WAP 2.0 Development Chris Tull, 2002 This book is a comprehensive tutorial that is logically organized, up-to-date, and includes coverage of the most popular wireless programming language, WML. Readers create a working application, developing examples that build from one chapter to the next. With each chapter readers are learning, practicing, and building on required skills necessary not only for wireless development, but also programming in general. By the end of the book, readers will have created a wireless database application that allows them to view, enter, and delete information. The book provides a usable reference of summaries on all languages discussed within the book, as well as a comparison of the wireless devices, and different development tools on the market today. Chris Tull writes tutorials and technical articles each week for AnywhereYouGo.com to help developers further their expertise in creating wireless applications. An application consultant and freelance writer, his writing has appeared in numerous publications, including Texas Technology, inquiry.com, and Managing Automation. He is also an active member of the STC (Society of Technical Communication). Chris has been involved in emerging technologies since mid-1990. Early in his career, he worked at Caver-Morehead Systems, where he was responsible for the integration of DBMS systems for companies such as Hewlett-Packard, EDS, and Texas Instruments. He also produced technical documentation for the company.

Beginning PowerApps Tim Leung, 2017-11-27 Build mobile apps that specifically target your company's unique business needs, with the same ease of writing a simple spreadsheet! With this book, you will build business apps designed to work with your company's systems and databases, without having to enlist the expertise of costly, professionally trained software developers. In Beginning PowerApps, author and business applications expert Tim Leung guides you step-by-step through the process of building your own mobile app. He assumes no technical background, although if you have worked with Excel, you are one step closer. He guides you through scenarios, such as what to do if you have existing databases with complex data structures and how to write screens that can connect to those data. You will come away with an understanding of how to set up screen navigation, manipulate data from within apps, and write solutions to perform specific tasks. What You'll Learn Connect with data Write formulas Visualize your data through charts Work with global positioning systems (GPS) Build flows Import and export data Manage offline scenarios Develop custom application programming interfaces (API) Who This Book Is For Beginners and non-developers, and assumes no prior knowledge of PowerApps
