**The Rogers Book** ,1999-11-01 (Book). In this book, author Rob Cook gives the complete history of the Rogers Drum Company, whose drums, in the words of Not-So-Modern Drummer editor John Aldridge, were the Cadillac of the 1960s...(whose) innovations in hardware design have been copied by almost every drum manufacturer in existence. The Rogers Book covers the company's east coast beginnings, the Covington, OH era, English Rogers, the CBS era, and much more. It includes a list of Rogers endorsees, a comprehensive guide for dating equipment, a color section showing old catalogs and drum colors, the parts listings from all Rogers catalogs, a list of current resources, and lots of photographs throughout. This is a must-have for all drum enthusiasts!

**Spectral Data for Highly Ionized Atoms: Ti, V, Cr, Mn, Fe, Co, Ni, Cu, Kr, and Mo** Toshizo Shirai,2000-06-22 These comprehensive spectroscopic data tables for the spectra of highly ionized heavy atoms provide a valuable resource for researchers who need detailed spectroscopic information on energy levels, wavelengths, ionization energies, and oscillator strengths. Critically evaluated data for these spectroscopic quantities, both observed and calculated, are tabulated for the elements Ti, V, Cr, Mn, Fe, Co, Ni, Cu,

Kr, and Mo. The tables include data for all stages of ionization from Ca-like through H-like spectra, except for Kr and Mo, which start at Ge-like and Rb-like, respectively. Typically, several hundred transitions are covered for each spectrum. The tables are arranged in order of decreasing wavelengths, and lines belonging to the same multiplet are grouped together. Forbidden lines, i.e., mainly magnetic dipole (M1) and electric quadrupole (E2) transitions are also included and are identified as such. A unified finding list, in which lines are ordered according to wavelengths, contains all the tabulated transitions. Short reviews on the line identifications and wavelength measurements are given for each stage of ionization. The general introduction contains a discussion on the method of evaluation and some background on the compilations.

Artisanal Diamond Mining Koen Vlassenroot,Steven Van Bockstael,2008

Effective development of artisanal diamond mining communities must be based on a thorough understanding of the inherent complexities that characterise the sector. This research coordinated by the Egmont Institute and undertaken in support of the KPCS Working Group on Alluvial/Artisanal Producers

(currently chaired by Angola), involved many of the leading thinkers in this field. It makes a significant contribution to our knowledge on the sector, laying the foundations for a concerted work programme. This study does not underestimate the challenges this sector poses. However, it emphasises the critical importance of this task because the integrity of the KPCS and all it stands for are dependent upon addressing the developmental dimensions of the diamond trade not just policing it.
