**OMEGA** Sidney St. James, OMEGA – The Lost City of Altinova Omega Chronicles Book One Science fiction really is the only genre which lets you use your imagination without limitations. When writing the Lost City of Altinova, I found it was like taking the shackles off my imagination allowing me to go anywhere with this genre. A thrill-seeking professor, William Knight, a former recipient of the Nobel Prize in Archeology, from Texas A&M University and two of his graduate assistants, one from Austin, Texas and another from Calgary, Canada, attempt to cross the Atlantic Ocean in a hot air balloon built to support their journey for two weeks. Their mission was to find an island that records from the University Library in College Station, Texas showed the entranceway to a mystical island that would lead to the lost city of Altinova. Would they find the legendary plaque that held the secret to a lost city? Which 'X' marked the spot!? Could the mountain of crystals be in fact a mountain of diamonds? Could there possibly be gold found in them there hills? Come tag along with the adventurers while they find clues to the hidden city. Find out how they learned to tell time by the changing colors of sunlight. Learn what perfect health over five hundred years will do to a human body. Learn the whereabouts of the Land of No Return, the Lake of Fire, Frost Park, and yes, learn what happens to a woman from Cornelia, Georgia when she is turned into half woman and half robot, her punishment for trying to escape the lost city. The Professor and his students knew the trip might encounter bad weather, but what they didn't expect was what actually happened when they were but two days out to sea. From the award-winning author of Faith – Seventy Times Seven and Adversity – Keeping the Faith, comes Book 1 in the Omega Chronicles, Omega – The Lost City of Altinova. Come follow the adventurers' quest to find the sister cities in the Atlantic Ocean. The lost cities of Atlantis and Altinova have captivated mankind throughout all walks of life. While there have been many books written about Atlantis, this is the first put in writing about the sister city, Altinova. The ancient Greek philosopher, Plato, was the first to mention Atlantis. Many people insist the lost city story is based on a real historical disaster. Professor Knight intends to prove such a city exists and find the city of Altinova at the same time. The educator takes on his journey Norman Clark and Dolphus Slaton to discover answers to on another faded-out map found in the archives in the campus library at the University of Texas. In these archives, buried in a wrong section of writings, Professor Knight read, The founders of Altinova were half god and half human. They created a utopian civilization and became a great naval power. There is a great capital -. The page was torn off and nothing further was found. From this writing, the quest began for the search for The Lost City of Altinova.

**Father Omega's Last Testament** John O'Loughlin,2022-04-01 FATHER OMEGA'S LAST TESTAMENT is indeed an omega-oriented statement of moral guidance and intent which not only brings a more exacting comprehensiveness to bear on its analysis of axial relativity than had previously been the case with certain earlier e-books by John O'Loughlin, but, taking full advantage of this enhanced analysis, suggests the solution by means of which contemporary civilization - which is global - can attain to maturity in due omega-oriented guise, as something truly worthy to be deemed civilized and, more importantly, cultural.

**Communication and Aging** Jon F. Nussbaum,Loretta L. Pecchioni,James D. Robinson,Teresa L. Thompson,2013-05-13 This text employs a communication perspective to examine the aging process and the ability of individuals to adapt successfully to aging. It continues the groundbreaking work of the first edition, emphasizing a life-span approach toward understanding the social interaction that occurs during later life. The edition provides a comprehensive update on the existing and emerging research within communication and aging studies and considers such topics as notions of successful aging, positive and negative stereotypes toward older adults, and health communication issues. It raises awareness of the barriers facing elderly people in conversation and the importance such conversations have in elderly people's lives. The impact of nonrelational processes, such as hearing loss, are considered as they impact relationships with others and affect the ability to age successfully. The book is organized into 14 chapters. Each chapter is written so that the reader is presented with an exhaustive review of the pertinent and recent literature from the social sciences. As in the first edition, when the literature is empirically based, the communicative ramifications are then discussed. Readers of this volume will gain greater understanding of the importance of their communicative relationships and how significant they remain across the life span. Developed for students in communication, psychology, nursing, social gerontology, sociology, and related areas, Communication and Aging provides important insights on communication to all who are affected by the aging process.

**The Omega Theory** Mark Alpert,2011-02-15 “The wolf shall dwell with the lamb, and the leopard shall lie down with the kid. And a child shall lead them.” She smiled. “That’s you, Michael. That’s why Brother Cyrus needs you. You’re going to help us fulfill the prophecy.” The Omega Theory opens with media reports that, despite U.S. warnings, Iran has tested a nuclear bomb. But the blast from the device is different and far more dangerous than that of any previous nuclear weapon. Surveillance instruments show that for one split second an event occurred that had not taken place since the Big Bang fourteen billion years ago. Meanwhile, science historian David Swift and quantum physicist Monique Reynolds learn that their autistic son, Michael, has been kidnapped by a militant cult called the True Believers. Michael, a descendant of Albert Einstein, has inherited

Einstein’s remarkable intelligence and is the only person in the world who knows Einstein’s last secret—the Final Theory, a set of equations that could explain all the forces of nature. Only those who understand the key to creation could know how to destroy it. The Iranian nuclear blast is a demonstration of this understanding. Soon David and Monique realize their desperate search for Michael is also a desperate race to stop the horrific power of the theory from being unleashed. Joining forces with FBI Agent Lucille Parker, David and Monique race from the Old City of Jerusalem to the deserts of Turkmenistan to rescue Michael and stop the cult’s fanatic leader. Their journey proves just how difficult it is to stop those who are willing to die in the name of God. Praised by bestselling peers such as Douglas Preston and James Rollins, Mark Alpert shows he is at the top of his writing game and the cutting edge of science, seamlessly weaving fact and fiction with nonstop heart-pounding action in this explosive thriller. We will never see our universe in quite the same way again.
