Case Configuration and Noun Phrase Interpretation Helen Dehoop,2014-07-16 First Published in 1997. The present study examines the relation between two types of structural Case on the one hand, and the interpretation of NPs on the other. The author argues that there are two types of structural Case, to wit weak D-structural and strong S-structural Case. The hypothesis that links these two types of Case to different interpretations states that an object is interpreted as a generalized quantifier if and only if it bears strong Case. This title particularly considers the semantics of noun phrases and the weak-strong distinction.

English Dramatick Opera, 1661-1706 Andrew R. Walkling,2019-03-19 English Dramatick Opera, 1661-1706 is the first comprehensive examination of the distinctively English form known as dramatick opera, which appeared on the London stage in the mid-1670s and lasted until its displacement by Italian through-composed opera in the first decade of the eighteenth century. Andrew Walkling argues that, while the musical elements of this form are crucial to its definition and history, the origins of the genre lie principally in a tradition of spectacular stagecraft that first manifested itself in England in the mid-1660s as part of a hitherto unidentified dramatic sub-genre, to which Walkling gives the name spectacle-tragedy. Armed with this new understanding, the book explores a number of historical and interpretive issues, including the physical and rhetorical configurations of performative spectacle, the administrative maneuverings of the two patent theatre companies, the construction and deployment of the technologically advanced Dorset Garden Theatre in 1670-71, the critical response to generic, technical, and ideological developments in Restoration drama, and the shifting balance between machine spectacle and song-and-dance entertainment throughout the later decades of the seventeenth century, including in the dramatick operas of Henry Purcell. This study combines the materials and methodologies of

music history, theatre history, literary studies, and bibliography to fashion an entirely new approach to the history of spectacular and musical drama on the English Restoration stage. This book serves as a companion to the Routledge publication *Masque and Opera in England, 1656-1688* (2017).

Music and Politics in San Francisco Leta E. Miller, 2012 “Leta Miller’s long-awaited study is a tightly woven, fast-paced, and luminous chronicle of San Francisco’s musical coming of age. Her keen insights into Chinese opera, night club jazz, and two international expositions go far to rekindle the era’s spirited mix of talent, taste, patronage, and politics. The groundbreaking work of an accomplished music and social historian, *Music and Politics in San Francisco* is a most welcome companion to Catherine Parsons Smith’s *Making Music in Los Angeles*.” —Jonathan Elkus, Lecturer in Music Emeritus, UC Davis “From three disastrous days in April 1906 through the onset of an even greater disaster in 1941, from the San Francisco Conservatory through the performances of the Chinese Opera, Leta Miller traces the musico-political history of ‘the Paris of the West’ in meticulous detail. This important book adds immeasurably to our knowledge of West Coast American music, whilst simultaneously challenging a number of historiographical shibboleths.” —David Nicholls, contributing editor of *The Cambridge History of American Music* Leta Miller’s *San Francisco’s Musical Life* is a pure pleasure to read. Miller manages that rare feat of digesting what must have been many years of digging through newspapers and archives into a fun, lively, highly readable narrative. Each chapter strikes a comfortable balance among factual exposition, colorful anecdote, and historical analysis. Miller brings equal depth and insight to each of her disparate subjects, she writes with charm and clarity throughout, and the whole is arranged in a way that is clear and logical, never monotonous. —Mary Ann Smart, author of *Mimomania: Music and Gesture in Nineteenth-Century Opera*

Concert Halls by Nagata Acoustics Yasuhisa Toyota, Motoo Komoda, Daniel Beckmann, Marc Quiquerez, Erik Bergal, 2021-02-25 This visually stunning and data rich text catalogs the design of 32 concert halls by world-renowned acoustician Yasuhisa Toyota and his team at Nagata Acoustics, the firm behind the celebrated Walt Disney Concert Hall, the Hamburg Elbphilharmonie, and numerous others. Alongside architectural drawings and photographs, commentary on the design process and challenges of each hall provides insight for the dedicated listener to appreciate a wide range of internationally beloved concert venues. Summarized acoustical and architectural data for each of the halls will provide valuable reference information to architects and acousticians alike. Following the project anthology is an overview of the history, development, and acoustical features of vineyard- and surround-style concert halls. A broader discussion of design philosophy reveals the methods by which Toyota has guided architects to create world renowned halls. These technical and general discussions give architects the foundation to design for the performing arts, and provide audiences a new insight and perspective to consider the next time they attend a concert.

Piloted Simulation Assessment of a High-Speed Civil Transport Configuration ,2002 An assessment of a proposed configuration of a high-speed civil transport was conducted by using NASA and industry research pilots. The assessment was conducted to evaluate operational aspects of the configuration from a pilot's perspective, with the primary goal being to identify potential deficiencies in the configuration. The configuration was evaluated within and at the limits of the design operating envelope to determine the suitability of the configuration to maneuver in a typical mission as well as in emergency Or envelope-limit conditions. The Cooper-Harper rating scale was used to evaluate the flying qualities of the configuration. A summary flying qualities metric was also calculated. The assessment was performed in the Langley six-degree-of-freedom Visual Motion Simulator. The effect of a restricted cockpit field-of-view due to obstruction by the vehicle nose was not included in this study.
