Exploiting structure in non-convex quadratic optimization and gas network planning under uncertainty Jonas Schweiger ,2018

The amazing success of computational mathematical optimization over the last decades has been driven more by insights into mathematical structures than by the advance of computing technology. In this vein, Jonas Schweiger addresses applications, where nonconvexity in the model and uncertainty in the data pose principal difficulties. In the first part, he contributes strong relaxations for non-convex problems such as the non-convex quadratic programming and the Pooling Problem. In the second part, he contributes a robust model for gas transport network extension and a custom decomposition approach. All results are backed by extensive computational studies.

**DNO the SEO Revolution** Robert McAnderson,2011-09-01  
The total number of searches conducted across all search engines in 2011, will exceed 300 Billion and will cost companies competing for these page-one listings in excess of 50 Billion Dollars. DNO the SEO Revolution is a how-to-guide for achieving Permanent page-one rankings for under \$100. This one extraordinarily simple idea will shatter traditional SEO concepts allowing every reader the opportunity to gain multiple Page One Rankings. I know because I have achieved multiple rankings for my own company and a select number of customers who participated in our trials. Achieving the top three listings on Page One of Google for under \$100 is an amazing accomplishment but for them to be permanently listed and not be under threat from competitors who are prepared to pay more for the ranked position is extraordinary. The use of SEO, PPC and SEM to achieve a Page

One Google Ranking are expensive but more importantly they offer no permanency. Keyword auctions that encourage competitors to pay a higher price for the number one ranked position are insane and it is time to do things differently. Remember Einstein said, "The definition of insanity is doing the same thing over and over again and expecting a different result." Act now before your competitor does or face the consequences of their domination over you.
