Classical Concert Studies Martin Tröndle, 2020-09-01 *Classical Concert Studies: A Companion to Contemporary Research and Performance* is a landmark publication that maps out a new interdisciplinary field of Concert Studies, offering fresh ways of understanding the classical music concert in the twenty-first century. It brings together essays, research articles, and case studies from scholars and music professionals including musicians, music managers, and concert designers. Gathering both historical and contemporary cases, the contributors draw on approaches from sociology, ethnology, musicology, cultural studies, and other disciplines to create a rich portrait of the classical concert's past, present, and future. Based on two earlier volumes published in German under the title *Das Konzert* (The Concert), and with a selection of new chapters written for the English edition, this companion enables students, researchers, and practitioners in the classical and contemporary music fields to understand this emerging field of research, go beyond traditional disciplinary boundaries and methodologies, and spark a renaissance for the classical concert.

Mathemusical Conversations Jordan B L Smith, Elaine Chew, Gérard Assayag, 2016-07-21 *Mathemusical Conversations* celebrates the understanding of music through mathematics, and the appreciation of mathematics through music. This volume is a compilation of the invited talks given at the Mathemusical Conversations workshop that took place in Singapore from 13–15 February 2015, organized by Elaine Chew in partnership with Gérard Assayag for the scientific program and with Bernard Lanskey for the artistic program. The contributors are world experts and leading scholars, writing on the intersection of music and mathematics. They also focus on performance and composition, two topics which are foundational both to the understanding of human creativity and to the creation of tomorrow's music technologies. This book is essential reading for researchers in both music and mathematics. It will also appeal more broadly to scholars, students, musicians, and anyone interested in new perspectives on the intimate relationship between these two universal human activities. Decline, Renewal and the City in Popular Music Culture: Beyond the Beatles Sara Cohen, 2017-09-29 How is popular music culture connected with the life, image, and identity of a city? How, for example, did the Beatles emerge in Liverpool, how did they come to be categorized as part of Liverpool culture and

identity and used to develop and promote the city, and how have connections between the Beatles and Liverpool been forged and contested? This book explores the relationship between popular music and the city using Liverpool as a case study. Firstly, it examines the impact of social and economic change within that city on its popular music culture, focusing on de-industrialization and economic restructuring during the 1980s and 1990s. Secondly, and in turn, it considers the specificity of popular music culture and the many diverse ways in which it influences city life and informs the way that the city is thought about, valued and experienced. Cohen highlights popular music's unique role and significance in the making of cities, and illustrates how de-industrialization encouraged efforts to connect popular music to the city, to categorize, claim and promote it as local culture, and harness and mobilize it as a local resource. In doing so she adopts an approach that recognizes music as a social and symbolic practice encompassing a diversity of roles and characteristics: music as a culture or way of life distinguished by social and ideological conventions; music as sound; speech and discourse about music; and music as a commodity and industry.

Towards the Dignity of Difference? Mojtaba Mahdavi, 2016-02-24 The rise of popular social movements throughout the Middle East, North Africa, Europe and North America in 2011 challenged two hegemonic discourses of the post-Cold War era: Francis Fukuyama's 'The End of History' and Samuel Huntington's 'The Clash of Civilizations.' The quest for genuine democracy and social justice and the backlash against the neoliberal order is a common theme in the global mass protests in the West and the East. This is no less than a discursive paradigm shift, a new beginning to the history, a move towards new alternatives to the status quo. This book is about difference and dialogue; it embraces The Dignity of Difference and promotes dialogue. However, it also demonstrates the limits of dialogue as a useful and universal approach for resolving conflicts, particularly in cases involving asymmetric and unequal power relations. The distinguished group of authors suggests in this volume that there is a 'third way' of addressing global tensions - one that rejects the extremes of both universalism and particularism. This third way is a radical call for an epistemic shift in our understanding of 'us-other' and 'good-evil', a radical approach toward accommodating difference as well as embracing the plural concept of 'the good'. The authors strengthen their alternative approach with a practical policy guide, by challenging existing policies that either exclude or assimilate other cultures, that wage the constructed 'global war on terror,' and that impose a western neo-liberal discourse on non-western societies. This important book will be essential reading for all those studying civilizations, globalization, foreign policy, peace and security studies, multiculturalism and ethnicity, regionalism, global governance and international political economy.

Soundtrack of the Revolution Nahid Siamdoust, 2017-01-18 “A lovely tribute to the courage and creativity of Iran’s musicians . . . filled with hope and sadness—and the universal human desire for freedom.” —Joe Klein, *Time* Music was one of the first casualties of the Iranian Revolution. It was banned in 1979, but it quickly crept back into Iranian culture and politics. Now, more than forty years on, both the children of the revolution and their music have come of age. *Soundtrack of the Revolution* offers a striking account of Iranian culture, politics, and social change to provide an alternative history of the Islamic Republic. Drawing on over five years of research in Iran, including during the 2009 protests, Nahid Siamdoust introduces a full cast of characters, from musicians and audience members to state officials, and takes readers into concert halls and underground performances, as well as the state licensing and censorship offices. She closely follows the work of four musicians—a giant of Persian classical music, a government-supported pop star, a rebel rock-and-roller, and an underground rapper—each with markedly different political views and relations with the Iranian government. Taken together, these examinations of musicians and their music shed light on issues at the heart of debates in Iran—about its future and identity, changing notions of religious belief, and the quest for political freedom. Music will continue to offer an opening for debate and defiance. As the 2009 Green Uprising and the 1979 Revolution before it have proven, the invocation of a potent melody or musical verse can unite strangers into a powerful public. “Paints a vivid portrait of the struggles over popular music in the Islamic Republic.” —Mark LeVine, author of *Heavy Metal Islam*

Race Music Guthrie P. Ramsey, 2003-06-01 This powerful book covers the vast and various terrain of African American music, from bebop to hip-hop. Guthrie P. Ramsey, Jr., begins with an absorbing account of his own musical experiences with family and friends on the South Side of Chicago, evoking Sunday-morning worship services, family gatherings with food and dancing, and jam sessions at local nightclubs. This lays the foundation for a brilliant discussion of how musical meaning emerges in the private and communal realms of lived experience and how African American music has shaped and reflected identities in the black community. Deeply informed by Ramsey's experience as an accomplished musician, a sophisticated cultural theorist, and an enthusiast brought up in the community he discusses, *Race Music* explores the global influence and popularity of African American music, its social relevance, and key questions regarding its interpretation and criticism. Beginning with jazz, rhythm and blues, and gospel, this book demonstrates that while each genre of music is distinct—possessing its own conventions, performance practices, and formal qualities—each is also grounded in similar techniques and conceptual frameworks identified with African American musical traditions. Ramsey provides vivid glimpses of the careers of Dinah Washington, Louis Jordan, Dizzy Gillespie, Cootie Williams, and Mahalia Jackson, among others, to show how the social changes of the 1940s elicited an Afro-modernism that inspired much of the music and culture that followed. *Race Music* illustrates how, by transcending the boundaries between genres, black communities bridged generational divides and passed down knowledge of musical forms and styles. It also considers how the discourse of soul music contributed to the vibrant social climate of the Black Power Era. Multilayered and masterfully written, *Race Music* provides a dynamic framework for rethinking the many facets of African American music and the ethnocentric energy that infused its creation.
