Elementary Principles of Chemical Processes, 3rd Edition 2005 Edition Integrated Media and Study Tools, with Student Workbook Richard M. Felder, Ronald W. Rousseau, 2005-02-02 This best selling text prepares students to formulate and solve material and energy balances in chemical process systems and lays the foundation for subsequent courses in chemical engineering. The text provides a realistic, informative, and positive introduction to the practice of chemical engineering. The Integrated Media Edition update provides a stronger link between the text, media supplements, and new student workbook.

Genome Mapping and Genomics in Animal-Associated Microbes Vishvanath Nene, Chittaranjan Kole, 2008-11-24 Achievements and progress in genome mapping and the genomics of microbes supersede by far those for higher plants and animals, in part due to their enormous economic implication but also smaller genome size. In the post-genomic era, whole genome sequences of animal-associated microbes are providing clues to depicting the genetic basis of the complex host-pathogen relationships and the evolution of parasitism; and to improving methods of controlling pathogens. This volume focuses on a globally important group of intracellular prokaryotic pathogens which affect livestock animals. These include Brucella, Mycobacterium, Anaplasma and Ehrlichia, as well as the protozoan pathogens Cryptosporidium and Theileria, for which genome sequence data is available. Insights from comparative genomics of the microbes described provide clues to the adaptation involved in host-microbe interactions, as well as resources potentially useful for application in future research and product development.

Handbook on Pressurized Irrigation Techniques Andreas Phocaides, Food and Agriculture Organization

of the United Nations,2007 Increasing the efficiency of water use and enhancing agricultural water productivity at all levels of the production chains are becoming priorities in a growing number of countries. In particular, shifting to modern on-farm irrigation practices can contribute to a substantial increase in both water use efficiency and water productivity. The objective of this handbook is to provide a practical guide on the use of pressurized irrigation techniques to farmers, irrigation technicians, and extension workers in the field. In this second edition, the handbook has been considerably revised, including new chapters on low-cost drip irrigation and pipe distribution systems for smallholders.--Publisher's description.

Unicode Demystified Richard Gillam,2003 Unicode is a critical enabling technology for developers who want to internationalize applications for global environments. But, until now, developers have had to turn to standards documents for crucial information on utilizing Unicode. In Unicode Demystified, one of IBM's leading software internationalization experts covers every key aspect of Unicode development, offering practical examples and detailed guidance for integrating Unicode 3.0 into virtually any application or environment. Writing from a developer's point of view, Rich Gillam presents a systematic introduction to Unicode's goals, evolution, and key elements. Gillam illuminates the Unicode standards documents with insightful discussions of character properties, the Unicode character database, storage formats, character sequences, Unicode normalization, character encoding conversion, and more. He presents practical techniques for text processing, locating text boundaries, searching, sorting, rendering text, accepting user input, and other key development tasks. Along the way, he offers specific guidance on integrating Unicode with other technologies, including Java, JavaScript, XML, and the Web. For every developer building

internationalized applications, internationalizing existing applications, or interfacing with systems that already utilize Unicode.

Computer Vision – ECCV 2020 Andrea Vedaldi, Horst Bischof, Thomas Brox, Jan-Michael Frahm, 2020-12-02 The 30-volume set, comprising the LNCS books 12346 until 12375, constitutes the refereed proceedings of the 16th European Conference on Computer Vision, ECCV 2020, which was planned to be held in Glasgow, UK, during August 23-28, 2020. The conference was held virtually due to the COVID-19 pandemic. The 1360 revised papers presented in these proceedings were carefully reviewed and selected from a total of 5025 submissions. The papers deal with topics such as computer vision; machine learning; deep neural networks; reinforcement learning; object recognition; image classification; image processing; object detection; semantic segmentation; human pose estimation; 3d reconstruction; stereo vision; computational photography; neural networks; image coding; image reconstruction; object recognition;

motion estimation.

Integrating Human Aspects in Production Management Gert Zülch,Harinder Singh Jagdev,Patricia Stock,2004-11-09 In recent years the situation of production enterprises has been aggravated by the change from a vendors' market to a buyers' market, the globalisation of competition, a severe market segmentation and rapid progress in product and process technologies. Beside cost and quality, time has taken on an increasingly important role, forcing enterprises to become ever more dynamic and versatile. Therefore, in all areas of production management, novel, effective concepts, procedures and tools have been developed in order to meet these new requirements. But beyond these more technical, organisational and information technology related aspects there is certainly another one which has to be considered more closely than ever before, namely that of human resources. Is not group technology also related to group work? Do partners in a global network only operate according to predefined process schemes with no personal contact? Are the mental process models of the programmers of ERP-systems the same as those of the users? What is the impact of human behaviour and what consequences are to be expected if organisational and individual objectives are separated? And finally, how do necessary technological changes affect the workforce and the individual needs and wishes of the employees.

Handbook of Nature-Inspired and Innovative Computing Albert Y. Zomaya,2006-01-10 As computing devices proliferate, demand increases for an understanding of emerging computing paradigms and models

based on natural phenomena. Neural networks, evolution-based models, quantum computing, and DNA-based computing and simulations are all a necessary part of modern computing analysis and systems development. Vast literature exists on these new paradigms and their implications for a wide array of applications. This comprehensive handbook, the first of its kind to address the connection between nature-inspired and traditional computational paradigms, is a repository of case studies dealing with different problems in computing and solutions to these problems based on nature-inspired paradigms. The Handbook of Nature-Inspired and Innovative Computing: Integrating Classical Models with Emerging Technologies is an essential compilation of models, methods, and algorithms for researchers, professionals, and advanced-level students working in all areas of computer science, IT, biocomputing, and network engineering.

The Shoulder Jenny T. Bencardino, 2019-06-24 This book covers all aspects of imaging diagnosis of shoulder disorders from a clinical perspective. After discussion of relevant imaging techniques, a wide spectrum of disorders is addressed in a series of dedicated chapters on rotator cuff injuries and impingement syndromes, biceps tendon and rotator interval pathology, glenohumeral instability, SLAP tears and microinstability, shoulder girdle fractures, shoulder arthropathies, tumors and tumor-like conditions, and entrapment neuropathies. Separate consideration is also given to the pediatric shoulder and to preoperative planning, postoperative imaging, and surgical techniques in patients undergoing shoulder arthroplasty. The unique anatomy and range of motion of the shoulder joint can present a diagnostic challenge. Characterization of soft tissue injuries and radiographically occult osseous pathology is often facilitated by the use of advanced imaging techniques, including MRI, CT, and ultrasound. Readers will find this excellently

illustrated book to be an invaluable aid to diagnostic interpretation when employing these techniques.

Felder's Elementary Principles of Chemical Processes Richard M. Felder, Ronald W. Rousseau, Lisa G. Bullard, 2016-10-19 *Felder's Elementary Principles of Chemical Processes* prepares students to formulate and solve material and energy balances in chemical process systems and lays the foundation for subsequent courses in chemical engineering. The text provides a realistic, informative, and positive introduction to the practice of chemical engineering. This classic text has provided generations of aspiring chemical engineers with a solid foundation in the discipline – engineering problem analysis, material balances and energy balances. Richard Felder is a recognized global leader in the field of engineering education and this text embodies a lifetime of study and practice in effective teaching techniques. The text is in use at more than 4 out of 5 chemical engineering programs in the US.

Blizzards and Broken Grouzers Les R. Denham, 2020-09-30 Depicting the pioneering spirit of geophysics, this memoir recounts Antarctic field operations in 1970–71 acquiring ice thickness data with radar, gravity, and magnetometer measurements. The data collected now underpin models of ice behavior used to assess climate change.

Inborn Metabolic Diseases K. Tada, N.R.M. Buist, John Fernandes, Jean-Marie Saudubray, Georges van den Berghe, 2013-03-14 Each disease-related chapter begins with a detailed description of the patient and the delineating symptoms used for establishing the diagnosis and differential diagnosis. The highly detailed figures illustrate the metabolic derangement in a uniform way, together with essential aspects of the genetics involved, thus affording clarification and better understanding of the treatment. Topics covered

range from general aspects such as the clinical approach, emergency treatment, diagnostic procedures, and psychosocial care for the child and the family, to specific discussions of new modes of treatment, including liver, bone marrow transplantation and somatic gene therapy.
