**Studies of Identity in the 2008 Presidential Campaign** Robert E. Denton, Jr., 2010-06-14 Studies of Identity in the 2008 Presidential Campaign explores issues of identity politics and the presidential election. Investigating all aspects of race, gender or ageism, the contributors to this volume address the role and function of 'identity politics' in political campaigns, and highlight challenges of 'identity politics' in contemporary political campaigns.

**Geographies of the Internet** Barney Warf, 2020-07-27 This book offers a comprehensive overview of recent research on the internet, emphasizing its spatial dimensions, geospatial applications, and the numerous social and geographic implications such as the digital divide and the mobile internet. Written by leading scholars in the field, the book sheds light on the origins and the multiple facets of the internet. It addresses the various definitions of cyberspace and the rise of the World Wide Web, draws upon media theory, as well as explores the physical infrastructure such as the global skein of fibre optics networks and broadband connectivity. Several economic dimensions, such as e-commerce, e-tailing, e-finance, e-government, and e-tourism, are also explored. Apart from its most common uses such as Google Earth, social media like Twitter, and neogeography, this volume also presents the internet's novel uses for ethnographic research and the study of digital diasporas. Illustrated with numerous graphics, maps, and charts, the book will best serve as supplementary reading for academics, students, researchers, and as a professional handbook for

policy makers involved in communications, media, retailing, and economic development.

**The Cultural Intermediaries Reader** Jennifer Smith Maguire, Julian Matthews, 2014-07-14 A rich selection of readings that expose the shadowy underworld of critics, bloggers, tweeters and stylists who have become essential guides to the good life of cultural consumption... a long overdue examination of how cultural intermediaries work, and how their work supports the new capitalist economy. - Sharon Zukin, Brooklyn College and City University An array of talented contributors, skilfully brought together by the editors, show how the concept of cultural intermediaries can cast light on cultural production, and on media, culture and society. - David Hesmondhalgh, University of Leeds Cultural intermediaries are the taste makers defining what counts as good taste and cool culture in today's marketplace. Working at the intersection of culture and economy, they perform critical operations in the production and promotion of consumption, constructing legitimacy and adding value through the qualification of goods. Too often, these are processes that remain invisible to the consumer's eye and in scholarly debates about creative industries. The Cultural Intermediaries Reader offers the first, comprehensive introduction to this exciting field of research, providing the conceptual and practical tools needed to analyse these market actors. The book: Surveys the theoretical terrain through accessible, in-depth primers to key approaches (Pierre Bourdieu, Michel Callon and the new economic sociology). Equips readers with a practical guide to methodology that highlights the central features and challenges of conducting cultural intermediary research. Challenges stereotypes and narrow views of cultural work through a diverse range of case studies, including creative directors of advertising and branding campaigns, music critics, lifestyle chefs, assistants in book shops and fashion outlets, personal trainers, bartenders and more. Brings the field to life through a wealth of ethnographic data from research in the US, UK and around the

world, in original chapters written by some of the leading scholars in the field. Invites readers to engage with proposed new directions for research, and comparative analyses of cultural intermediaries' historical development, material practices, and cultural and economic impacts. The book will be an essential point of reference for scholars and students in sociology, critical management, cultural studies, and media studies with an interest in cultural economy, creative labour, and the past, present and future intersections between production and consumption.

**Business Plus Level 2 Student's Book** Margaret Helliwell, 2014-04-10 Business Plus is a three-level, integrated-skills, business English course, from A1 (false beginner) to B1 (pre-intermediate) levels. **The Fullness of Time in a Flat World** Scott Waalkes, 2010-01-01 Best-selling author Thomas Friedman says that globalization has made the world flat and that we cannot stop the process. But while it is right to say that globalization tends to flatten our world, it is wrong to say that there are no alternatives to current patterns of economic, ecological, political, and cultural integration. This book argues that the Christian liturgical calendar provides a constructive alternative to the globalization of economics, ecologies, politics, and cultures. It does so by incorporating the church into the fullness of time in the gospel narrative, thereby helping us escape from the dead end of Friedman's flat world so that we can improvise healthier ways of being globally integrated.

**Startup Asia** Rebecca A. Fannin, 2011-10-25 Showing how entrepreneurs and investors can start up in Asia and go global, the book provides a first-hand, on-the-ground tour of the new technology centers that are gaining momentum all over Asia. Interviews with the most successful venture capitalists and entrepreneurs reveal their winning strategies and show how a new generation of entrepreneurs in China and India are no longer looking to the West for their cues - but are instead crafting their own local business models and success strategies.

*The Oxford Handbook of Southern Politics* Charles S. Bullock III, Mark J. Rozell, 2012-02-17 The unique political history of the Southern United States is rooted in the fact that it is the only region to have ever taken up arms against the national government. While the resources of the North prevailed after the four bloody years of the Civil War, the consequences of the practice of slavery and the bitter loss experienced by the South continue to shape southern politics a century and a half later. The twenty-three essays included in *The Oxford Handbook of Southern Politics* present a definitive view of the factors that contribute to this region's distinctive politics, examining these

factors in the context of the South's political development since World War II. Following an introductory essay by editors Charles Bullock III and Mark Rozell, five chapters survey the past seventy-five years of the region's political history, looking in particular at the Civil Rights Movement, urbanization of the South, and the area's economy and changing demographics. Four chapters will then take a closer look at the influence of particular demographics, including religious conservatives, women, and Latinos. This will be followed by chapters on the rise of the Republican Party, southern political attitudes, and political and economic development in the Southern Black Belt. Subsequent chapters will examine political parties, voting and elections, including party organizations and activists, the mainstreaming of the Republican Party, realignment, party building, and Deep South politics. The five chapters of the final section will look at the South's impact on national politics, at the executive and congressional levels, legislatively and on the nation more generally.

Big Media, Big Money Ronald V. Bettig, Jeanne Lynn Hall, 2012-05-04 Big Media, Big Money is a lively and scathing critique of the contemporary communications industry, examining how media ownership and the profit-making motive affect the messages we receive in alarming ways. Through close readings of recent news events and critical examination of corporate influence, Bettig and Hall

conclude that current interconnections among media, big business, government, and education pose a serious threat to democratic communications. The second edition includes three new chapters, covering the contemporary Hollywood film industry; the changing landscape of the music industry; and “ad creep,” the proliferation of advertising into previously ad-free venues such as schools and children’s television programming.
