Starcraft: Ghost--Nova Blizzard Entertainment,Keith R. A.
DeCandido,2007-05-01 Four years after the end of the Brood War, Emperor
Arcturus Mengsk has rebuilt much of the Terran Dominion and consolidated a
new military force despite an ever-present alien threat. Within this boiling
cauldron of strife and subversion, a young woman known only as Nova shows the
potential to become Mengsk's most lethal and promising Ghost operative.
Utilizing a combination of pure physical aptitude, innate psychic power, and
advanced technology, Nova can strike anywhere with the utmost stealth. Like a
phantom in the shadows, she exists only as a myth to the enemies of the
Terran Dominion. Yet Nova wasn't born a killer. She was once a privileged
child of one of the Old Families of the Terran Confederacy, but her life
changed forever when a rebel militia murdered her family. In her grief, Nova

unleashed her devastating psychic powers, killing hundreds in a single, terrible moment. Now, on the run through the slums of Tarsonis, she is unable to trust anyone. Pursued by a special agent tasked with hunting down rogue telepaths, Nova must come to terms with both her burgeoning powers and her guilt -- before they consume her and destroy everything in her path....

Ultra-processed foods, diet quality and human health Food and Agriculture Organization of the United Nations,2019-07-31 The significance of industrial processing for the nature of food and the state of human health - and in particular the techniques and ingredients developed by modern food science and technology - is generally underestimated. This is evident in both national and international policies and strategies designed to improve populations' nutrition and health. Until recently it has also been neglected in epidemiological and experimental studies concerning diet, nutrition and health. This report seeks to assess the impact of ultra-processed food on diet quality and health, based on NOVA, a food classification system developed by researchers at the University of Sao Paulo, Brazil.

Brain Rules John Medina, 2014-09-01 An updated and expanded edition of the international bestseller *Most of us have no idea what's really going on inside our heads. Yet brain scientists have uncovered details that every business leader, parent, and teacher should know – for instance, that physical activity helps to get your brain working at its best. How do we learn? What do sleep and stress do to our brains? Why is multitasking a myth? Why is it so easy to forget – and so important to repeat new information? In Brain Rules, Dr John Medina, a molecular biologist, shares his lifelong interest in brain science, and how it can influence the way we teach our children and the way we work. In each chapter, he describes a brain rule – what scientists know for sure about how our brains work – and offers transformative ideas for our daily lives. In this expanded edition – which includes additional information on the brain rules and a new chapter on music – you will discover how every brain is wired differently, why memories are volatile, and how stress and sleep can influence learning. By the end, you'll understand how your brain really works – and how to get the most out of it.*
