Beginning OpenOffice Calc Jacek Artymiak,2011-12-14 OpenOffice Calc is the most powerful and widespread open source spreadsheet application in existence. It is the only real alternative to Excel. Jacek Artymiak is widely regarded as the authority on OpenOffice Calc. He takes you, step by step, from the interface and handling Calc files to working with data sources small and large. Artymiak then extends the reader's skillset to data visualization, writing complex formulas and performing statistical analysis. Beginning OpenOffice Calc allows you to gain confidence in the considered use of statistical formulas, but does not assume familiarity with another spreadsheet application.

The Linux Command Line, 2nd Edition William Shotts,2019-03-05 You've experienced the shiny, point-and-click surface of your Linux computer--now dive below and explore its

depths with the power of the command line. The Linux Command Line takes you from your very first terminal keystrokes to writing full programs in Bash, the most popular Linux shell (or command line). Along the way you'll learn the timeless skills handed down by generations of experienced, mouse-shunning gurus: file navigation, environment configuration, command chaining, pattern matching with regular expressions, and more. In addition to that practical knowledge, author William Shotts reveals the philosophy behind these tools and the rich heritage that your desktop Linux machine has inherited from Unix supercomputers of yore. As you make your way through the book's short, easily-digestible chapters, you'll learn how to: • Create and delete files, directories, and symlinks • Administer your system, including networking, package installation, and process management • Use standard input and output, redirection, and pipelines • Edit files with Vi, the world's most popular text editor • Write shell scripts to automate common or boring tasks • Slice and dice text files with cut, paste, grep, patch, and sed Once you overcome your initial shell shock, you'll find that the command line is a natural and expressive way to communicate with your computer. Just don't be surprised if your mouse starts to gather dust.

Styles and Templates Bruce Byfield,2017-06-29 This book is an extract from a much larger book entitled Designing with LibreOffice. It is intended for those who only want information on using styles

and templates with LibreOffice, the popular free-licensed office suite. It consists of Chapters 2, 3 and 11 in the larger book. This book is the first of five extracts from the complete book. The extracts are: Part 1: Styles and Templates, Part 2: Choosing Fonts, Part 3: Character and Paragraph Styles, Part 4: Page, Frame, and List Styles, Part 5: Slide Shows, Diagrams, and Spreadsheets. Together, the five smaller books will contain most, but not all, of the information from the larger book. Any changes are minimal, and made for continuity or changes in structure made necessary by the changes in format.

Analysis of Phylogenetics and Evolution with R Emmanuel Paradis,2006-11-25 This book integrates a wide variety of data analysis methods into a single and flexible interface: the R language. The book starts with a presentation of different R packages and gives a short introduction to R for phylogeneticists unfamiliar with this language. The basic phylogenetic topics are covered. The chapter on tree drawing uses R's powerful graphical environment. A section deals with the analysis of diversification with phylogenies, one of the author's favorite research topics. The last chapter is devoted to the development of phylogenetic methods with R and interfaces with other languages (C and C++). Some exercises conclude these chapters.
