Preparing for Electronic Commerce in Asia Douglas Bullis, 1999-02-28 Just as the crash of 1929 did not presage the downfall of the United States, neither will the economic crisis of 1997 mean the end of the rise of Asia and the Pacific Rim. Leading them out of a temporary setback, says Bullis, will be the new high-tech sectors of their economies: information services, communication technology, and electronic delivery systems such as e-commerce and e-business. His book is thus a non-technical look at the state of information technology (IT) and how people in the emerging Asia marketplace are thinking about it, especially in places like Singapore and Malaysia, the only two countries in the region pursuing the sorts of large-scale information infrastructure projects that will eventually determine the region's long term commerce in IT. Not a state of the technology book but a state of the mindset book, it offers businesspeople worldwide an important understanding of this vast and burgeoning market for their products and services, insights that will help decision makers recognize the big mistakes they can make before they make them. An important and fascinating study for executives in all industries that hope to do business in the still vital Asian market. Bullis makes clear that a great deal of investment money and corporate prestige can be wasted if companies attempt to enter the Asia information technology (IT) services arena with no clear idea of what IT wants. Overseas firms often assume that their potential clients think the way they think and have the same

needs. This is especially true, he says, with the sorts of decision makers who assume that marketplace forces alone condition investment decisions. But Asia is not a marketplace; it is a cultureplace. Basic issues, such as freedom of expression, the social utility of information, who should benefit from commerce, and the structure of organizations—all these are viewed differently in Asia. Bullis' book explains just what the mindset of the region is, largely in the words of Asia's IT movers and shakers and those who are rising in the economy to become tomorrow's leaders and influentials, precisely the people with whom their counterparts elsewhere will soon have to deal. Readers will find not only a much better understanding of the kinds of services they should be offering, but how to tailor those services and their delivery systems to local realities.

Webcasting Worldwide Louisa S. Ha, Richard J. Ganahl, 2013-03-07 Webcasting Worldwide tackles one of the most timely topics in mass communication today—the delivery of audio and video content via the Web, or webcasting—employing a global perspective to explore the subject. It is unique in providing a theoretical framework by which to analyze business models of emerging media, and it also examines the business practices of leading webcasters in the world's most developed broadband markets. With webcasting in its early development, the approaches discussed in this volume set the standards for the webcasting industry. Representing the major broadband markets in the world, this text is an authoritative and valuable reference for both researchers and

practitioners. The chapters relate the business practices of webcasting to the media market environment and established media industries, such as television and radio, as well as government and non-profit organizations. Downloadable resources offer PowerPoint charts for use in training, education, and research, along with tables, graphs, screenshots, and hyperlinks. Webcasting Worldwide is essential reading for academic researchers and media industry practitioners, and the volume will be a useful text in advanced courses addressing media technology, media management, and international communication. For updates about the book chapters and latest commentaries on topics related to webcasting business models, please visit the Webcasting Business Models Blog at <http://webcastingworldwide.blogspot.com> Winner of The Association for Education in Journalism and Mass Communication Picard Award for Media Management and Economics 2007.

Dynamics of Knowledge Intensive Entrepreneurship Franco Malerba, Yannis Caloghirou, Maureen McKelvey, Slavo Radošević, 2015-07-24 Knowledge intensive entrepreneurship lies at the core of the structural shift necessary for the growth and development of a knowledge based economy, yet research reveals that the EU has fewer young leading innovators, and Europe's new firms do not adequately contribute to industrial growth. This is especially true in the high R&D intensive, high-tech sectors. This structural malaise, undermining Europe's growth potential, is well diagnosed, but poorly understood. This volume fills this important gap by exploring new firms that have significant knowledge intensity in their activity and develop and exploit innovative opportunities in diverse sectors. Through an evolutionary and systemic approach to entrepreneurship, focusing on knowledge intensive entrepreneurship as both a micro and a macro phenomena and analyzing firms in the context of various socio-economic models, the authors explore firms creation and origins around the world, their organization, strategies and business models as well as the role of innovation systems and institutions in their formation and growth. This

comprehensive research text is vital reading for academics, researchers and students of high-tech and knowledge intensive entrepreneurship as well as those with an interest in industrial dynamics, innovation management and public policy.
