**In the Studio** Brian R. Jacobson,2020-07-21 Studios are, at once, material environments and symbolic forms, sites of artistic creation and physical labor, and nodes in networks of resource circulation. They are architectural places that generate virtual spaces—worlds built to build worlds. Yet, despite being icons of corporate identity, studios have faded into the background of critical discourse and into the margins of film and media history. In response, *In the Studio* demonstrates that when we foreground these worlds, we gain new insights into moving-image culture and the dynamics that quietly mark the worlds on our screens. Spanning the twentieth century and moving globally, this unique collection tells new stories about studio icons—Pinewood, Cinecittà, Churubusco, and CBS—as well as about the experimental workplaces of filmmakers and artists from Aleksandr Medvedkin to Charles and Ray Eames and Hollis Frampton.

**The Oak Park Studio of Frank Lloyd Wright** Lisa D. Schrenk,2021-04-05 Between 1898 and 1909, Frank Lloyd Wright's residential studio in the idyllic Chicago suburb of Oak Park served as a nontraditional work setting as he matured into a leader in his field and formulized his iconic design ideology. Here, architectural historian Lisa D. Schrenk breaks the myth of Wright as the lone genius and reveals new insights into his early career. With a rich narrative voice and meticulous detail, Schrenk tracks the practice's evolution: addressing how the studio fit into the Chicago-area design scene; identifying other architects working there and their contributions; and exploring how the suburban setting and the nearby presence of Wright's family influenced office life. Built as an addition to his 1889 shingle-style home, Wright's studio was a core site for the ideological development of the prairie house, one of the first truly American forms of residential

architecture. Schrenk documents the educational atmosphere of Wright's office in the context of his developing design ideology, revealing three phases as he transitioned from colleague to leader. This heavily illustrated book includes a detailed discussion of the physical changes Wright made to the building and how they informed his architectural thinking and educational practices. Schrenk also addresses the later transformations of the building, including into an art center in the 1930s, its restoration in the 1970s and 80s, and its current use as a historic house museum. Based on significant original and archival research, including interviews with Wright's family and others involved in the studio and 180 images, *The Oak Park Studio of Frank Lloyd Wright* offers the first comprehensive look at the early independent office of one of the world's most influential architects.

*Modeling, Control and Optimization of Water Systems* Thomas Rauschenbach, 2015-12-14 This book provides essential background knowledge on the development of model-based real-world solutions in the field of control and decision making for water systems. It presents system engineering methods for modelling surface water and groundwater resources as well as water transportation systems (rivers, channels and pipelines). The models in turn provide information on both the water quantity (flow rates, water levels) of surface water and groundwater and on water quality. In addition, methods for modelling and predicting water demand are described. Sample applications of the models are presented, such as a water allocation decision support system for semi-arid regions, a multiple-criteria control model for run-of-river hydropower plants, and a supply network simulation for public services.

**The New Organic Grower** Eliot Coleman, 1995-10-01 With more than 45,000 sold since 1989, *The New Organic Grower* has become a modern classic. In this newly revised and expanded edition, master grower Eliot Coleman continues to present the simplest and most sustainable ways of growing top-quality organic vegetables. Coleman updates

practical information on marketing the harvest, on small-scale equipment, and on farming and gardening for the long-term health of the soil. The new book is thoroughly updated, and includes all-new chapters such as: Farm-Generated Fertility—how to meet your soil-fertility needs from the resources of your own land, even if manure is not available. The Moveable Feast—how to construct home-garden and commercial-scale greenhouses that can be easily moved to benefit plants and avoid insect and disease build-up. The Winter Garden—how to plant, harvest, and sell hardy salad crops all winter long from unheated or minimally heated greenhouses. Pests—how to find plant-positive rather than pest-negative solutions by growing healthy, naturally resistant plants. The Information Resource—how and where to learn what you need to know to grow delicious organic vegetables, no matter where you live. Written for the serious gardener or small market farmer, *The New Organic Grower* proves that, in terms of both efficiency and profitability, smaller can be better.

**Contemporary Art and Classical Myth** Jennie Hirsh, 2017-07-05 Contemporary art is deeply engaged with the subject of classical myth. Yet within the literature on contemporary art, little has been said about this provocative relationship. Composed of fourteen original essays, *Contemporary Art and Classical Myth* addresses this scholarly gap, exploring, and in large part establishing, the multifaceted intersection of contemporary art and classical myth. Moving beyond the notion of art as illustration, the essays assembled here adopt a range of methodological frameworks, from iconography to deconstruction, and do so across an impressive range of artists and objects: Francis Al?s, Ghada Amer, Wim Delvoye, Luciano Fabro, Joanna Frueh, Felix Gonzales-Torres, Duane Hanson, Yayoi Kusama, Roy Lichtenstein, Kara Walker, and an iconic photograph by Richard Drew subsequently entitled *The Falling Man*.? Arranged so as to highlight both thematic and structural affinities, these essays manifest various aspects of the link between contemporary art and classical myth, while offering novel insights into the artists and myths under consideration. Some essays concentrate on single works as they relate to specific myths, while others take a broader approach, calling on myth as a means of grappling with dominant trends in contemporary art.

*The Affective Turn* Patricia Ticineto Clough, Jean Halley, 2007-07-12 “The innovative essays in this volume . . . demonstrat[e] the potential of the perspective of the affects in a wide range of fields and with a variety of methodological approaches. Some of the essays . . . use fieldwork to investigate the functions of affects—among organized sex workers, health care workers, and in the modeling industry. Others employ the discourses of microbiology, thermodynamics, information sciences, and cinema studies to rethink the body and the affects in terms of technology. Still others explore the affects of trauma in the context of immigration and war. And throughout all the essays run serious theoretical reflections on the powers of the affects and the political possibilities they pose for research and practice.”—Michael Hardt, from the foreword In the mid-1990s, scholars turned their attention toward the ways that ongoing political, economic, and cultural transformations were changing the realm of the social, specifically that aspect of it described by the notion of affect: pre-individual bodily forces, linked to autonomic responses, which augment or diminish a body’s capacity to act or engage with others. This “affective turn” and the new configurations of bodies, technology, and matter that it reveals, is the subject of this collection of essays. Scholars based in sociology, cultural studies, science studies, and women’s studies illuminate the movement in thought from a psychoanalytically informed criticism of subject identity, representation, and trauma to an engagement with information and affect; from a privileging of the organic body to an exploration of nonorganic life; and from the presumption of equilibrium-seeking closed systems to an engagement with the complexity of open systems under far-from-equilibrium conditions. Taken together, these essays suggest that attending to the affective turn is

necessary to theorizing the social. Contributors. Jamie “Skye” Bianco, Grace M. Cho, Patricia Ticineto Clough, Melissa Ditmore, Ariel Ducey, Deborah Gambs, Karen Wendy Gilbert, Greg Goldberg, Jean Halley, Hosu Kim, David Staples, Craig Willse , Elizabeth Wissinger , Jonathan R. Wynn
