The Born Again Runner Pete Magill, 2016-10-09 From the lead author of Build Your Running Body ("the best running book ever"—Runner's World founder Bob Anderson), a one-of-a-kind guide for everyone who wants to run but feels they can't As a drug-addled young man, Pete Magill once found himself in the ER, with his body telling him to give up. Taking up running seemed impossible—but he willed himself to do it anyway. Magill went on to become one of the fastest masters runners ever, and a sought-after coach. Over a glowing (albeit hard-won) career, he has heard every excuse people use to stop running or never start—from achy knees and sore ankles, to advanced age and arthritis, to too many cigarettes or years on the couch. In every case, Magill's best advice is to do what he did: Run anyway—at a pace and mileage that work. Through inspiration, science, and anecdote, Magill gets runners out the door; through personal action plans, he sets them on the right path; and through the best exercises to protect and rehabilitate the body, he keeps them going—showing a way forward for new and sidelined runners who haven't before realized how close they are to fun and pain-free running!

Digital Cinematography Paul Wheeler, 2013-05-02 High end digital

cinematography can truly challenge the film camera in many of the technical, artistic and emotional aspects of what we think of as 'cinematography'. This book is a guide for practising and aspiring cinematographers and DOPs to digital cinematography essentials - from how to use the cameras to the rapidly emerging world of High Definition cinematography and 24p technology. This book covers the 'on-the-set' knowledge you need to know - its emphasis lies in practical application, rather than descriptions of technologies, so that in this book you will find usable 'tools' and information to help you get the job done. From 'getting the look' to lighting styles and ratios, what is needed for different types of shoots and the technical preparation required, this is a complete reference to the knowledge and skills required to shoot high end digital films. The book also features a guide to the Sony DVW in-camera menus - showing how to set them up and how they work - a device to save you time and frustration on set. Paul Wheeler is a renowned cinematographer/director of photography and trainer, he runs courses on Digital Cinematography at the National Film & Television School and has lectured on the Royal College of Art's MA course and at The London International Film School. He has been twice nominated by BAFTA for a Best Cinematography award and also twice been the winner of the INDIE award for Best Digital Cinematography.

A Practical Guide to Guest House Management Deseré Kockt, 2013-01-01 Guest houses attract both local and international tourists and aim at providing them with a taste of local food and hospitality. This creates job opportunities and revenue for local regions. As the successful managing and running of a guest house has its own set of challenges, the intention of this book is to provide a practical guide to assist both guest house owners and managers in managing their establishments effectively. The book is divided into seven themes: the law, management principles, financial management, marketing, accommodation and front office management, planning the breakfast menu, and intercultural differences.

Computer-Aided Transit Scheduling Martin Desrochers, Jean-Marc Rousseau, 2012-12-06 This volume consists of papers presented at the Fifth International Workshop on Computer Aided Scheduling of Public Transport, which was held in Montreal from August 19th to the 23rd, 1990. Since the first Workshop in Chicago in 1975 the field had matured considerably. In 1975, there were no presentations that described systems which had been implemented and used on a regular basis. By 1980, in Leeds, and certainly by 1983, in Montreal, several systems were in regular use. They were based on both heuristics and mathematical programming techniques. In 1990, there were more than one hundred transit companies using computer-aided scheduling tools in their regular operations. The scope of the Workshop was broadened in 1987, in Hamburg, so that topics related to scheduling may be introduced. We find, for example, in this book several papers on the technology related to the collection of data and/or the data bases required for scheduling and planning activities.

Runner's World Essential Guides: Injury Prevention & Recovery Editors of Runner's World Magazine, 2012-09-04 What Every Runner Needs to Know about Getting (and Staying) Healthy In an ideal runner's world, every step of every mile

would be 100 percent pain-free. No aches, no twinges, no lingering soreness from yesterday's workout. The reality is that many runners constantly deal with a slight (or not so slight) disturbance-a tender foot, a tight hamstring, a whiny knee. While these nagging issues often aren't serious enough to require a time-out, they are annoying, especially when they don't let you fully enjoy your time on the roads. Runner's World Essential Guides: Injury Prevention and Recovery is chock-full of helpful tips on how to avoid and recover from the most common injuries that plague runners. Presented in an easy to follow format and with dozens of handy sidebars, the practical information in this book will help keep runners on healthy, pain-free, and enjoying their running experience like never before.
