Food-Energy-Water Systems: Achieving Climate Resilience and Sustainable Development in the 21st Century Charles Vörösmarty, Richard Lawford, Pietro Elia Campana, Donald Wuebbles, Graham Jewitt, 2024-01-23 extreme weather will mean ongoing challenges to the capacity of these sectors to support human well-being, grow the economy, and provide critical environmental services. Society has yet to evaluate the resilience of FEWS to climate, environmental, and management stresses as it shapes strategies to support sustainable development over the next decades. These issues constitute a quintessential interdisciplinary research challenge and require a well-structured science agenda and supportive information services for implementing key findings that governments and stakeholders can adopt. Integrated policy pathways require usable research findings, applications, models, real-time information systems, and decision support systems. In addition, stakeholder engagement is essential to communicate the benefits and results of these approaches and to engage appropriate groups in their implementation.

Object Lessons in American Art Karl Kusserow, 2023-03-28 A rich exploration of American artworks that reframes them within current debates on race, gender, the environment, and more Object Lessons in American Art explores a diverse gathering of Euro-American, Native American, and African American art from a range of contemporary perspectives, illustrating how innovative analysis of historical art can inform, enhance, and afford new relevance to artifacts of the American past. The book is grounded in the understanding that the meanings of objects change over time, in different contexts, and as a consequence of the ways in which they are considered. Inspired by the concept of the object lesson, the study of a material thing or group of things in juxtaposition to convey embodied and underlying ideas, Object Lessons in American Art examines a broad range of art from Princeton University's venerable collections as well as contemporary works that imaginatively appropriate and reframe their subjects and style, situating them within current social, cultural, and artistic debates on race, gender, the environment, and more. Distributed for the Princeton University Art Museum

The House on Mango Street Sandra Cisneros, 2013-04-30 NATIONAL BESTSELLER • A coming-of-age classic about a young girl growing up in Chicago • Acclaimed by critics, beloved by readers of all ages, taught in schools and universities alike, and translated around the world—from the winner of the 2019 PEN/Nabokov Award for Achievement in International Literature. “Cisneros draws on her rich [Latino] heritage...and seduces with precise, spare prose, creat[ing] unforgettable characters we want to lift off the page. She is not only a gifted writer, but an absolutely essential one.” —The New York Times Book Review The House on Mango Street is one of the most cherished novels of the last fifty years. Readers from all walks of life have fallen for the voice of Esperanza Cordero, growing up in Chicago and inventing for herself who and what she will become. “In English my name means hope,” she says. “In Spanish it means too many letters. It means sadness, it means waiting. Told in a series of vignettes—sometimes heartbreaking, sometimes joyous—Cisneros’s masterpiece is a classic story of childhood and self-discovery and one of the greatest neighborhood novels of all time. Like Sinclair Lewis’s Main Street or Toni Morrison’s Sula, it makes a world through people and their voices, and it does so in language that is poetic and direct. This gorgeous coming-of-age novel is a celebration of the power of telling one’s story and of being proud of where you're from.

Cognitive Errors and Diagnostic Mistakes Jonathan Howard, 2018-11-28 This case-based book illustrates and explores common cognitive biases and their consequences in the practice of medicine. The book begins with an introduction that explains the concept of cognitive errors and their importance in clinical medicine and current controversies within healthcare. The core of the book features chapters dedicated to particular cognitive biases; cases are presented and followed by a discussion of the clinician's rationale and an overview of the particular cognitive bias. Engaging and easy to read, this text provides strategies on minimizing cognitive errors in various

medical and professional settings.

SQL Server Backup and Restore Shawn McGehee,2012 A database administrator's duties include ensuring that a database can be restored and recovered in the event of error or disaster. This book discusses how to perform backup and restore operations using SQL Server Management Studio (SSMS), basic T-SQL scripts and Red Gate's SQL Backup tool. Capturing backups using SSMS or simple scripts is fine for one-off backup operations, but any backups that form part of the recovery strategy for any given database must be automated with some built-in checks that, for example, alert the responsible database administrator immediately if a problem arises. The tool of choice in this book for backup automation is Red Gate SQL Backup. Building an automated solution will take a lot of work, but this book offers some advice on possible options, such as PowerShell scripting, T-SQL scripts and SQL Server Agent jobs. --
