four parallel tracks: human factors for interactive systems, research, and applications; interactive devices; interaction design; and adaptive and intelligent systems.

The Palgrave Handbook of Fulfillment, Wellness, and Personal Growth at Work Joan Marques,2023-10-02 This handbook discusses the role of sustainability, well-being and growth in engagement and purpose at work. When employees are dissatisfied with their job, they tend to be disengaged and less productive. Given the correlation between job satisfaction and job performance, organizations are looking for ways to increase employee engagement and productivity. Divided into three sections, this work opens with an examination of the concept of work, then discusses fulfillment of workforce members at mental, emotional, and spiritual levels. The next section on wellness explores drivers that advance interhuman approaches and trends, including meaning, leadership, happiness, resilience, and motivation. The last section focuses on personal and professional growth through the

cultivation of an entrepreneurial mindset, but also justice, equity, and interactive flourishing through the promotion of positive trends or the conscious reduction of toxic ones. With contributions from a global cluster of scholars, this book offers readers broad perspectives on the potential nature of work as a gratifying vocation. It will serve as a horizon-expanding reference for those researching topics related to meaningful work and workplace fulfillment and thriving.

Late Anglo-Saxon Prayer in Practice Kate H. Thomas, 2020-01-20 This monograph examines Anglo-Saxon prayer outside of the communal liturgy. With a particular emphasis on its practical aspects, it considers how small groups of prayers were elaborated into complex programs for personal devotion, resulting in the forerunners of the Special Offices. With examples being taken chiefly from major eleventh-century collections of prayers, liturgy and medical remedies, the methodologies of Anglo-Saxon compilers are examined, followed by five chapters on specialist kinds of prayer: to the Trinity and saints, for liturgical feasts and the canonical hours, to the Holy Cross, for protection and healing, and confessions. Analyzing prayer in a wide range of different situations, this book argues that Anglo-Saxon manuscripts may have included far more private offices than have so far been recognized, if we see them for what they were.

A Phenomenology of Career Change in the Malaysian Workforce Jennifer Yee Quan Tham, Yit Sean Chong, Pervaiz K. Ahmed, 2023-07-25 Evolution in economy, technology and social institutions over time have given rise to boundaryless and Protean careers that promote mobility and self-direction in managing

one's career. This has led to the phenomenon of career change whereby individuals undertake a shift from one field of work to a completely different field of work. In career change research, career changers have been studied as a collective, singular group undergoing a similar change experience, which neglects individual differences that may contrast the experience of change from one changer to another. Furthermore, the emotional experience that accompanies a career change has been examined with a primary focus on the role of positive emotions, which overlooks the role of negative emotions in career change. Thus, this book sheds light on three key narratives of career change; Rejectors, Navigators and Seekers, that were identified in a phenomenological study of career change amongst Malaysian working adults. Semi-structured interviews were conducted with 30 career changers across age, gender and ethnicity with a focus on how they made sense and meaning of their lived experience of career change within their environment and context. Each career change narrative was found to have different characteristics, motivations and behaviors respectively, which shaped their unique career change process. Negative emotions were also revealed as key drivers of the career change process, although each narrative expressed different types of negative emotions. Finally, the book also introduces an adaptive perspective to career development by way of the Adaptive Career Construal Model (ACCM) which was proposed based on the continuous bi-directional relationship between career decisions and career

outcomes.
