Ethics for the Information Age Michael Jay Quinn, 2006 Widely praised for its balanced treatment of computer ethics, *Ethics for the Information Age* offers a modern presentation of the moral controversies surrounding information technology. Topics such as privacy and intellectual property are explored through multiple ethical theories, encouraging readers to think critically about these issues and to make their own ethical decisions.

**The Next Digital Decade** Berin Szoka, Adam Marcus, 2011-06-10

The Digital Humanist Domenico Fiormonte, Teresa Numerico, Francesca Tomasi, 2015 This book offers a critical introduction to the core technologies underlying the Internet from a humanistic perspective. It provides a cultural critique of computing technologies, by exploring the history of computing and examining issues related to writing, representing, archiving and searching. The book raises awareness of, and calls for, the digital humanities to address the challenges posed by the linguistic and cultural divides in computing, the clash between communication and control, and the biases inherent in networked technologies. A common problem with publications in the Digital Humanities is the dominance of the Anglo-American perspective. While seeking to take a broader view, the book attempts to show how cultural bias can become an obstacle to innovation both in the methodology and practice of the Digital Humanities. Its central point is that no technological instrument is culturally unbiased, and that all too often the geography that underlies technology coincides with the social and economic interests of its producers. The alternative proposed in the book is one of a world in which variation, contamination and decentralization are essential instruments for the production and transmission of digital knowledge. It is thus necessary not only to have spaces where DH scholars can interact (such as international conferences, THATCamps, forums and mailing lists), but also a genuine sharing of technological know-how and experience. This is a truly exceptional work on the subject of the digital....Students and scholars new to the field of digital humanities will find in this book a gentle introduction to the field, which I cannot but think would be good and perhaps even inspirational for them....Its history of the development of machines and programs and communities bent on using computers to advance science and research merely sets the stage for an insightful analysis of the role of the digital in the way both scholars and everyday people communicate and conceive of themselves and others in written forms - from treatises to credit card transactions. Peter Shillingsburg *The Digital Humanist* is not simply a translation of the Italian book *L'umanista digitale* (il Mulino 2010), but a new version tailored to an international audience through the improvement and expansion of the sections on social, cultural and ethical problems of the most widely used methodologies, resources and applications. TABLE OF CONTENTS // Preface: Digital Humanities at a Political Turn? by Geoffrey Rockwell / PART I: The Socio-Historical Roots - Chap. 1: Technology and the Humanities: A History of Interaction - Chap. 2: Internet, or The Humanistic Machine / PART II: Theoretical and Practical Dimensions - Chap. 3: Writing and Content Production - Chap. 4: Representing and Archiving - Chap. 5: Searching and Organizing / Conclusions: DH in a Global Perspective

**Criminal E-discovery** Federal Judicial Center, Sean Broderick, Donna Lee Elm, John Haried, Kiran Raj, 2016-09-12 The rapid growth of digital technology and its spread into every facet of life are producing increasingly complex discovery issues in federal criminal cases. There are several advantages to electronically stored information (ESI, or e-discovery), including speed, efficiency, and quality of information. To ensure these benefits are realized, judges and lawyers working on federal criminal cases need guidance on how best to address e-discovery issues. Judges can play a vital oversight role to ensure that e-discovery moves smoothly, trial deadlines are met, and the parties and courts are able to review and identify critical evidence. This pocket guide was developed to help judges manage complex e-discovery in criminal cases. A note of appreciation goes to Judge Xavier Rodriguez (W.D. Tex.), and Magistrate Judges Laurel Beeler (N.D. Cal.) and Jonathan W. Feldman (W.D.N.Y.), for their suggestions and advice, as well as to our fellow members of the Joint Electronic Technology Working Group, who improved this publication.

**Recent Advances in Multimedia Signal Processing and Communications** Mislav Grgic, Kresimir Delac, Mohammed Ghanbari, 2009-09-30 The rapid increase in computing power and communication speed, coupled with computer storage facilities availability, has led to a new age of multimedia applications. Multimedia is practically everywhere and all around us we can feel its presence in almost all applications ranging from online video databases, IPTV, - teractive multimedia and more recently in multimedia based social interaction. These new growing applications require high-quality data storage, easy access to multimedia content and reliable delivery. Moving ever closer to commercial - ployment also aroused a higher awareness of security and intellectual property management issues. All the aforementioned requirements resulted in higher demands on various - eas of research (signal processing, image/video processing and analysis, com- munication protocols, content search, watermarking, etc.). This book covers the most prominent research issues in multimedia and is divided into four main sections: i) content based retrieval, ii) storage

and remote access, iii) watermarking and co- right protection and iv) multimedia applications. Chapter 1 of the first section presents an analysis on how color is used and why is it crucial in nowadays multimedia applications. In chapter 2 the authors give an overview of the advances in video abstraction for fast content browsing, transmission, retrieval and skimming in large video databases and chapter 3 extends the discussion on video summarization even further. Content retrieval problem is tackled in chapter 4 by describing a novel method for producing meaningful segments suitable for MPEG-7 description based on binary partition trees (BPTs).

**Banking on Beauty** Adam Arenson, 2018-01-21 "I want buildings that will be exciting seventy-five years from now," financier Howard Ahmanson told visual artist Millard Sheets, offering him complete control of design, subject, decoration, and budget for his Home Savings and Loan branch offices. The partnership between Home Savings—for decades, the nation's largest savings and loan—and the Millard Sheets Studio produced more than 160 buildings in California, Texas, Florida, New York, Ohio, Illinois, and Missouri over the course of a quarter century. Adorned with murals, mosaics, stained glass, and sculptures, the Home Savings (and Savings of America) branches displayed a celebratory vision of community history and community values that garnered widespread acclaim. *Banking on Beauty* presents the first history of this remarkable building program. Drawing extensively on archival materials, site visits, and oral history interviews, Adam Arenson tells a fascinating story of how the architecture and art were created, the politics of where the branches were built, and why the Sheets Studio switched from portraying universal family scenes to celebrating local history amid the dramatic cultural and political changes of the 1960s. Combining urban history, business history, and art and architectural history, *Banking on Beauty* reveals how these institutions shaped the corporate and cultural landscapes of Southern California, where many of the branches were located. Richly illustrated and beautifully written, *Banking on Beauty* builds a convincing case for preserving these outstanding examples of Midcentury Modern architecture, which currently face an uncertain future.

**Web Dragons** Ian H. Witten, Marco Gori, Teresa Numerico, 2010-07-27 *Web Dragons* offers a perspective on the world of Web search and the effects of search engines and information availability on the present and future world. In the blink of an eye since the turn of the millennium, the lives of people who work with information have been utterly transformed. Everything we need to know is on the web. It's where we learn and play, shop and do business, keep up with old friends and meet new ones. Search engines make it possible for us to find the stuff we need to know. Search engines — web dragons — are the portals through which we access society's treasure trove of information. How do they stack up against librarians, the gatekeepers over centuries past? What role will libraries play in a world whose information is ruled by the web? How is the web organized? Who controls its contents, and how do they do it? How do search engines work? How can web visibility be exploited by those who want to sell us their wares? What's coming tomorrow, and can we influence it? As we witness the dawn of a new era, this book shows readers what it will look like and how it will change their world. Whoever you are: if you care about information, this book will open your eyes and make you blink. Presents a critical view of the idea of funneling information access through a small handful of gateways and the notion of a centralized index--and the problems that may cause Provides promising approaches for addressing the problems, such as the personalization of web services Presented by authorities in the field of digital libraries, web history, machine learning, and web and data mining Find more information at the author's site: [webdragons.net](http://webdragons.net)

*Web Search: Public Searching of the Web* Amanda Spink, Bernard J. Jansen, 2004-07-21 Web Search: Public Searching of the Web, co-authored by Drs. Amanda Spink and Bernard J. Jansen, is one of the first manuscripts that address the human - system interaction of Web searching in a thorough and complete manner. The authors provide an examination of Web searching from multiple levels of analysis, from theoretical overview to detailed study of term usage, and integrate these different levels of analysis into a coherent picture of how people locate information on the Web using search engines. Drawing primarily on their own research and work in the field, the authors present the temporal changes in, the growth of, and the stability of how people interact with Web search engines. Drs. Spink and Jansen present results from an analysis of multiple search engine data sets over a six year period, giving a firsthand account of the emergence of Web searching. They also compare and contrast their findings to the results of other researchers in the field, providing a valuable bibliographic resource. This research is directly relevant to those interested in providing information or services on the Web, along with those who research and study the Web as an information resource. Graduate students, academic and corporate researchers, search engine designers, information architects, and search engine optimizers will find the book of particular benefit.

*How to Teach Programming (and Other Things)* Greg Wilson, 2017-05-27 This book is a brief introduction to modern evidence-based teaching practices and how to use them to teach programming to free-range learners. It covers: how people's thinking changes as they go from being novices to competent practitioners and then to being experts ; how to tell if your learners are keeping up with you, and what to do or say when they're not ; how to design and improve lessons efficiently and collaboratively ; how and why live coding (i.e., writing programs step by step in front of learners) is a better way to teach programming than lectures or self-directed practice ; and how insights and techniques borrowed from the performing arts can make you a better teacher.-- Publisher's website.

Shakespeare Unrehearsed: A Practical Guide to Acting and Producing Spontaneous Shakespeare outlines how Shakespeare's plays can be performed effectively without rehearsal, if all the actors understand a set of performance guidelines and put them into practice. Each chapter is devoted to a specific guideline, demonstrating through examples how it can be applied to pieces of text from Shakespeare's First Folio, how it creates blocking and stage business, and how it enhances story clarity. Once the guidelines have been established, practical means of production are discussed, providing the reader with sufficient step-by-step instruction to prepare for Unrehearsed performances.
