Modern Technology of Textile Dyes & Pigments (2nd Revised Edition) H. Panda,2016-05-01 Dyestuff sector is one of the core chemical industries in India. There are two types of colorants dyes and pigments. Dyes are soluble substances used to pass color to the substrate and find applications primarily in textiles and leather. Pigments are coloring materials, which are water insoluble. Key end-user industries of pigments include wood-coloring, stone, textiles, paints & coatings, food and metals. Pigment are usually manufactured as dry colorants and grounded into fine powder. The dyes market, meanwhile, largely depends upon the fortunes of its principal end-user, textiles, which account for about 70 percent of the total demand. Their importance has grown in almost every area of an economic activity. In the colorants market, Asia-Pacific accounts for the largest share. This region is one of the key markets for dyes and pigments production. In the Asia-Pacific, India and China are the important countries contributing towards the growth of colorants market. Rising consumer spending will drive increased demand for colorants in textiles. Increases in value demand will reflect the growing importance of expensive, higher value dyes and pigments that meet increasingly stringent performance standards. Growing demand for high-quality value-added pigments is one of the key factors expected to result in a spurt in growth. This book describes the various formulae, manufacturing processes and photographs of plant & machinery with supplier's contact details. The major contents of the book are metal pigments, black pigments, inorganic colour pigments, organic colour pigments, extender pigments, white pigments, photocatalytic activity of titanium dioxide pigment, azo pigments, bisazo pyridine pigments, high grade organic pigments, high temperature stable inorganic pigments, anti corrosive pigments, metals and metal ions in pigmentary systems, control of organic pigment dispersion properties, pigments for plastics, rubber & cosmetics, pigments for printing inks, vat dyes, reactive dyes, disperse dyes, direct dyes and sulphur dyes etc. It will be a standard reference book for professionals, entrepreneurs, those studying and researching in this important area and others interested in the field of textile dyes & pigments.

The Old Timers - Jenkins Web C. Louis Barr,2019-07-11 In the year 2010, Carl and Roy Mosley were moved and hidden inside the future—year 2056—by the strong hand of the Old Timers using a fake government protection program that went wrong. Lamenting over their lost families held in the past, the brothers soon discover that somebody is providing them clues on how to illegally regain their freedom by traveling east into Waterville, Iowa. This story is set in an era where time travel, using firearms, cloning anything, driving cars, or traversing any wild territory across the Mississippi River are all dangerous and illegal. Breaking any of these laws is punishable by death, but Monster Land keeps growing larger and has recently crossed the west side of the Mississippi, spreading westward toward their residences in Cedar Rapids, Iowa. Enjoy twenty chapters of nonstop action played out in just one long day as the Mosley Brothers break all the laws and travel into Monster Land to regain their freedom.

The New Century Ewa Lipska,2009-10-12 Although Lipska's poems reveal an acute awareness of history and politics, she's primarily concerned with individual experience and the most difficult philosophical questions of evil. Lipska is awed by beauty despite the deep skepticism that permeates her poems, countering corruption with an unflinching commitment to conveying truth without sentimentality. --Book Jacket.
