Religion in Philanthropic Organizations Thomas J. Davis, 2013-09-26 Religion in Philanthropic Organizations explores the tensions inherent in religious philanthropies across a variety of organizations and examines the effect assumptions about professional philanthropy have had on how religious philanthropies carry out their activities. Among the organizations discussed are the Salvation Army, the World Council of Churches, and Catholic Charities USA. The essays focus on the work of one individual, Robert Pierce, founder of World Vision and Samaritan's Purse, and on more general matters such as philanthropy and Jewish identity, American Muslim philanthropy since 9/11, and the federal program that funds faith-based initiatives. The book sheds light on how religion and philanthropy function in American society, shaping and being shaped by the culture and its notions of the common good.

Risk-sharing in the Pharmaceutical Industry Gerrit Reepmeyer, 2005-12-05 The productivity in pharmaceutical research and development faces intense pressure. R&D expenditures of the major US and European companies have topped US\$ 33 billion in 2003 compared to around US\$ 13 billion just a decade ago. At the same time, the number of new drug approvals has dropped from 53 in 1996 to only 35 in 2003. Moreover, the protraction of clinical trials has significantly reduced the effective time of patent protection. The consequences are devastating. Monopoly profits have started to decline and the average costs per new drug have reached a record level of close to US\$ 1 billion today. As a result, any failure of a new substance in the R&D process can lead to considerable losses, and the risks of introducing a new drug to the market have grown tremendously. Particularly if a company is highly dependent on just a handful of mega-selling blockbuster drugs, the risks can be even greater. For example, Pfizer generated about 90% of its worldwide revenues in 2002 with just 8 products. Any shortfall of a promising late-stage drug candidate would have left Pfizer with a gaping hole in its product portfolio. In order to deal with these risks, many pharmaceutical companies have started to organize their R&D in partnership. In fact, more than 600 alliances in pharmaceutical R&D are signed every year.

Patents for Development Nefissa Chakroun, 2016-05-27 This book investigates whether it is possible to execute the disclosed technologies just by reading the patent application. Nefissa Chakroun argues that while TRIPS Agreement obliges inventors to disclose full and complete disclosure, patent information users lack the capacity to fully utilise such information for their economic development. The book offers a critical analysis of the disclosure requirements of the patent system as well as an in-depth examination of the ways in accessing and retrieving patent information. Chakroun articulates proposals for strengthening the disclosure and methods for enhancing retrieval and exploitation of the technological knowledge, including an integrated policy on how patent information could be better utilised for development

Smart Grid Redefined: Transformation of the Electric Utility Subramanian Vadari, 2018-02-28 Written by a leading expert in the utility field, this practical resource guides professionals in the evolution of the Smart Grid and offers insight into distribution automation, storage, and microgrid. This book highlights the journey to a transformed electric utility, provides solid examples, and includes real-world case studies. Readers find guidance on new energy storage solutions and electric value chain disruptors. Professionals learn how to overcome challenges related to integrating supply and demand diversity. The book highlights how new technologies impact the day-to-day operations of a utility and how these technologies can transform the normal functioning of the utility. Discussions are provided about how a transformed utility can be a springboard to a smart city. Professionals will be able to apply the strategies of technologies in this resource to guide them to success in the field. This book defines the roadmap to the utility of the future and provides a vision for how utilities can thrive in their new environment.

London After Recession Dr Andrew Calcutt, Dr Iain MacRury, Professor Gavin Poynter, 2012-10-28 The City has long been the main generator of London's wealth and, needless to say, the impact of the Economic Crisis in the recent years on the City has greatly affected the wider urban and surrounding region, not to say country as a whole. This book examines the impact of the recession and discusses London's future trajectory as an entrepreneurial city and capital of the United Kingdom. While recognising the enduring capacity of London to 'reinvent' itself - from being the centre of a vast Empire to becoming a global centre for financial and business services - contributors evaluate different dimensions of the city's current and future development through analyses derived from sociological, economic, cultural and urban studies perspectives.

Conservation of Tropical Rainforests Brian Joseph McFarland, 2017-11-14 This book critically engages with how the conservation of tropical rainforests is financed. Beginning with the context of tropical deforestation, alongside an overview of tropical ecology, global environmental policy and finance, the book reviews several conservation financing instruments. These include ecotourism and private reserves, debt-for-nature swaps and government domestic budgetary expenditures for state and national parks. Tropical deforestation and forest degradation are serious global environmental issues, contributing to global climate change, species extinction, and threatening the livelihoods of forest-dependent communities. Yet, many leading companies, individuals and governments are making a positive impact on tropical forest conservation to mitigate greenhouse gas emissions through the use of conservation finance. *Conservation of Tropical Rainforests* tells the history of international conservation finance and provides a variety of options for individuals, businesses, and governments to support conservation financing projects.

Taming the Sun Varun Sivaram, 2019-02-26 How solar could spark a clean-energy transition through transformative innovation—creative financing, revolutionary technologies, and flexible energy systems. Solar energy, once a niche application for a limited market, has become the cheapest and fastest-growing power source on earth. What's more, its potential is nearly limitless—every hour the sun beams down more energy

than the world uses in a year. But in *Taming the Sun*, energy expert Varun Sivaram warns that the world is not yet equipped to harness erratic sunshine to meet most of its energy needs. And if solar's current surge peters out, prospects for replacing fossil fuels and averting catastrophic climate change will dim. Innovation can brighten those prospects, Sivaram explains, drawing on firsthand experience and original research spanning science, business, and government. Financial innovation is already enticing deep-pocketed investors to fund solar projects around the world, from the sunniest deserts to the poorest villages. Technological innovation could replace today's solar panels with coatings as cheap as paint and employ artificial photosynthesis to store intermittent sunshine as convenient fuels. And systemic innovation could add flexibility to the world's power grids and other energy systems so they can dependably channel the sun's unreliable energy. Unleashing all this innovation will require visionary public policy: funding researchers developing next-generation solar technologies, refashioning energy systems and economic markets, and putting together a diverse clean energy portfolio. Although solar can't power the planet by itself, it can be the centerpiece of a global clean energy revolution. *A Council on Foreign Relations Book*

Event Sponsorship and Fundraising Tom Lunt,Eva Nicotra,2018-11-03 Securing sponsorship and other sources of funding for events is becoming increasingly competitive, making differentiation and delivery vital. Event Sponsorship and Fundraising explores this complex area of event management, drawing on both experiential marketing and consumer behaviour theories, and developing critical insights on the dynamics of successful event sponsorship. Its coverage includes professional guidance on prospecting for sponsors, brand activation and evaluation, as well as advice on relationship management, proposal writing and pitching to potential sponsors. Event Sponsorship and Fundraising places each of these concepts at the heart of the Integrated Marketing Communications Mix, alongside cutting edge literature on the topic. Written by two highly experienced industry practitioners, both of which now teach on two of the UK's leading event management degree courses, and supported by a comprehensive set of online resources, this book is an invaluable go-to resource for event management students, tutors and professionals alike.

Smart Environment for Smart Cities T.M. Vinod Kumar,2019-04-04 This book discusses the design and practice of environmental resources management for smart cities. Presenting numerous city case studies, it focuses on one specific environmental resource in each city. Environmental resources are commonly owned properties that require active inputs from the government and the people, and in any smart city their management calls for a synchronous combination of e-democracy, e-governance and IOT (Internet of Things) systems in a 24/7 framework. Smart environmental resources management uses information and communication technologies, the Internet of Things, internet of governance (e-governance) and internet of people (e-democracy) along with conventional resource management tools to achieve coordinated, effective and efficient management, development, and conservation that equitably improves ecological and economic welfare, without compromising the sustainability of development ecosystems and stakeholders.

The New African Diaspora Isidore Okpewho,Nkiru Nzegwu,2009-08-26 The New York Times reports that since 1990 more Africans have voluntarily relocated to the United States and Canada than had been forcibly brought here before the slave trade ended in 1807. The key reason for these migrations has been the collapse of social, political, economic, and educational structures in their home countries, which has driven Africans to seek security and self-realization in the West. This lively and timely collection of essays takes a look at the new immigrant experience. It traces the immigrants' progress from expatriation to arrival and covers the successes as well as problems they have encountered as they establish their lives in a new country. The contributors, most immigrants themselves, use their firsthand experiences to add clarity, honesty, and sensitivity to their discussions of the new African diaspora.

and innovation in the life sciences is driving rapid growth in agriculture, biomedical science, information science and computing, energy, and other sectors of the U.S. economy. This economic activity, conceptually referred to as the bioeconomy, presents many opportunities to create jobs, improve the quality of life, and continue to drive economic growth. While the United States has been a leader in advancements in the biological sciences, other countries are also actively investing in and expanding their capabilities in this area. Maintaining competitiveness in the bioeconomy is key to maintaining the economic health and security of the United States and other nations. Safeguarding the Bioeconomy evaluates preexisting and potential approaches for assessing the value of the bioeconomy and identifies intangible assets not sufficiently captured or that are missing from U.S. assessments. This study considers strategies for safeguarding and sustaining the economic activity driven by research and innovation in the life sciences. It also presents ideas for horizon scanning mechanisms to identify new technologies, markets, and data sources that have the potential to drive future development of the bioeconomy.

Handbook of Drought and Water Scarcity Saeid Eslamian, Faezeh A.

Eslamian, 2017-09-01 This volume includes over 30 chapters, written by experts from around the world. It examines numerous management strategies for dealing with drought and scarcity. These strategies include management approaches for different regions, such as coastal, urban, rural, and agricultural areas.
