Nur Baba Yakup Kadri Karaosmanoğlu, M. Brett Wilson (Editor and Translator), 2023-06-23 This first-ever English translation of *Nur Baba* – a classic of modern Turkish literature written by Yakup Kadri Karaosmanoğlu – offers a unique window into Sufi lodges, social dilemmas, and intellectual life in early twentieth-century Istanbul. Inspired by Karaosmanoğlu's personal experiences with Islamic mystical orders, it is a story of illicit romance and spiritual inquiry, depicting a colourful lodge of Sufi dervishes led by a charismatic, yet morally suspect, spiritual master named Nur Baba. The plot follows his attempts to seduce an attractive married woman from an elite family and recounts her dramatic experiences in the life of a Sufi community. The setting shuttles between the grand mansions of Istanbul's elite families and a Sufi lodge where rich and poor intermingle. Exploring questions of gender, morality, and religious bias throughout, it captures the zeitgeist of early twentieth-century modernist thinkers who criticised Sufism for impeding social progress and debated the public roles of women in a rapidly modernising society. Alongside the editor's meticulous translation, the volume includes a scholarly introduction, maps, and images, as well as explanatory footnotes that will aid both students and scholars alike. The novel will be of particular interest to those studying world literature, Sufi studies, and Ottoman-Turkish history.

Training the Translator Paul Kussmaul, 1995-01-01 This book begins by investigating, through the use of think-aloud protocols, the mental processes of students when they translate. The creative and successful processes observed can be used directly for teaching purposes, while the unsuccessful ones can serve to find out where remedial training is needed. The book then goes on to discuss methods for improving a translator's competence. The strategies offered are based on the pragmatic and semantic analysis of texts from a functional point of view, and they include such practical matters as the use of dictionaries and the evaluation of translations and error analysis. The book is intended for teachers in translator-training institutions, but it can also be used by students for self-training.

The Translator's Approach Radegundis Stolze,2011-01-01 ContentsThe book presents the hermeneutical theory of translation focusing on the translator as a person. Translation is a dynamic task to be performed on the basis of a deep understanding of the original and an adequate strategy for authentic reformulation in another language. The theoretical foundations of hermeneutics laid by Schleiermacher, and later on developed by Heidegger, Gadamer and the phenomenologist Husserl, are presented, combined with a critical discussion of current theories in Translation Studies.The theoretical presentation is complemented by a collection of twelve text examples from various genres for a description of the practical translation process in the English and the German language, when one applies the hermeneutical categories of orientation. Thus the book is not only an introduction to translational hermeneutics but may also be used as a handbook for translator training.The AuthorRadegundis Stolze (*1950), Dr. phil., M.A., Dipl.- bers., lecturer at the University of Technology Darmstadt, visiting professor, seminar-leader, academic author and accredited practical translator. Long-term member of EST (European Society for Translation Studies) and BD (German Translators Association).

The Translator's Turn Douglas Robinson,1991 Despite landmark works in translation studies such as George Steiner's *After Babel* and Eugene Nida's *The Theory and Practice of Translation*, most of what passes as con-temporary theory on the subject has been content to remain largely within the realm of the anecdotal. Not so Douglas Robinson's ambitious book, which, despite its author's protests to the contrary, makes a bid to displace (the deconstructive term is apposite here) a gamut of earlier cogitations on the subject, reaching all the way back to Cicero, Augustine, and Jerome. Robinson himself sums up the aim of his project in this way: I want to displace the entire rhetoric and ideology of mainstream translation theory, which ... is medieval and ecclesiastical in origin, authoritarian in intent, and denaturing and mystificatory in effect. -- from <http://www.jstor.org> (Sep. 12, 2014).

Developing Translation Competence Christina Schäffner,Beverly Adab,2000-01-01 The questions which this volume seeks to address include: what is translation competence? How can it be built and developed? How can the product of the performance be used to measure levels of competence? These questions are addressed with specific reference to the training situation. A Plain and Literal Translation of the Arabian Nights' Entertainments Sir Richard Francis Burton,1900

Translator Leila Aboulela,

Friedrich Schleiermacher and the Question of Translation Larisa Cercel,Adriana Serban,2015-09-14 The aim of this volume is to assess Friedrich Schleiermacher's contribution to the theory of translation two centuries after his address "On the Different Methods of Translating" at the Academy of Sciences in Berlin, and to explore its potential for generating future innovative work. For the first time this classic text forms the object of a focused, interdisciplinary approach. Scholars of philosophy and translation, working in English, French and German, provide a close reading of Schleiermacher's lecture and combine their efforts in order to highlight the fundamental role translation plays in his hermeneutic thinking and the importance of hermeneutics for his theorisation of translation, within the historical and literary context of Romanticism. The various contributions revisit key concepts in Schleiermacher's thought, in particular the famous metaphor of movement; examine the relation between his theoretical writings and his practice as translator of Plato, unearthing some of their philosophical and linguistic implications; discuss Schleiermacher's reception in Germany and abroad; and assess the relevance of his ideas in the beginning of the 21st century as well as their potential to inspire further research in translation and interpreting.

Quality in Translation E. Cary,R. W. Jumpelt,2014-05-16 Quality in Translation is a compilation of papers from the Proceedings of the Third Congress of the International Federation of Translators. This collection discusses the quality methods and criteria of translation, the training of translators, practical measures in translating, and terminologies. This text describes what a good translation should be. This book analyzes the problems encountered when translating from one language to another: language thought patterns, occurrence of transformations during translations, and the range of interpretability. Another concern this book addresses is the dilemma of quality versus quantity, especially in scientific materials when more studies need to be translated for wider exposure to the scientific community. The training of translators covers how Russian students are selected, the training methods, and emphasis on peculiarities of the English and Russian languages. Practical matters include choosing the right translator for the right job or subject, as well as some advice for clients seeking translators for embassy work. The terminological aspects in translating include the translator's confidence with his choice of words and how he uses a scientist's new coined words instead of his employing similar terminologies used by the scientist's colleagues. This book also cites the accomplishments of the International Committee for the Co-ordination of Terminological Activities. Translators and students studying foreign languages, overseas workers, consulate staff, linguists and administrators of international companies will find this book relevant.

Translating by Factors Christoph Gutknecht,Lutz J. R?lle,1996-07-03 By emphasizing, using English-German examples, the notion of factor set, this book fosters the awareness that successful and adequate translation requires properly accounting for the

pertinent translation factors in each individual case. The factor approach gives translation criticism an objective yardstick for assessing the quality of translations . The authors explore the linguistic factors, including treatment of illocution and its indeterminacy, and perlocution, as well as non-linguistic factors such as factuality, situation, and culture. The book also includes aspects more genuinely linked to the notion of translation itself, such as translation units and word class and the nature and status of factors in translation theory.
