Global Outlaws Carolyn Nordstrom,2007 A deeply insightful book that connects the dots of the hidden systems that have subverted democracy and caused the type of desperation and anger that result in a 9/11. A book that opens our awareness.--John Perkins, author of The New York Times bestseller Confessions Of An Economic Hit Man Anyone interested in global economic crime should read this book.--Charmian Gooch, a founding director of Global Witness Global Outlaws is a revealing book about a global trend whose importance is still far from being fully recognized.--Moises Naim, Editor in Chief of Foreign Policy Magazine and author of Illicit: How Smugglers Traffickers and Copycats are Hijacking the Global Economy

Carolyn Nordstrom's important new book takes us on a dark journey through war-torn landscapes riddled with corruption, violence, and gross inequalities. It is a compelling study--one guided by the norms of scholarly research but also written out of deeply felt experience. A book infused by anger, compassion, but also hope.--Andrew Mack, University of British Columbia This is a fascinating, insightful, and important ethnographic study of the intersection of crime, finance, and power in the illegal, 'informal', or underground economy. I have read all of Carolyn Nordstrom's books, and this is the best one yet.--Jeff Sluka, Massey University Carolyn Nordstrom's *Global Outlaws* is a rare and remarkable fusion of economic anthropology and travel writing. The prose is highly engaging without being sensationalistic. This is a timely and fascinating read for anyone looking for an on-the-ground account of the clandestine underside of globalization.--Peter Andreas, co-author of *Policing the Globe: Criminalization and Crime Control in International Relations* Carolyn Nordstrom is the best fieldworker in anthropology, bar none. Yet again she has pioneered new fieldsites and new forms of ethnography in this book, as well as presented a new framework for viewing economics and economic power. This is undoubtedly a highly important work that sets new frontiers for anthropology.--Monique Skidmore, Australian National University

The Architecture of Ruins Jonathan Hill, 2019-03-25 *The Architecture of Ruins: Designs on the Past, Present and Future* identifies an alternative and significant history of architecture from the sixteenth century to the twenty-first century, in which a building is designed, occupied and imagined as a ruin. This design practice conceives a monument and a ruin as creative, interdependent and simultaneous themes within a single building dialectic, addressing temporal and environmental questions in poetic, psychological and practical terms, and stimulating questions of personal and national identity, nature and culture, weather and climate, permanence and impermanence and life and death. Conceiving a building as a dialogue between a monument and a ruin intensifies the already blurred relations between the unfinished and the ruined and envisages the past, the present

and the future in a single architecture. Structured around a collection of biographies, this book conceives a monument and a ruin as metaphors for a life and means to negotiate between a self and a society. Emphasising the interconnections between designers and the particular ways in which later architects learned from earlier ones, the chapters investigate an evolving, interdisciplinary design practice to show the relevance of historical understanding to design. Like a history, a design is a reinterpretation of the past that is meaningful to the present. Equally, a design is equivalent to a fiction, convincing users to suspend disbelief. We expect a history or a novel to be written in words, but they can also be delineated in drawing, cast in concrete or seeded in soil. The architect is a 'physical novelist' as well as a 'physical historian'. Like building sites, ruins are full of potential. In revealing not only what is lost, but also what is incomplete, a ruin suggests the future as well as the past. As a stimulus to the imagination, a ruin's incomplete and broken forms expand architecture's allegorical and metaphorical capacity, indicating that a building can remain unfinished, literally and in the imagination, focusing attention on the creativity of users as well as architects. Emphasising the symbiotic relations between nature and culture, a building designed, occupied and imagined as a ruin acknowledges the coproduction of multiple authors, whether human, non-human or atmospheric, and is an appropriate model for architecture in an era of increasing climate change.
