Lindsay Leslie

Nova Samuel R. Delany, 2002-06-11 Given that the suns of Draco stretch almost sixteen light years from end to end, it stands to reason that the cost of transportation is the most important factor of the 32nd century. And since Illyrion is the element most needed for space travel, Lorq von Ray is plenty willing to fly through the core of a recently imploded sun in order to obtain seven tons of it. The potential for profit is so great that Lorq has little difficulty cobbling together an alluring crew that includes a gypsy musician and a moon-obsessed scholar interested in the ancient art of writing a novel. What the crew doesn't know, though, is that Lorq's quest is actually fueled by a private revenge so consuming that he'll stop at nothing to achieve it. In the grandest manner of speculative fiction, *Nova* is a wise and witty classic that casts a fascinating new light on some of humanity's oldest truths and enduring myths.

**Terra Nova** MtG, 2020-07-23 Evangeline is living the life of a normal teenager—going to school and hanging out with friends—until mysterious, severe symptoms begin appearing. After passing out in the middle of a party, life as she knows it spirals beyond her grasp. She is then diagnosed with a rare, genetic blood disorder that causes her body's white blood cells to kill the red ones. In the delirium of her deteriorating health, a door to a parallel world opens before her; however, once she steps through it, the portal closes, and she is unable to return to Earth. The place Evangeline now finds herself in is called Terra Nova, a world wherein vampires rule supreme, with no traces of humanity left to speak of. Curious but afraid, she quickly learns that Terra Nova is not the shadow-side of Earth, but rather the tragic result of government experimentation. In order to survive, she must keep her mind open and accept the changes her body is undergoing; soon enough, those who she initially thinks are murderers become her trainers, whose help she must enlist if she ever hopes to return home—and soon enough, a romantic bond begins to bloom. Meanwhile, Evangeline's brother and friends back on Earth try to figure out what happened to her, and how the government is involved, and how to bring her home. Unbeknownst to any of them is the mysterious outcast Bambi, whose secrecy disguises her power in making a devastating choice: save one world at the risk of destroying the other.

Nova. (Spectre War, Book 1.) Margaret Fortune, 2016-06-07 Lia, a genetically-engineered human bomb, is sent to the New Sol Space Station in order to destroy it, but when her internal clock malfunctions, she must find a way to diffuse the bomb within her and attempt to live a normal, human life.

*Nova Swing* M. John Harrison, 2007-11-08 It is some time after Ed Chianese's trip into the Kefahuchi Tract. A major industry of the Halo is now tourism. The Tract has begun to expand and change, but, more problematically, parts of it have also begun to fall to earth, piecemeal, on the Beach planets. We are in a city, perhaps on New Venusport or Motel Splendido: next to the city is the event site, the zone, from out of which pour new, inexplicable artefacts, organisms and escapes of living algorithm - the wrong physics loose in the universe. They can cause plague and change. An entire department of the local police, Site Crime, exists to stop them being imported into the city by adventurers, entradistas, and the men known as 'travel agents', profiteers who can manage - or think they can manage - the bad physics, skewed geographies and psychic onslaughts of the event site. But now a new class of semi-biological artefact is finding its way out of the site, and this may be more than anyone can handle.

**Caring for the Newborn** Donald E. Greydanus, 2021 This book summarizes the state of cognoscibility regarding normal newborn care that has been accumulated over the past centuries, especially the 20th and now 21st century. The preface/introduction details historical concepts that have followed newborns over the millennia of *Homo sapiens sapiens*' existence, such as infanticide, breast feeding, swaddling, neonatal resuscitation, and principles of caring for newborns. The mortality rate of newborns has been reduced in many parts of the world in the past two centuries, and we have learned much about how to keep increasing numbers of newborns alive and healthy. This is especially seen when healthcare providers and society collaborate in this important endeavor that includes emphasizing known preventive principles. Current modern pediatric and perinatal treatments allow newborns in the current 21st century America to have a start on an overall life expectancy of 78.5 years (up to 76 years in males and 80.9 years in females) if they receive meticulous medical care, and even if they are born into a penurious state. Such deserved care and inevitable medical discoveries will only lengthen these life trajectories. This second edition updates principles of caring for the newborn that were identified in the first edition. It considers the newborn examination, newborn screening, safe-sleep concepts, mother and newborn skin-to-skin contact, effects of prenatal drug use, mental health issues in the newborn, maternal mood disorders, infant feeding, circumcision, anticipatory guidance, and concepts of surgery in the newborn. Also considered are selective disorders found in some newborns that includes newborn neurology, cardiology, pulmonology, nephrology, gastroenterology, endocrinology and dermatology--

**NoVA** James Boice, 2008-12-30 Grayson Donald, seventeen years old, has just hanged himself from a basketball hoop

next to a playground in Centreville, North Virginia (NoVA). The question is, Why? In this incisive dissection of the author's hometown, James Boice scratches its shiny suburban surface to reveal a place formed from a cloud that slid west and met with the humidity and spent buckshot cartridges and Civil War bones clad in blue and gray to create concrete and vinyl siding and front yards laid in chunks, child care centers and video rental places. An exciting new voice in fiction, James Boice blends sharp social observations with dark humor and remarkable prose. In both passing glimpses and intimate interior monologues, we come to know Grayson's family, his fellow students, his neighbors, and many who knew him only slightly, if at all. A portrait of a town emerges that renders Grayson's suicide both devastating and inevitable. NoVA is a unique and fascinating depiction of the American suburb.

**Nova** Samuel R. Delany, 1968 Nominally space opera, the novel explores the politics and culture of a future where cyborg technology is universal (the novel is one of the precursors to cyberpunk), yet making major decisions can involve using tarot cards.

**The Walls Around Us** Nova Ren Suma, 2014-12-12 SPECIAL PREVIEW! "Ori's dead because of what happened out behind the theater, in the tunnel made out of trees. She's dead because she got sent to that place upstate, locked up with those monsters. And she got sent there because of me." The Walls Around Us is a ghostly story of suspense told in two voices--one still living and one long dead. On the outside, there's Violet, an eighteen-year-old dancer days away from the life of her dreams when something threatens to expose the shocking truth of her achievement. On the inside, within the walls of a girls' juvenile detention center, there's Amber, locked up for so long she can't imagine freedom. Tying these two worlds together is Orianna, who holds the key to unlocking all the girls' darkest mysteries. We hear Amber's story and Violet's, and through them Orianna's, first from one angle, then from another, until gradually we begin to get the whole picture--which is not necessarily the one that either Amber or Violet wants us to see. Nova Ren Suma tells a supernatural tale of guilt and innocence, and what happens when one is mistaken for the other. Praise for *Imaginary Girls*: "A surreal and dreamy world where magical thinking is carried to a chilling extreme." --Publishers Weekly, starred review Praise for *17 & Gone*: "Suma's exquisite sentence-level writing and fine eye for creepy detail are in abundant evidence." --Kirkus Reviews

**Terra Nova** Henriette Lazaridis, 2022-12-06 A haunting story of love, art, and betrayal, set against the heart-pounding backdrop of Antarctic exploration--from the Boston Globe bestselling author of *The Clover House*. "Ingenious"--New York Times Book Review The year is 1910, and two Antarctic explorers, Watts and Heywood, are racing to the South Pole. Back in London, Viola, a photo-journalist, harbors love for them both. In *Terra Nova*, Henriette Lazaridis seamlessly ushers the reader back and forth between the austere, forbidding, yet intoxicating polar landscape of Antarctica to the bustle of early twentieth century London. Though anxious for both men, Viola has little time to pine. She is photographing hunger strikers in the suffrage movement, capturing the female nude in challenging and politically powerful ways. As she comes into her own as an artist, she's eager for recognition and to fulfill her ambitions. And then the men return, eager to share news of their triumph. But in her darkroom, Viola discovers a lie. Watts and Heywood have doctored their photos of the Pole to fake their success. Viola must now decide whether to betray her husband and her lover, or keep their secret and use their fame to help her pursue her artistic ambitions. Rich and moving, *Terra Nova* is a novel that challenges us to consider how love and lies, adventure and art, can intersect.
