### The Timberman ,1909

**To Be a Logger** Lois Lenski,2015-10-13 A young boy growing up in the Oregon wilderness dreams of becoming a logger Little Joe has been sawing trees since he was 5 years old. A child of the Oregon hills, he spends his days scampering through the forest around his family's cabin. Ever since he was old enough to hold an ax, he's wanted to be a logger like his daddy. He wants to wear boots with nails on them, saw down the mightiest trees in the forest, and holler "Timber!" as they come crashing to the ground. Little Joe has logging in his blood. Finally, Little Joe is old enough for his 1st visit to a logging camp. He sees the great machines taking down trees and loading them onto trucks, and he wants to be a logger more than ever. But as he grows up, he will find there are better ways to show his love for the forest than cutting it down.

*Responding to Environmental Issues through Adaptive Collaborative Management* Carol J. Pierce Colfer,Ravi Prabhu,2023-03-15 Focused on forest management and governance, this book examines two decades of experience with Adaptive Collaborative Management (ACM), assessing both its uses and improvements needed to address global environmental issues. The volume argues that the activation and the empowerment of local peoples are critical to addressing current environmental challenges and that this must be enhanced by linking and extending such stewardship to global and national policymakers and actors on a broader scale. This can be achieved by employing ACM's participatory approach, characterized by conscious efforts among stakeholders to communicate, collaborate, negotiate and seek out opportunities to learn collectively about the impacts of their action. The case studies presented here reflect decades of experience working with forest communities in three Indonesian Islands and four African countries. Researchers and practitioners who participated in

CIFOR's early ACM work had the rare opportunity to return to their research sites decades later to see what has happened. These authors reflect critically on their own experience and local site conditions to glean insights that guide us in more effectively addressing climate change and other forest-related challenges. They showcase how global and regional actors will have to work more closely with smallholders, Indigenous Peoples and local communities, recognizing the key local roles in forest stewardship. This book will be of great interest to students, scholars and practitioners working in the fields of conservation, forest management, community development, natural resource management and development studies more broadly. **Surviving the Gulag** Ilse Johansen,2016-07-20 The terrified yell of my comrades makes me stop. I drop the potatoes into the grass and turn around. He has pulled out the pistol and is taking aim. Slowly I come back. *Surviving the Gulag* is the first-person account of a resourceful woman who survived five grueling years in Russian prison camps: starved, traumatized, and worked nearly to death. A story like Ilse Johansen's is rarely told—of a woman caught in the web of fascism and communism at the end of the Second World War and beginning of the Cold War. The candid story of her time as a prisoner, written soon after her release, provides startling insight into the ordeal of a German female prisoner under Soviet rule. Readers of memoir and history, and students of feminism and war studies, will learn more about women's experience of the Soviet gulag through the eyes of Ilse Johansen.
