A Foundation Course In Drawing Peter Stanyer,Terry Rosenberg,2020-06-01 Written by two artists, each with more than 20 years of teaching experience in London art schools, A Foundation Course In Drawing is an exciting and carefully designed drawing course for artists of all levels. The book's five parts cover life drawing, still-life drawing, landscape drawing, abstract drawing and drawing systems. Each part is further broken down into sections, which progress from the most basic skills, such as how to hold a drawing implement, to more advanced concepts,such as capturing the folds and textures of drapery and creating harmony in abstract compositions. Throughout the book, detailed explanations and a structured series of practice exercises introduce each subject, which is looked at in different ways, through such elements as shape, form, space, light, texture, movement and time. Procedures, techniques and practical tips are also provided for describing each way of analyzing the subject. As each of the five parts stands alone, novice artists can work through them in any order, or can take a broader approach, moving through the first section of each part, followed by the next section, and so on. More advanced artists can turn directly to sections on problem areas for supplementary instruction and practice. A Foundation Course In Drawing offers an innovative, comprehensive approach to the experience of drawing, and will help artists of all abilities discover ways to confidently express their ideas, feelings and responses.

It has a rare combination of humor, clarity, exceptional writing and, above all, a precision in outlining skills and knowledge for practice. As a professional, I learned much that will be useful to me." —Alexander M. Ervin, University of Saskatchewan "At last, a textbook on development anthropology that is comprehensive, clearly written, and up-to-date! Nolan provides an exceptionally useful framework for analyzing development projects, carefully illustrated with mini-case studies." —Linda Stone, Washington State University "Nolan's book should be a backpack staple for the practitioner of grassroots development." —Jan Knippers Black, Monterey Institute of International Studies Development Anthropology is a detailed examination of anthropology's many uses in international development projects. Written from a practitioner's standpoint and containing numerous examples and case studies, the book provides students with a comprehensive overview of what development anthropologists do, how they do it, and what problems they encounter in their work. The book outlines the evolution of both applied anthropology and international development and their involvement with each other throughout the latter half of the twentieth century. It focuses on how development projects work and how anthropology is used in project design, implementation, and evaluation. The final section of the book considers how both development and anthropology must change in order to become more effective. An appendix provides practical advice to students considering a career in development anthropology.
