Recent Advances on Hybrid Approaches for Designing Intelligent Systems Oscar Castillo, Patricia Melin, Witold Pedrycz, Janusz Kacprzyk, 2014-03-26 This book describes recent advances on hybrid intelligent systems using soft computing techniques for diverse areas of application, such as intelligent control and robotics, pattern recognition, time series prediction and optimization complex problems. Soft Computing (SC) consists of several intelligent computing paradigms, including fuzzy logic, neural networks and bio-inspired optimization algorithms, which can be used to produce powerful hybrid intelligent systems. The book is organized in five main parts, which contain a group of papers around a similar subject. The first part consists of papers with the main theme of type-2 fuzzy logic, which basically consists of papers that propose new models and applications for type-2 fuzzy systems. The second part contains papers with the main theme of bio-inspired optimization algorithms, which are basically papers using nature-inspired techniques to achieve optimization of complex optimization problems in diverse areas of application. The third part contains papers that deal with new models and applications of neural networks in real world problems. The fourth part contains papers with the theme of intelligent optimization methods, which basically consider the proposal of new methods of optimization to solve complex real world optimization problems. The fifth part contains papers with the theme of evolutionary methods and intelligent computing, which are papers considering soft computing methods for applications related to diverse areas, such as natural language processing, recommending systems and optimization.

Fast Food, Fast Track Jennifer Talwar, 2018-03-05 Praise for Fast Food, Fast Track A fine ethnography with both theoretical and advocative significance, representing the best qualitative sociology. – Choice Explores the intimate realities and behind-the-scenes exchanges of a multiethnic work force serving the typical American meal. Through a lively narrative and insightful stories, Jennifer Parker Talwar gives a full sense of what it's like to live in both a global economy and a local culture. –Sharon Zukin, author of The Cultures of Cities No longer just pocket money for American teens, wages paid by multinational fast-food chains are going to a new generation of order-takers, burger-flippers, and basket-fryers—newly arrived immigrants hailing from China, the Caribbean, Latin America, and India, a colorful sea of faces has taken its place behind one of the most ubiquitous American business institutions—the fast-food counter. They have become a vital link between the growing service sector in our cities' ethnic enclaves and the multi-billion dollar global fast-food industry. For four years, sociologist Jennifer Parker Talwar went behind the counter herself and listened to immigrant fast-food workers in New York City's ethnic communities. They talked about balancing their low-paying jobs and monotonous daily reality with keeping the faith that these very jobs could be the first step on the path to the American Dream. In this original and compelling work of ethnography, Talwar shows that contrary to those arguing that the fast-food industry only represents an increasing homogenization of the American workforce, fast-food chains in immigrant communities must and do adapt to their surroundings.

Supersizing Urban America Chin Jou, 2017-03-15 More than one-third of adults in the United States are obese. The Centers for Disease Control and Prevention estimates that there are over 112,000 obesity-related deaths annually, and for many years, the government has waged a very public war on the problem. Former Surgeon General Richard Carmona warned in 2006 that “obesity is the terror within,” going so far as to call it a threat that will “dwarf 9/11.” What doesn’t get mentioned in all this? The fact that the federal government helped create the obesity crisis in the first place—especially where it is strikingly acute, among urban African-American communities. Supersizing Urban America reveals the little-known story of how the U.S. government got into the business of encouraging fast food in inner cities, with unforeseen consequences we are only beginning to understand. Chin Jou begins her story in the late 1960s, when predominantly African-American neighborhoods went from having no fast food chain restaurants to being littered with them. She uncovers the federal policies that have helped to subsidize that expansion, including loan guarantees to fast food franchisees, programs intended to promote minority entrepreneurship, and urban revitalization initiatives. During this time, fast food companies also began to relentlessly market to urban African-American consumers. An unintended consequence of these developments was that low-income minority communities were disproportionately affected by the obesity epidemic. ?In the first book about the U.S. government’s problematic role in promoting fast food in inner-city America, Jou tells a riveting story of the food industry, obesity, and race relations in America that is essential to understanding health and obesity in contemporary urban America.

Reagan's Gun-Toting Nuns Theresa Keeley, 2020-09-15 In Reagan's Gun-Toting Nuns, Theresa Keeley analyzes the role of intra-Catholic conflict within the framework of U.S. foreign policy formulation and execution during the Reagan administration. She challenges the preponderance of scholarship on the administration that stresses

the influence of evangelical Protestants on foreign policy toward Latin America. Especially in the case of U.S. engagement in El Salvador and Nicaragua, Keeley argues, the bitter debate between U.S. and Central American Catholics over the direction of the Catholic Church shaped President Reagan's foreign policy. The flash point for these intra-Catholic disputes was the December 1980 political murder of four American Catholic missionaries in El Salvador. Liberal Catholics described nuns and priests in Central America who worked to combat structural inequality as human rights advocates living out the Gospel's spirit. Conservative Catholics saw them as agents of class conflict who furthered the so-called Gospel according to Karl Marx. The debate was an old one among Catholics, but, as Reagan's Gun-Toting Nuns contends, it intensified as conservative, anticommunist Catholics played instrumental roles in crafting U.S. policy to fund the Salvadoran government and the Nicaraguan Contras. Reagan's Gun-Toting Nuns describes the religious actors as human rights advocates and, against prevailing understandings of the fundamentally secular activism related to human rights, highlights religion-inspired activism during the Cold War. In charting the rightward development of American Catholicism, Keeley provides a new chapter in the history of U.S. diplomacy and shows how domestic issues such as contraception and abortion joined with foreign policy matters to shift Catholic laity toward Republican principles at home and abroad.

Fast Food Roman Espejo,2009 It makes our lives easier, but it also has been proven to be a terribly unhealthy choice. This collection of essays debates fast food. Readers are given both sides to an assertion, allowing them multiple perspectives and a chance to decide for themselves. Essays include whether obesity and fast food is truly linked, whether the healthy choices in fast food are actually healthy, whether farm workers are exploited, and whether fast food culture has harmed society.

The Palatine Wreck Jill Farinelli,2017-09-05 Two days after Christmas in 1738, a British merchant ship traveling from Rotterdam to Philadelphia grounded in a blizzard on the northern tip of Block Island, twelve miles off the Rhode Island coast. The ship carried emigrants from the Palatinate and its neighboring territories in what is now southwest Germany. The 105 passengers and crew on board-sick, frozen, and starving-were all that remained of the 340 men, women, and children who had left their homeland the previous spring. They now found themselves castaways, on the verge of death, and at the mercy of a community of strangers whose language they did not speak. Shortly after the wreck, rumors began to circulate that the passengers had been mistreated by the ship's crew and by some of the islanders. The stories persisted, transforming over time as stories do and, in less than a hundred years, two terrifying versions of the event had emerged. In one account, the crew murdered the captain, extorted money from the passengers by prolonging the voyage and withholding food, then abandoned ship. In the other, the islanders lured the ship ashore with a false signal light, then murdered and robbed all on board. Some claimed the ship was set ablaze to hide evidence of these crimes, their stories fueled by reports of a fiery ghost ship first seen drifting in Block Island Sound on the one-year anniversary of the wreck. These tales became known as the legend of the Palatine, the name given to the ship in later years, when its original name had been long forgotten. The flaming apparition was nicknamed the Palatine Light. The eerie phenomenon has been witnessed by hundreds of people over the centuries, and numerous scientific theories have been offered as to its origin. Its continued reappearances, along with the attention of some of nineteenth-century America's most notable writers-among them Richard Henry Dana Sr., John Greenleaf Whittier, Edward Everett Hale, and Thomas Wentworth Higginson-has helped keep the legend alive. This despite evidence that the vessel, whose actual name was the Princess Augusta, was never abandoned, lured ashore, or destroyed by fire. So how did the rumors begin? What really happened to the Princess Augusta and the passengers she carried on her final, fatal voyage? Through years of painstaking research, Jill Farinelli reconstructs the origins of one of New England's most chilling maritime mysteries.
