Political Economy of Migration Leila Simona Talani, Simon McMahon, 2015-08-28 This Handbook discusses theoretical approaches to migration studies in general, as well as confronting various issues in international migration from a distinctive and unique international political economy perspective. Bush Bound Paolo Gaibazzi, 2015-08-01 Whereas most studies of migration focus on movement, this book examines the experience of staying put. It looks at young men living in a Soninke-speaking village in Gambia who, although eager to travel abroad for money and experience, settle as farmers, heads of families, businessmen, civic activists, or, alternatively, as unemployed, demoted youth. Those who stay do so not only because of financial and legal limitations, but also because of pressures to maintain family and social bases in the Gambia valley. 'Stayers' thus enable migrants to migrate, while ensuring the activities and values attached to rural life are passed on to the future generations.

Grant Wood R. Tripp Evans, 2010-10-05 He claimed to be "the plainest kind of fellow you can find. There isn't a single thing I've done, or experienced," said Grant Wood, "that's been even the least bit exciting." Wood was one of America's most famous regionalist painters; to love his work was the equivalent of loving America itself. In his time, he was an "almost mythical figure," recognized most supremely for his hard-boiled farm scene, *American Gothic*, a painting that has come to reflect the essence of America's traditional values—a simple, decent, homespun tribute to our lost agrarian age. In this major new biography of America's most acclaimed, and misunderstood, regionalist painter, Grant Wood is revealed to have been anything but plain, or simple . . . R. Tripp Evans reveals the true complexity of the man and the image Wood so carefully constructed of himself. Grant Wood called himself a farmer-painter but farming held little interest for him. He appeared to be a self-taught painter with his scenes of farmlands, farm workers, and folklore but he was classically trained, a sophisticated artist who had studied the Old Masters and Flemish art as well as impressionism. He lived a bohemian life and painted in Paris and Munich in the 1920s, fleeing what H. L. Mencken referred to as "the booboisie" of small-town America. We see Wood as

an artist haunted and inspired by the images of childhood; by the complex relationship with his father (stern, pious, the “manliest of men”); with his sister and his beloved mother (Wood shared his studio and sleeping quarters with his mother until her death at seventy-seven; he was forty-four). We see Wood’s homosexuality and how his studied masculinity was a ruse that shaped his work. Here is Wood’s life and work explored more deeply and insightfully than ever before. Drawing on letters, the artist’s unfinished autobiography, his sister’s writings, and many never-before-seen documents, Evans’s book is a dimensional portrait of a deeply complicated artist who became a “National Symbol.” It is as well a portrait of the American art scene at a time when America’s Calvinistic spirit and provincialism saw Europe as decadent and artists were divided between red-blooded patriotic men and “hothouse aesthetes.” Thomas Hart Benton said of Grant Wood: “When this new America looks back for landmarks to help gauge its forward footsteps, it will find a monument standing up in the midst of the wreckage . . . This monument will be made out of Grant Wood’s works.”

Weapons of Mass Migration Kelly M. Greenhill,2011-06-23 At first glance, the U.S. decision to escalate the war in Vietnam in the mid-1960s, China's position on North Korea's nuclear program in the late 1990s and early 2000s, and the EU resolution to lift what remained of the arms embargo against Libya in the mid-2000s would appear to share little in common. Yet each of these seemingly unconnected and far-reaching foreign policy decisions resulted at least in part from the exercise of a unique kind of coercion, one predicated on the intentional creation, manipulation, and exploitation of real or threatened mass population movements. In *Weapons of Mass Migration*, Kelly M. Greenhill offers the first systematic examination of this widely deployed but largely unrecognized instrument of state influence. She shows both how often this unorthodox brand of coercion has been attempted (more than fifty times in the last half century) and how successful it has been (well over half the time). She also tackles the questions of who employs this policy tool, to what ends, and how and why it ever works. Coercers aim to affect target states' behavior by exploiting the existence of competing political interests and groups, Greenhill argues, and by manipulating the costs or risks imposed on target state populations. This coercion by punishment strategy can be effected in two ways: the first relies on straightforward threats to overwhelm a target's capacity to accommodate a refugee or migrant influx; the second, on a kind of norms-enhanced political blackmail that exploits the existence of legal and normative commitments to those fleeing violence, persecution, or privation. The theory is further illustrated and tested in a variety of case studies from Europe, East Asia, and North America. To help potential targets better respond to-and protect themselves against-this kind of unconventional predation, *Weapons of Mass Migration* also offers practicable policy recommendations for scholars, government officials, and anyone concerned about the true victims of this kind of coercion—the displaced themselves.

National Security and Policy in America Wesley S. McCann,Francis D. Boateng,2019-11-28 This book investigates the strategic use of America’s historical crime control, counterterrorism, national security and immigration policies as a mechanism in the modern-day Trump administration to restrict migration and refugee settlement with a view of promoting national security and preservation. National Security and

Policy in America critically explores how American culture, neocolonial aspirations, and indifference towards others negatively impact long-term global security. This book examines immigration and security policies and their origins, purpose, impact, and evolution vis-à-vis the recently imposed 'travel ban' and proposed border wall across the Southern border, as well as how foreign policy influenced many of the migration flows that are often labeled as security risks. The book also seeks to understand why immigration has been falsely associated with crime, terrorism, and national insecurity, giving rise to counterproductive policies, despite evidence that immigrants face intolerance and turmoil due to the powerful distinctions between them and the native-born. This book uses an interdisciplinary framework in examining the U.S.' current response to immigration and security and will thus appeal to undergraduate and graduate students of law, social justice, criminology, critical theory, neo-colonialism, security studies, policing, migration, and political science, as well as those interested in the practical questions of public administration.

The Politics of Protection Elizabeth G. Ferris, 2011-05-01 For the past decade, humanitarian actors have increasingly sought not only to assist people affected by conflicts and natural disasters, but also to protect them. At the same time, protection of civilians has become central to UN peacekeeping operations, and the UN General Assembly has endorsed the principle that the international community has the responsibility to protect people when their governments cannot or will not do so. Elizabeth Ferris explores the evolution of the international community's understandings of protection, with a particular emphasis on the humanitarian community. Protection is a noble word, with positive connotations, but what does it actually mean in practice? Does providing assistance to vulnerable people protect them, for example? Does monitoring the number of rapes protect women? Does increased engagement in protection activities by humanitarian agencies jeopardize the cornerstone humanitarian principles of neutrality and impartiality? In *The Politics of Protection*, Ferris examines inconsistent ways in which protection is defined and applied. For example, why do certain groups receive international protection while other equally needy groups do not? Her case studies, ranging from Iraq to Katrina, illustrate the challenges—and limitations—of protecting vulnerable populations from the ravages of war and natural disasters. Ferris argues that the protection paradigms currently in use are inadequate to meet the challenges of the future, such as climate change, protracted displacement, and the changing nature of warfare.

Child Migration and Human Rights in a Global Age Jacqueline Bhabha, 2016-05-17 The first comprehensive look at the global dilemma of child migration Why, despite massive public concern, is child trafficking on the rise? Why are unaccompanied migrant children living on the streets and routinely threatened with deportation to their countries of origin? Why do so many young refugees of war-ravaged and failed states end up warehoused in camps, victimized by the sex trade, or enlisted as child soldiers? This book provides the first comprehensive account of the widespread but neglected global phenomenon of child migration, exploring the complex challenges facing children and adolescents who move to join their families, those who are moved to be exploited, and those who move simply to survive. Spanning several

continents and drawing on the stories of young migrants, *Child Migration and Human Rights in a Global Age* provides a comprehensive account of the widespread and growing but neglected global phenomenon of child migration and child trafficking. It looks at the often-insurmountable obstacles we place in the paths of adolescents fleeing war, exploitation, or destitution; the contradictory elements in our approach to international adoption; and the limited support we give to young people brutalized as child soldiers. Part history, part in-depth legal and political analysis, this powerful book challenges the prevailing wisdom that widespread protection failures are caused by our lack of awareness of the problems these children face, arguing instead that our societies have a deep-seated ambivalence to migrant children—one we need to address head-on. *Child Migration and Human Rights in a Global Age* offers a road map for doing just that, and makes a compelling and courageous case for an international ethics of children's human rights.

Regional Economic Outlook, April 2017, Western Hemisphere Department International Monetary Fund. Western Hemisphere Dept., 2017-05-19 With the global economy gaining some momentum, economies of Latin America and the Caribbean are recovering from a recession at the regional level in 2016. This gradual improvement can be understood as tale of two adjustments, external and fiscal, that are ongoing in response to earlier shocks. But headwinds from commodity terms-of-trade shocks and country-specific domestic factors are fading, paving the way for real GDP to grow by about 1 percent in 2017. Regional activity is expected to pick up further momentum in 2018, but at a slower pace than previously anticipated, while medium-term growth is projected to remain modest at about 2.6 percent. The outlook is shaped by key shifts in the global economic and policy landscape—where slow growth, low productivity, and high income inequality are creating pressure for a shift toward inward-looking policies in some advanced economies. Domestic fundamentals and developments, however, will continue to play a significant role in determining growth for the region. At the same time, risks to the outlook have widened in a setting of higher global uncertainty. In this challenging external context, countries should aim for completing fiscal and external adjustments to preserve or rebuild policy buffers. Charting a course toward higher, sustainable, and more equitable growth will also require strengthening structural reforms. Specifically, closing infrastructure gaps, improving the business environment, governance, and education outcomes, and encouraging female labor participation are necessary to boost medium-term growth and foster income convergence. Chapters in this report examine the ongoing external adjustment to terms-of-trade shifts, drivers of capital flows to the region, the role of the investor base, and macroeconomic impact of migration and remittances.

Religion and the Rise of Populism Daniel Nilsson DeHanas, Marat Shterin, 2020-06-29 Populism is on the rise around the world. Since 2016, with the US presidential election and the Brexit debate in the UK, populism has taken a central place in global discussions on democracy. This book aims to correct the oversight that, although religion has played a key role in populism in many countries, it has been curiously neglected in recent academic debates. The authors use case studies from around the world to provide global insights into this issue. The first part of the book focuses on the West, with authors exploring the important role of Anglican voters in the Brexit referendum; rural and pre-millennialist American support for Donald Trump; and the rise of political rhetoric on Muslims in Germany, Switzerland, and Austria. The book then moves beyond the West to consider leaders and political parties in Turkey, Macedonia, Greece, Kyrgyzstan, and Kazakhstan. The authors consider varied populist types, from more established 'ruling populists' to young upstart movements. This wide-ranging volume redefines the concept of populism as a political style that sets a 'sacred people' apart from its enemies, providing a timely yet grounded account that will stimulate further research and public debate. It was originally published as a special issue of the
