*Mind Reading as a Cultural Practice* Laurens Schlicht,Carla Seemann,Christian Kassung,2020-04-04 This book provides a genealogical perspective on various forms of mind reading in different settings. We understand mind reading in a broad sense as the twentieth-century attempt to generate knowledge of what people held in their minds – with a focus on scientifically-based governmental practices. This volume considers the techniques of mind reading within a wider perspective of discussions about technological innovation within neuroscience, the juridical system, “occult” practices and discourses within the wider field of parapsychology and magical beliefs. The authors address the practice of, and discourses on, mind reading as they form part of the consolidation of modern governmental techniques. The collected contributions explore the question of how these techniques have been epistemically formed, institutionalized, practiced, discussed, and how they have been used to shape forms of subjectivities – collectively through human consciousness or individually through the criminal, deviant, or spiritual subject. The first part of this book focuses on the technologies and media of mind reading, while the second part addresses practices of mind reading as they have been used within the juridical sphere. The volume is of interest to a broad scholarly readership dealing with topics in interdisciplinary fields such as the history of science, history of knowledge, cultural studies, and techniques of subjectivization.

Mindreader David J. Lieberman, PhD,2022-08-16 Tired of guessing what they're really thinking? Read people in every situation—in person, on a screen, or in writing—using the new science of psycholinguistics, from a New York Times bestselling author and consultant to the FBI, CIA, and NSA. “A treasure trove of concepts, ideas, and tools that we can all master to be safer and happier. It's a must-read!”—Joe Navarro, author of *Dangerous Personalities* What did your boss mean in that email? Is your mechanic stretching the truth? Whether you're engaged in a casual conversation or a high-stakes negotiation, it's critical to understand the subtext of a situation. But with so much interaction happening on screens—via email, texts, or video chat—we are losing the ability to interpret expressions and cues. Furthermore, since many are now savvy about the meaning of body language, it's become even harder to discern someone's true thoughts or intentions. A leading lie-detection expert who instructs the FBI and other security agencies, noted psychotherapist David Lieberman, PhD, takes “people reading” to a whole new level. Drawing on the latest research in psycholinguistics—the cues embedded in spoken and written speech—he shows you how to apply his cutting-edge methods to countless everyday situations, including: • Detecting the messaging behind passive language, personal or impersonal descriptions, and level of detail. • Determining whether someone's account of any incident is the truth or a work of fiction. • Finding out whether a potential hire, dating app match, or new babysitter is trustworthy or hiding something. Nobody wants to be played a fool. *Mindreader* will help us identify who can be trusted, and who may be out to get us.

*Vaudeville Mind Reading and Kindred Phenomena* David J. Lustig, 2018-09-07 From the INTRODUCTION. I doubt whether I shall ever forget the first time I saw Robert Heller, charming entertainer. It was sometime in the early sixties, at the Chinese Assembly Rooms, New York, his first appearance, an invitation to the press. He was almost unheard of. His advance agent, John Hall Wilton, who brought Anderson, the Wizard of the North, to this country, believing that Heller would make a more favorable impression as a Frenchman, persuaded him, clever mimic that he was, to affect a foreign accent. This he did for a while, but soon gave it up on the plea that he had been long enough in the country to learn the language. His opening tricks were nothing surprising, but when he reached his Second Sight, which was then new, at least to our people, his reputation was made. His audience was made up, in great part, of bright newspaper men, who set their wits to work to solve the secret of that clever trick....
