Conscience in Action Kim Dae-jung,2018-06-20 This book is an English translation of the authoritative autobiography by the late South Korean President Kim Dae-jung. The 2000 Nobel Peace Prize winner, often called the Asian Nelson Mandela, is best known for his tolerant and innovative “Sunshine Policy” towards North Korea. Written in the five years between the end of his presidency and his death in 2009, this book offers a poignant first-hand account of Korea’s turbulent modern history. It spans the pivotal time span between the Japanese colonial period (1910-1945) and reconciliation in the Korean Peninsula (2000-2009). In between are insightful insider descriptions of everything from wars and dictatorships to the hopeful period of economic recovery, blooming democracy, peace, and reconciliation. Conscience in Action serves as an intimate record of the Korean people’s persistent and heroic struggle for democracy and peace. It is also an inspiring story of an extraordinary individual whose formidable perseverance and selfless dedication to the values he believed in led him to triumph despite more than four decades of extreme persecution.

A Comprehensive Manchu-English Dictionary Jerry Norman,2020-10-26 Jerry Norman’s Comprehensive Manchu–English Dictionary, a substantial revision and enlargement of his Concise Manchu–English Lexicon of 1978, now long out of print, is poised to become the standard English-language resource on the

Manchu language. As the dynastic language of the Qing dynasty (1644–1911), Manchu was used in official documents and was also the vehicle for an enormous translation literature, mostly from the Chinese. The new Dictionary, based exclusively on Qing sources, retains all of the information from the earlier Lexicon, but also includes hundreds of additional entries cited from original Manchu texts, enhanced cross-references, and an entirely new introduction on Manchu pronunciation and script. All content from the earlier publication has also been verified. This final book from the preeminent Manchu linguist in the English-speaking world is a reference work that not only updates Norman's earlier scholarship but also summarizes his decades of study of the Manchu language. The Dictionary, which represents a significant scholarly contribution to the field of Inner Asian studies and to all students and scholars of Manchu and other Tungusic and related languages around the world, will become a major tool for archival research on Chinese late imperial period history and government.

Automated Machine Learning Frank Hutter, Lars Kotthoff, Joaquin Vanschoren, 2019-05-17 This open access book presents the first comprehensive overview of general methods in Automated Machine Learning (AutoML), collects descriptions of existing systems based on these methods, and discusses the first series of international challenges of AutoML systems. The recent success of commercial ML applications and the rapid growth of the field has created a high demand for off-the-shelf ML methods that can be used easily and without expert knowledge. However, many of the recent machine learning successes crucially rely on human experts, who manually select appropriate ML

architectures (deep learning architectures or more traditional ML workflows) and their hyperparameters. To overcome this problem, the field of AutoML targets a progressive automation of machine learning, based on principles from optimization and machine learning itself. This book serves as a point of entry into this quickly-developing field for researchers and advanced students alike, as well as providing a reference for practitioners aiming to use AutoML in their work.
