Lexis and Creativity in Translation Dorothy Kenny, 2014-04-08 Computers offer new perspectives in the study of language, allowing us to see phenomena that previously remained obscure because of the limitations of our vantage points. It is not uncommon for computers to be likened to the telescope, or microscope, in this respect. In this pioneering computer-assisted study of translation, Dorothy Kenny suggests another image, that of the kaleidoscope: playful changes of perspective using corpus-processing software allow textual patterns to come into focus and then recede again as others take their place. And against the background of repeated patterns in a corpus, creative uses of language gain a particular prominence. In *Lexis and Creativity in Translation*, Kenny monitors the translation of creative source-text word forms and collocations uncovered in a specially constructed German-English parallel corpus of literary texts. Using an abundance of examples, she reveals evidence of both normalization and ingenious creativity in translation. Her discussion of lexical creativity draws on insights from traditional morphology, structural semantics and, most notably, neo-Firthian corpus linguistics, suggesting that rumours of the demise of linguistics in translation studies are greatly exaggerated. *Lexis and Creativity in Translation* is essential reading for anyone interested in corpus linguistics and its impact so far on translation studies. The book also offers theoretical and practical guidance for researchers who wish to conduct their own corpus-based investigations of translation. No previous knowledge of German, corpus linguistics or computing is assumed.

From Schoolhouse to Courthouse Joshua M. Dunn, Martin R. West, 2010-02-01 From race to speech, from religion to school funding, from discipline to special education, few aspects of education policy have escaped the courtroom over the past fifty years. Predictably, much controversy has ensued. Supporters of education litigation contend that the courts are essential to secure student (and civil) rights, while critics insist that the courts distort policy and that the mere threat of litigation undermines the authority of teachers and administrators. *From Schoolhouse to Courthouse* brings together experts on law, political science, and education policy to test these claims. Shep Melnick (Boston College) and James Ryan (University of Virginia School of Law) draw lessons from judicial efforts to promote school desegregation and civil rights. Martha Derthick (University of Virginia), John Dinan (Wake Forest University), and Michael Heise (Cornell Law School) discuss litigation over high-stakes testing and school finance in the era of *No Child Left Behind*. Richard Arum (New York University), Samuel R. Bagenstos (Washington University Law School), and Frederick M. Hess (American Enterprise Institute) analyze the consequences of court rulings for school discipline, special education, and district management. Finally, editors Joshua Dunn and Martin R. West probe the tangled relationship between religious freedom, student speech, and school choice.
