Hex Allen Jasmine Florentine, 2021-10-26 STEM meets magic in this new middle grade adventure series from an MIT graduate. Hex Allen can't do magic -- a huge problem when everything from lights to locks is powered by simple spells that everyone (save a few unfortunate undevelopeds) can do. After years of feeling useless, Hex sees opportunity to change her future when a once-in-a-century opportunity to journey to the Wishing Wyrms, a legendary dragon that has the ability to grant a single wish opens up. Unfortunately, Hex isn't the only one after the wish, and every rival wish hunter has magic on their side. Every rival except the Clanksmiths, Cam and Fuse. Like Hex, they can't do magic, but they've learned to build clank, creations made using the mysterious, forgotten arts of science and engineering. After a fairy fiasco throws Hex and the Clanksmiths together,

they agree to cooperate--for the time being. With the Clanksmiths' know-how and Hex's creativity, they outsmart monsters with everything from LEDs to electromagnets to water balloon launchers. But as they race to the Wishing Wyrms, Hex must decide between her friendship with the Clanksmiths and the wish that would give her a normal, magical life. Pages from Hex's design notebook provide step-by-step project instructions for aspiring Clanksmiths.

*A History of Me* Adrea Theodore, 2022-01-18 An uplifting message of hope for the future and pride in your history, inspired by a mother's experience of being the only Black child in her classroom. Who do you see when you look in the mirror? Emphasizing the strength, creativity, and courage passed down through generations, *A History of Me* offers a joyful new perspective on how we look at history and an uplifting message for the future. Being the only brown girl in a classroom full of white students can be hard. When the teacher talks about slavery and civil rights, she can feel all the other students' eyes on her. In those moments she wants to seep into the ground, wondering, is that all you see when you look at me? Having gone through the same experiences, the girl's mother offers a different, empowering point of view: she is a reflection of the powerful women that have come before her, of the intelligence, resilience, and resourcefulness that have been passed down through the generations. Her history is a source of pride, a reason to sit up straight and recognize everything beautiful and powerful in herself. What really matters is what we see when we look in the mirror, and what we want to become. Inspired by the authors' experiences in school and as a parent, Adrea Theodore's debut picture book is a powerful testament to the past as well as a benediction for the future. Erin Robinson's digital illustrations feature a wealth of texture and a bold, saturated palette, bringing this warm

message of empowerment to life. An American Library Association Notable Children's Book An NCSS Notable Social Studies Trade Book A Junior Library Guild Gold Standard Selection

Digital Genesis Christopher Barnatt, 2017-09-19 Digital Genesis charts the evolution of computing and the rise of artificial intelligence. From cloud AI services and autonomous robots, to 3D printers and quantum processors, the book details the latest digital technologies and predicts their future development and implications. Late last century the human race learnt how to enter cyberspace. But in the 2020s the reverse will happen, with

computers, robots and AI set to transform the physical world. Soon driverless vehicles will rule our highways, while many products will be manufactured in 'dark factories' by smart machines. Some of tomorrow's most sophisticated technologies may even be organically grown using the latest digital science of synthetic biology. Digital Genesis is written by futurist Christopher Barnatt, who in his 1995 book *Cyber Business* predicted the arrival of e-business and online social networks. Over 20 years later, he looks ahead to the Cognitive Computing Age, and beyond that to the era of 'cyborg fusion' in which the future of computing will become the future of ourselves.

*Conscience in Action* Kim Dae-jung, 2018-06-20 This book is an English translation of the authoritative autobiography by the late South Korean President Kim Dae-jung. The 2000 Nobel Peace Prize winner, often called the Asian Nelson Mandela, is best known for his tolerant and innovative "Sunshine Policy" towards North Korea. Written in the five years between the end of his presidency and his death in 2009, this book offers a poignant first-hand account of Korea's turbulent modern history. It spans the pivotal time span between the Japanese colonial period (1910-1945) and reconciliation in the Korean Peninsula (2000-2009). In between are insightful insider descriptions of everything from wars and dictatorships to the hopeful period of economic recovery, blooming democracy, peace, and reconciliation. *Conscience in Action* serves as an intimate record of the Korean people's persistent and heroic struggle for democracy and peace. It is also an inspiring story of an extraordinary individual whose formidable perseverance and selfless dedication to the values he believed in led him to triumph despite more than four decades of extreme persecution.
