*Cities and Their Vital Systems* Advisory Committee on Technology and Society, 1989 *Cities and Their Vital Systems* asks basic questions about the longevity, utility, and nature of urban infrastructures; analyzes how they grow, interact, and change; and asks how, when, and at what cost they should be replaced. Among the topics discussed are problems arising from increasing air travel and airport congestion; the adequacy of water supplies and waste treatment; the impact of new technologies on construction; urban real estate values; and the field of telematics, the combination of computers and telecommunications that makes money machines and national newspapers possible.

Science, the Endless Frontier Vannevar Bush, 2021-02-02 The classic case for why government must support science—with a new essay by physicist and former congressman Rush Holt on what democracy needs from science today *Science, the Endless Frontier* is recognized as the landmark argument for the essential role of science in society and government's responsibility to support scientific endeavors. First issued when Vannevar Bush was the director of the US Office of Scientific Research and Development during the Second World War, this classic remains vital in making the case that scientific progress is necessary to a nation's health, security, and prosperity. Bush's vision set the course for US science policy for more than half a century, building the world's most productive scientific enterprise. Today, amid a changing funding landscape and challenges to science's very credibility, *Science, the Endless Frontier* resonates as a powerful reminder that scientific progress and public well-being alike depend on the successful symbiosis between science and government. This timely new edition presents this iconic text alongside a new companion essay from scientist and former congressman Rush Holt, who offers a brief introduction and consideration of what society needs most from science now. Reflecting on the report's legacy and relevance along with its limitations, Holt contends that the public's ability to cope with today's issues—such as public health, the changing climate and environment, and challenging technologies in modern society—requires a more capacious understanding of what science can contribute. Holt considers how scientists should think of their obligation to society and what the public should demand from science, and he calls for a renewed understanding of science's value for democracy and society at large. A touchstone for concerned citizens, scientists, and policymakers, *Science, the Endless Frontier* endures as a passionate articulation of the power and potential of science.

**The Oxford Handbook of United Nations Peacekeeping Operations** Joachim Koops, Norrie MacQueen, Thierry Tardy, Paul D. Williams, 2015-07-09 The Oxford Handbook on United Nations Peacekeeping Operations presents an innovative, authoritative, and accessible examination and critique of the United Nations peacekeeping operations. Since the late 1940s, but particularly since the end of the cold war, peacekeeping has been a central part of the core activities of the United Nations and a major process in global security governance and the management of international relations in general. The volume will present a chronological analysis, designed to provide a comprehensive perspective that highlights the evolution of UN peacekeeping and offers a detailed picture of how the decisions of UN bureaucrats and national governments on the set-up and design of particular UN missions were, and remain, influenced by the impact of preceding operations. The volume will bring together leading scholars and senior practitioners in order to provide overviews and analyses of all 65 peacekeeping operations that have been carried out by the United Nations since 1948. As with all Oxford Handbooks, the volume will be agenda-setting in importance, providing the authoritative point of reference for all those working throughout international relations and beyond.

**Greece and the Cold War** Evanthis Hatzivassiliou, 2006-09-27 This is the first study to present a comprehensive analysis of Greek foreign and internal policy during the Cold War, covering the key period from the country's accession to NATO in 1952 until the imposition of the colonels' dictatorship in 1967. Clearly divided into three parts: 1952-55, 1955-63 and 1963-67, this book deals with Greek foreign policy analysis; threat perception; the NATO connection (including Greek-US relations, the rise of anti-Americanism in 1955-58 and in 1964-67, the economic dimension of security and the issue of US military aid); Greek policy towards the Soviet bloc; and the regional dimension, mainly Greek policy towards Turkey and Yugoslavia, and (for the 1964-67 years) the Cyprus crisis which greatly complicated Greek security obligations. Removing the Emperor's Clothes Simon Chapman, Becky Freeman, 2014-11-11 In December 2012, Australia became the first nation in the world to require all tobacco products to be sold in standard 'plain' packs under the leadership of the then Health Minister Nicola Roxon. Tobacco companies have had global apoplexy about the law. Humiliated in the Australian High Court with a six-one defeat, their hopes now rest with deterring other nations from following suit by pursuing international trade law action. With a combined 50 years of research and advocacy experience in tobacco control, Simon Chapman and Becky Freeman set out the evidence for the importance of plain packaging in striking at the heart of what remains of tobacco advertising. They examine the history of the idea, the tobacco industry's frantic efforts to derail it, and the early evidence for its impact. Most importantly, they give tools to policy makers in other countries wanting to make the best case for plain packaging and to defend it from the inevitable attacks that will follow.

**Asylum-Seeker and Refugee Protection in Sub-Saharan Africa** Cristiano d'Orsi, 2015-08-11 It is not often acknowledged that the great majority of African refugee movement happens within Africa rather than from Africa to the West. This book examines the specific characteristics and challenges of the refugee situation in Sub-Saharan Africa, offering a new and critical vision on the situation of asylum-seekers and refugees in the African continent. Cristiano d'Orsi considers the international, regional and domestic legal and institutional frameworks linked to refugee protection in Sub-Saharan Africa, and explores the contributions African refugee protection has brought to the cause on a global scale. Key issues covered in the book include the theory

and the practice of non-refoulement, an analysis of the phenomenon of mass-influx, the concept of burden-sharing, and the role of freedom fighters. The book goes on to examine the expulsions of refugees and the historical role played by UNHCR in Sub-Saharan Africa. As a work which follows the persecution and legal challenges of those in search of a safe haven, this book will be of great interest and use to researchers and students of immigration and asylum law, international law, human rights, and African studies.
