The Apaches Donald E. Worcester,2013-04-08 Until now Apache history has been fragmented, offered in books dealing with specific bands or groups-the Mescaleros, Mimbrenos, Chiricahuas, and the more distant Kiowa Apaches, Lipans, and Jicarillas. In this book, Donald E. Worcester synthesizes the total historical experience of the Apaches, from the post-Conquest Spanish era to the late twentieth century. In clear, fluent prose he focuses primarily on the nineteenth century, the era of the Apaches' sometimes splintered but always determined resistance to the white intruders. They were never a numerous tribe, but, in their daring and skill as commando-like raiders, they well deserved the name Eagles of the Southwest. The book highlights the many defensive stands and the brilliant assaults the Apaches made on their enemies. The only effective strategy against them was to divide and conquer, and the Spaniards (and after them the Anglo-Americans) employed it extensively, using renegade Indians as scouts, feeding traveling bands, and trading with them at their presidios and missions. When the Mexican Revolution disrupted this pattern in 1810, the Apaches again turned to raiding, and the Apache wars that erupted with the arrival of the Anglo-Americans constitute some of the most sensational chapters in America's military annals. The author describes the Apaches' life today on the Arizona and New Mexico reservations, where they manage to preserve some of the traditional ceremonies, while trying to provide livelihoods for all their people. The Apaches still have a proud history in their struggles against overwhelming odds of numbers and weaponry. Worcester here re-creates that history in all its color and drama.

The Numinous Legacy Adair Butchins,2002 Where is God in the universe if anywhere? Why did God make germs? Why should we be so special? Could the universe have been different? This is a book that brings home, in no uncertain fashion, the discrepancy between the universe envisaged by the ancient sages and prophets and that of modern scientific cosmology, where the possibility of divine intervention looks less and less likely. Butchins demonstrates with clarity how the scientific method may be used, despite certain drawbacks, in an attempt to verify objective truth. It describes how the effect of the Copernican Revolution in the seventeenth century has

steadily undermined the basic structure of the three great monotheistic religions of our day, Judaism, Christianity, and Islam, especially with respect to their eschatological concepts. The Eastern religions, being less anthropomorphic, are less affected. The theistic argument from design is shown to be powerful enough to have caused disagreement among present-day scientists, in spite of the strictures of Professor Dawkins. In general, the book attempts to make some sense of the structure of the universe in terms of our own consciousness; it behoves the reader to consider tha

The First Farmers of Central Europe Penny Bickle,Alasdair Whittle,2013-07-09 From about 5500 cal BC to soon after 5000 cal BC, the lifeways of the first farmers of central Europe, the LBK culture (Linearbandkeramik), are seen in distinctive practices of longhouse use, settlement forms, landscape choice, subsistence, material culture and mortuary rites. Within the five or more centuries of LBK existence a dynamic sequence of changes can be seen in, for instance, the expansion and increasing density of settlement, progressive regionalisation in pottery decoration, and at the end some signs of stress or even localised crisis. Although showing many features in common across its very broad distribution, however, the LBK phenomenon was not everywhere the same, and there is a complicated mixture of uniformity and diversity. This major study takes a strikingly large regional sample, from northern Hungary westwards along the Danube to Alsace in the upper Rhine valley, and addresses the question of the extent of diversity in the lifeways of developed and late LBK communities, through a wide-ranging study of diet, lifetime mobility, health and physical condition, the presentation of the bodies of the deceased in mortuary ritual. It uses an innovative combination of isotopic (principally carbon, nitrogen and strontium, with some oxygen), osteological and archaeological analysis to address difference and change across the LBK, and to reflect on cultural change in general.
